### WHITE COLLAR JOBS

Boys should be taught to think less of fitting themselves for "white collar" jobs, says Prof. F.G. Nichols of Harvard, who points out the greater opportunities for promotion in industry than in clerical pursuits.

The young man who starts at the bottom in a factory often soon distances one who begins, say, as a book-keeper. The idea is that while the clerk or bookkeeper may have a white collar job from the very first, the ambitious and intelligent industrial worker has a better chance to rise to an executive position, so that when he does reach the white collar job it means something worth while.

Advice along a similar line is given by President Thatcher of the Massachusetts Agricultural College, who defends vocational schools against the reproach sometimes leveled against them "the idea is erroneous that vocational schools are undignified because they work with a knowledge of things that are ancient and far off."

Literally, however, the proportion of white collar jobs is constantly increasing. With the continual advent of new machines for doing the "dirty work" of the world, the time may come when everyone may have a white collar job.
