Oakville Demands Recording Thermometer.

Important amendments to the milk by-law calculated to make it possible for the local householder to obtain milk as free from impurities as is possible were, passed by the Oakville Council last week. The three amendments as recommended by the Board of Health, include the pasteurization of cream, the obtaining of all milk to be sold in town from duly accredited herds and the installation of self recording thermometers in the dairies such as are used in the pasteurization process. It was pointed out that the pasteurization of cream was fully as important in the interests of health as was that of milk.

It Pays To Advertise.

Advertising seems to be an art yet to be discovered by some people. That is the practical part of it. A constant stream of water from one or more fire engines will soon extinguish or get under control a very large fire, while a few buckets of water dashed on here and there have little or no effect. The modern fire department is practical and has outgrown the bucket system, and so with modern advertising—plenty of it, used in a practical, common sense and judicious manner, pays.

If you want to catch a certain kind of fish you use a certain kind of bait; not all fish bite at all kinds of bait. Not all people respond to every advertisement. The newspaper is a medium indispensable to the majority of advertisers, because of its wide and repeating circulation. As a promoter of trade and profit newspaper advertising is no longer an open question; that is, when done in a practical and intelligent manner, and pays because of its effectiveness and cheapness.
