### Making GOODYEAR Tubes Leak-Proof

EVERY Goodyear Tube gets an under water stretch before it leaves the factory. The Tube is inflated, placed in a tank of water, then stretched mechanically to a point far in excess of what it will get in the severest of wear. This test exaggerates and reveals any possible pores. The slightest leakage means rejection. That's why Goodyear Tubes deliver such universal satisfaction. Goodyears don't cost any more than ordinary Tubes. We've got your size. Get our prices.
