**THE WORLD HAS A NEW AND FINER MOTOR CAR**

**"Welcome!" That's what the World has said to the Twin-Ignition Motor**

FROM the very day of the introduction of the new Nash "400", keen public interest has surrounded the new Twin-Ignition motor—

People everywhere are telling other people that they've never driven a car with so much sparkle and enthusiasm in its action—

—Or one that is as smooth and quiet as very speed, clear up to the top—

—Or one that needs so little gasoline.

Twin ignition, with high compression in the valve-in-head motor means more power, more snap, more speed,

using ordinary gasoline, and less of it.

Before you buy your new car, come in. We'll give you the key to a Twin-Ignition-Motored "400". You take it out, and take a ride. *That's all we ask!*

\*In the first three months following the "400" introduction "400" sales were nearly 75,000 cars, 14,000 more than the total of the best previous July, the best previous August and the best previous September in all Nash history.
