HOUSEHOLD HINTS

Moths, whether it is because they are lovers of good food or good music, are exceptionally fond of a piano. It is one of their favorite summer haunts and they wing their way in there remain until they are discovered and forcibly driven out.

Felt Padding Attracts Them

Especially attractive to these destructive pests is the instrument whose owner is vacationing afar. They fly straight to the felt padding beneath the strings and there set up their damage wreaking homes.

How To Drive Them Out

To spare one's self the expense of repair and the accompanying trouble the winged insects may cause, get several pieces of camphor gum and wrap them in small pieces of muslin and then place them inside the piano. Moths will seek other haunts.

It is also well to know that several sheets of newspaper thoroughly dried and placed in the case will keep the strings from rusting when the house is closed for a long period of time.

DO YOU KNOW

That taffetas should be rolled when put away for any length of time for folding will cause the material to crack.

That—

Colored material ought always to be soaked in cold water to determine if the color is fast before it is washed with even the mildest soap?

That—

Velvet will look fresh and new if it is wiped with a slightly damp cloth instead of being brushed?

That—

Steaming will usually take wrinkles out of clothes and freshen them?

That—

The easiest way to steam a garment is to hang it in the bathroom, turn on the hot water, close the windows and doors and allow it to remain as long as possible?

That—liquid glass will mend broken glassware, china and pottery so that the flaws are scarcely visible and the pieces can be handled as if they had never been cracked?

That—

One part oxalic acid to three parts water, poured through peach stains in linen and rinsed immediately with hot and then cold water, will remove the stains and if these directions are followed carefully—will not injure the fabric?

That—

Ostrich feather fans and trimmings ought to be sprayed and packed as carefully as furs because moths will often destroy the fragile feathers before tackling the more substantial things?

Introducing The New Vogue

Interior Color Harmonies that match the lovely effect of the Drawing Room

MCLAUGHLIN-BUICK for 1928 sets a new vogue in motor car design—

Rich fabrics, covering walls and ceilings, blend pleasantly with exterior finishes, forming a neutral background for matching or contrasting interior effects.

Form-fitting tailored seats are upholstered in attractive materials of the finest quality. Carpets of pleasing pattern add a touch of lively color. Even the interior ware is carefully selected for its decorative effect, that the complete ensemble may be in perfect taste.
