T.T.C. ORDER NEW CARS FOR RADIALS

Special Interurban Type Capable of Fifty Miles An Hour

According to latest reports the T.T.C. are going ahead rapidly with arrangements for changing the gauge of the radials and it is expected that work will be well under way by September 15. As was predicted new cars will put into operation which will be a big improvement over the ones now in use and the North Yonge Street district is promised a much improved service which will be a boon for this section of the county.

The new cars will be of special interurban type and will be capable of making about sixty miles per hour. Arrangements are being made to have the cars constructed in Canada with Canadian material.

"The new cars will be up-to-date in every detail, and the seats will follow the line of the T. T. C. coaches, which are recognized as the finest on the continent, making it much more comfortable for the long distance passengers," stated Mr. D. W. Harvey, general manager of the T.T.C. "They will have conveniences and smoking compartments.

"The running times will be cut, the maximum speed of the new cars being between fifty and sixty miles per hour. The present cars and equipment are altogether too cumbersome, and will not accelerate quickly. The new cars will be lighter, and will get away quickly. They will be a decided improvement from every standpoint."
