Sporting Notes

Richmond Hill girls' soft-ball team
will play the return game at Victoria
Square tomorrow (Friday) evening.
Autos will leave the post-office at 6:30
p.m. sharp. The locals look for a win
to offset the loss of Monday, when the
visitors won 18-16. Both teams were
on friendly terms throughout the game,
thus showing the true sporting spirit.

"Wine is a Mocker"

The liquid refreshments at the feasts
of Ahasuerus and Belshazzar, were all
fermented. 700 years before the com-
ing of Christ the tribe of Ephraim had
become so sodden with drink, we are
told that even "the priests and the
prophets were swallowed up of wine;
they err in vision; they stumble in
judgment. Down through the ages
secular history shows society riddled
by the debasing, destroying
influence of fermented drinks. If
Alexander the Great had not been
conquered by wine, he might have
conquered the world. Rome in the
middle ages came to ruin through
drunkenness and lust. The descriptions
of Roman feasts are unreadable.

English as it Sounds

Said Mrs. A., one of the over hearers:
"They must have been to the Zoo,
because I heard her mention a trained
deer."

Said Mrs. B: "No, no, they were
talking about going away and she said
to him, 'Find out about the train,
dear.'"

Said Mrs. C: I think you are both
wrong. It seemed to me they were
discussing music, for she said 'a
trained ear' very distinctly."

A few minutes later the lady herself
appeared and they told her of their dis-
agreement.

"Well," she laughed, "that's
certainly funny. You are poor
guessers, all of you. The fact is, I'd
been out to the country overnight, and
I was asking my husband if it rained
here last evening."

Running Water!

When and Where You Want It

On any farm of average size at least one hour a day—36½
ten hour working days a year—are spent in the irksome,
wearying task of pumping water. 36½ days which one
of my Toronto Windmills will give you for profitable work,
rest or recreation—besides supplying running water
wherever you want it.

The one bothersome task, that of oiling the windmill in all kinds of
weather, is overcome in the Toronto Self-Oiler, which requires fresh
oil only "once a year." Friction and wear are practically abolished.
Toronto windmills, too, can be made absolutely self-regulating in
operation.

The "Toronto" Tower will stand for a lifetime because it is the
heaviest, strongest and best-braced one built for any windmill.
Let me explain why I believe this is one of the biggest conveniences
you can have.
