Wet Weather Means Loss to Farmers

A fortnight of dry weather would be worth a million dollars right now, and if that weather was warm and bright at the same time, another million or two would be added. There is still a good deal of grain and clover out all through the central, eastern and northern portions of the province, and this is badly soaked, while canning and fruit crops are ripening so slowly that farmers are beginning to fear severe frosts may arrive before the process is complete.

Real Flesh-and-Blood Talking Pictures

1. Amplifier panels and recording apparatus.
2. The wax disc upon which sound vibrations will be recorded.

3. Visual and audible motion picture mechanism.
4. Cameraman in sound proof booth making synchronizations of film and sound.

It is one thing to see and hear a talking moving picture, but quite a different thing to listen to the words of actors and singers as we watch the film which reproduces their every action—all in such perfect synchronization as to produce the illusion of a real flesh-and-blood performance. The engineers and scientists of the Bell Telephone system have perfected apparatus which synchronizes motion pictures with reproduced sound with a degree of naturalness never before attained. Reproduction preserves the correct relationship of each sound to the other, the intensity varying in the same proportion as in the enacted scene or musical programme. Any picture which has ever been produced can be orchestrated and synchronized. The sound synchronization is not dependent upon recording at the time of the taking of the film.
