HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

SCARLET FEVER ANTITOXIN

During the past few years there was discovered a scarlet fever antitoxin which gives the same satisfactory results in the treatment of scarlet fever as have been secured in the treatment of diphtheria with diphtheria antitoxin.

Scarlet fever is caused by a certain disease germ which gives off a poison or toxin. It is this toxin which, in some cases, kills, and which in all cases does more or less damage to the various organs of the body.

The scarlet fever antitoxin counteracts the toxin. Given early and in sufficient quantity it not only cures but prevents the damage which may be so serious.

Those who are responsible for the care of children should appreciate that the life of the child, when attacked by sickness, may depend upon prompt treatment. Certainly, in two

diseases, scarlet fever and diphtheria, every hour's delay endangers the life of the child.

In Canada there were 362 deaths from scarlet fever during 1926. This loss of human life is, of course, serious. In addition, there is a much larger number who recovered, some of whom are more less permanently damaged.

Scarlet fever antitoxin, like diphtheria antitoxin, should be made freely and readily available throughout Canada for the saving and conserving of human life.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

Correct this sentence: "When I tell the kid he can't go," said the proud father, "he never asks why."

NOTICE

Spring prices are in effect now. Mine prices advance soon. Our coal is the best mined in America. Well sized and properly screened.

The Greatest Value of the year.

Because—Spring prices are the lowest. Unfrozen coal screens cleanest. The best coal available. No delayed snow bound deliveries.

Today

NASH presents a New and Finer Motor Car

**New Twin Ignition Motor
New Salon Bodies**

"The three new Nash Series, which are being introduced everywhere today, achieve the ambition of my manufacturing career.

"They represent an entirely new type of motor car, priced moderately, but offering you all the beauty and quality and performance heretofore exclusive to very expensive automobiles.

"To create such a car we had to develop an entirely new type of design and invest over \$2,500,000 in dies and machinery alone.

"Both the Salon bodies and the high compression motors which power these new models exemplify the most radically modern advancement in body craftsmanship and engineering.

"Naturally space precludes the full listing of all features but I do want to draw your attention to a number of the outstanding attractions such as:—

"—Twin ignition, high compression, Bohnalite aluminum alloy pistons

with Invar-struts, 7-bearing crankshaft with hollowed crankpins, Bijur centralized chassis lubrication, Houdaille and Lovejoy shock absorbers, Biflex-Nash bumpers and bumperettes, chrome plating over nickel for all exterior metal ware, double-drop frame, one-piece Salon fenders and longer wheelbase lengths.

"This new-type engineering of the '400' motors makes them by far the best performing cars I have ever built.

"I don't think anyone will ever want to use all the speed and power they deliver.

"Equipment is absolutely complete at the factory list price and you need buy no extras except a spare tire.

"If my judgment is worth anything you will find it well worth while today to examine this new automobile development with the greatest care."
