Who wouldn't be a small-town merchant?

Buying only small stocks enables the small-town merchant to try out the novelties and new styles people are looking for — on which the margin of profit is greater than on staple lines. Hand-to-mouth buying keeps down the capital investment, and additional quantities or odd sizes can always be ordered by Long Distance.

Thanks to this method of conducting business retailers have never been able to show as many up-to-date styles as now.

By using Long Distance the wide-awake small-town merchant with his low overhead expense can make his store the buying headquarters for a large surrounding territory.
