

## GR EATEST BUILDING IMPROVEMENT IN YEARS

There has been all kinds of improvements in the building line during the past number of years, but nothing to equal the new patented window just being put on the market by Superior Windows Ltd., of 178 Spadina Avenue, Toronto, who have the sole right to manufacture, sell or install a window which eliminates sash cords, weights, and cold, dusty casement windows.

The window frames and sash are of ordinary stock construction, eliminating the expensive box frame construction and adding the comfort and satisfaction of a window that is locked while open for ventilation. Both sashes can be tilted into the room, allowing anyone to wash the window from the inside, which is as safe and easy as the housewife can clean a table top.

The sashes are counter-balanced; being on two pulleys with aluminum chain, so arranged that you can tilt the bottom sash inwardly at different angles which allows indirect ventilation and is locked at the same time, thereby keeping the rain, snow or dust out of your rooms, which with the ordinary windows, has caused so much trouble by rains blowing in on the curtains and hardwood floor, and burglars getting in homes where the windows have been left open while away.

This picture shows the bottom sash tilted inwardly ready for cleaning, which can also be done with the top sash in the same manner by releasing the lock. This cannot be accomplished with any other windows "Made in Canada" to-day. Therefore, this is the only window that should be used in homes, offices, hotels, hospitals and schools etc. where people are "housed."

Another big feature the superior window has is its zinc aluminum weather stripping, which is grooved 1/4 inch into the sash and also grooved 1/4 inch into the jamb, which means that no matter how much your window swells or shrinks it always can be easily opened, and is absolutely weather proof. All the Hardware is made of zinc, aluminum and brass which will not rust, and is all exposed which allows you to make any adjustments without marring your woodwork.

This ventilating system is the only healthy system to-day and is endorsed by Health Officers and leading Architects.

Your old lip-windows can be changed to the "Superior Way," to operate the same as any new Superior Window. Superior Windows Ltd., will be pleased to show you how it is done, and also demonstrate the old window in their office which is equipped with Superior Hardware.

If you wish to see one of these windows operating, just telephone Toronto, Trinity 4402, or Maple Tele. 1964 and a representative will call on you and give you a demonstration.

An exhibition game of softball was played at Sunnyside on Monday evening between the Maple ladies team and the Nationals. The Maple team was in the lead until the last innings when the Nationals put on a new pitcher, and scored two runs and won the game.

## Ball—MacCallum

A quiet but pretty wedding was solemnized at the home of Mr. and Mrs. John MacCallum, Strange, Ont., when their only daughter Sylvia Mae, became the bride of Chas. A. Ball, only son of Mr. and Mrs. John Ball, of Maple. Rev. A. H. Halbert of King officiated. The bride who was unattended, entered the room on the arm of her father, to the strains of Lohengrin's wedding march played by Mrs. Halbert. The bride looked charming in a gown of powder blue georgette with blonde shoes and stockings, and carrying butterfly roses and baby breath, also wearing the groom's gift, a beautiful green gold wrist watch.

After the wedding dinner the happy couple left by motor for Windsor and other Western points, the bride travelling in a sand and blue brocade taffeta dress, blue coat with white fur trimming and hat to match. On their return they will reside in Maple.

## DISTRICT NEWS

The annual Lennox picnic was held at Jackson's Point on Monday and was attended by large crowds from all sections of North York and the city of Toronto. Aurora won out in the softball tournament and Thornhill won second prize. Speeches were delivered by prominent members of the Conservative party including Hon. Hugh Guthrie leader of the opposition at Ottawa.

A beautiful and impressive naval ceremony was held Monday night among the trees at Wilcox Lake, when the sea cadets of the Navy League of Canada, encamped in the grounds of Major Snively, held a drum-head service.

Saving her small son, but in so doing risking her own life, Mrs. George Thompson, aged 43 years, of Stouffville, received serious injuries on Sunday afternoon, when she was pinned between a telephone pole and a automobile at the intersection of Main St. and the tenth concession. Her left leg was fractured in two places, and yesterday she was removed to the Wellesley Hospital, where her condition is reported as "fair."

Among other things, happiness does not lend itself to mass production.

## Vaughan Twp. Council

A large deputation representing the residents of Oak Avenue and Edgar Avenue waited on the Vaughan Township Council at the regular session held in the Township Hall Vellore on Monday afternoon, and asked that their streets be improved the same as Garden and Spruce Avenue. The council took kindly to the suggestion and after looking over the ground have decided to go ahead with the work under the Local Improvement Act. The cost of all the improvements will be borne by the owners of the land abutting on the streets with the exception of the grading and the erection of all culverts which is taken care of by the Township of Vaughan.

On motion of Deputy reeve Farr and Councillor Baker a grant of \$100 was given to the Woodbridge Fair.

On motion of Deputy Reeve Farr and Councillor Johnson Constables Thos Rowntree and Samuel Ireland were appointed County Constables with power to enforce the Government Control Act in the Township.

A by-law was passed authorizing a levy for \$8000. to meet current expenditures, \$40,705. for county taxes in which is included \$6748.67 for special High School charges. A by-law was also passed to provide for a levy for \$600. for each school in the township and \$400. for each additional teacher engaged by the school section.

## DO CHICKENS THINK

Do chickens think? It is pretty hard to believe that they do sometimes. A young lady, who is a student at the Ohio State University, ran some test to see if she could gather some facts for her psychology class. She ran these tests on a rooster to see if habit entered into his eating or if he really knew what he wanted.

The rooster was kept in a small coop from which there was a narrow, wired runway, through which he had to pass to get his feed at the other end of this runway. At regular intervals along the floor of this runway were pieces of white cloth, each of the same width. On each piece of cloth were placed three grains of wheat; they were arranged in exactly the same order and had the same relative position on each piece of cloth. Two grains on each piece of cloth were fastened to the cloth by silk thread that matched the color the grain exactly; this was so cleverly done that a person could not tell which two were fastened. The third grain was loose. In all the series of grains it was not the grain having the same relative position that was loose; in other words it would be the middle grain in one case, the upper grain in another, and the lower grain in a third. These series were kept the same for a few days, then changed.

## MR. ROOSTER IS WISE

It was thought that the rooster would try all the grains in an endeavor to find the loose one. The young lady and other interested observers were surprised to find that he immediately picked up the loose grain in every case, as soon as he was released from his coop, and paid no attention to the ones that were sewed down to the cloth. This was kept up for a number of days until it was thought that it must be an established fact with the rooster that only one of these grains in each series was loose.

Then came the final examination. The grains were arranged in exactly the same position, but all grains were loose—none was sewed down. Would the rooster pick up only one in each group? If so, which one? Imagine the surprise of the observers when the old boy was released, for he proceeded right down the line and picked up every grain without hesitating!

Boleros and bolero effects are widely favored in summer fashions and can be carried out in summery colors in a variety of light weight, washable materials such as georgette, chiffon, crepe de chine or light cottons. One charming suggestion of this type is of beige chiffon with ecru Margot lace for afternoon wear or black Chantilly lace with black chiffon for evening. The wide lace appears around the bottom of the skirt and is puffed at the bottoms of the long sleeves.
