FIRESTONE WICK TEST

The jar at left is filled with Gum-Dipping solution. The other jar is empty at first. One end of the wick—made of cords used in Firestone tires—is placed in the solution, the other in the empty jar. Solution penetrates entire length of the cord wick showing that Gum-Dipping saturates the cords.

This exclusive Firestone process insulates every fibre with rubber, reduces internal friction and gives thousands of extra miles. Firestone tires cost no more than ordinary tires. Your local Firestone Dealer will gladly serve you, and save you money.
