THE NEW OMEGA.

Comparatively few people are aware of the progress the Omega watch company has made in perfecting their watches. Their latest model solves the problem of producing a reliable watch at a moderate cost Half a century of technical knowledge and all the experience acquired in the manufacture of millions of Omega watches has been utilized in making the new model. The result is a triumph for modern research and technical horological skill. The low price is made possible only by the simplified design and mass production of every part.

The movement is about 12 size; has 15 jewels; saphires or rubies being exclusively used. The mainspring is provided with the special Omega curb, ensuring a constant and uniform release of power. The train has epicycloidal gearing, following the accepted standard practice of the horological industry. For adjustment, a compensated bimetallic cut balance is provided, and this together with the Breguet hairspring which has an over-coil with the Phillips theoretical curve, assures an even rating in positions and temperatures.

The prices run from \$14.00 to \$25.00 depending on the quality of the case. We take an interest in showing our customers this new watch achievement.

New League Formed

As foretold in The Liberal last week a split has taken place in the Yonge St Ladies Softball league. Thornhill and Aurora have withdrawn and have joined with Lansing in the formation of a new group. It is understood that Maple, Elgin Mills and Newmarket will continue the league and either draw up a new schedule or carry out the one drawn up at the recent meeting at Thornhill.

Large Egg

If their is any glory in having your hens produce big hen fruit, the honors are all coming to Mr. Frank Steckley, of Whitechurch, who has a Rhode Island Red biddie which layed an egg weighing 5½ ounces, and measuring 9 inches one way by 8¾ the other.

A Hopeless Case

A cow belonging to H. Kirby at Balantrae when killed on Tuesday because it was suffering from indigestion which could not be relieved, revealed in the stomach a couple of long spikes and a piece of brass plate. With such hardware in the stomach there is no question but that the veterinary's diagnosis was absolutely correct.

Moirs are Not Moving

When it was learned some time ago that Moirs Limited, of Halifax were contemplating establishing a branch factory in Ontario the Richmond Hill Ratepayers Association immediately communicated with them and stressed the advantages of this municipality. Word has been received to day however that the firm have changed their plans and instead of establishing a branch factory have commenced to enlarge their present factory, at Halifax.

Some Length

As an evidence of the wonderful growth this season, Mr. Jas Smith of Mongolia plucked a red clover stalk from his field the other day measuring 5 feet, 4½ inches long.

Fall Wheat Cut

Crops in this district continue to give promise of a plenteous yield and the whole countryside is resplendent with the colors which herald the approaching harvest. Fall wheat cutting has already commenced, Mr. George Baker of the third concession of Vaughan having cut a fine crop on Wednesday of this week. As far as we have been able to learn this is the first harvest operations in this district.
