Save yourself at our expense

Don't try to do the heavy parts of the family wash. Let us help you. This new plant was designed and equipped for that very purpose and can give you as much or little help as you desire by means of five different kinds of laundry service—all moderately priced. We use only soft water and pure soaps, etc. No marking, no starching, and each wash done separately.

We Call In Richmond Hill District
TUESDAYS and FRIDAYS

If you will have laundry ready when driver calls, you will assist us in giving good service. If you only have driver call when phoned for, Call up as early as convenient to insure prompt attention.
Phone Orders for Our Driver, Parcels may be left at Liberal Office, Telephone 9, Richmond Hill

LETTERS FROM THE PEOPLE

WISE AND OTHERWISE

Edgeley, Ontario
March 5th, 1929

Editor Liberal,
Sir:—
In your issue of February 21st I wrote an article pertaining to the operation and management of township affairs and also stating my views with due courtesy to the men who represent us in council.

Now Mr. Editor, personal sarcasm was no answer to my letter and it is quite evident that the sentiment of nonsense and foolishness was the objective in the so-called reply in which ordinary intelligence was quite remote. Furthermore I will not enter into any controversy in the Press to be side-tracked with frivolity. So if there are any more wise-cracks to explode put them in the waste-paper basket where they belong with the accumulation of rubbish.

In answer to the question concerning Scriptural records I would say, having some knowledge of the wisdom of the east (and of the west) I would sound the ancient warning "Remember Haman was hanged on the gallows prepared for Mordecai".

Thanking you for the space in your paper.

THOS. A. KEFFER

COMMENDS COMMUNITY SPIRIT IDEA

Hamilton, Ontario
March 5th, 1929

Editor "The Liberal,"
Richmond Hill, Ont.
Sir:—

The writer was interested in going over your issue of February 28th to notice the editorial "Community Spirit" what counts."

With the changing conditions in marketing caused by rural mail delivery, rural telephones, good roads, extensive advertising by larger stores, it is extremely important that each of our smaller communities develop a real community spirit.

It has well been said "We get our

business from our friends, not from our enemies; therefore, we should have all the friends we can and as few enemies as possible.

I sincerely trust that the people in your town will appreciate the need of working in harmony and develop a strong community spirit. With this, any town can be a real success.

Yours very truly

WOULD AWARD LAST WEEK'S LETTER PRIZE FOR WORST SUGGESTION

March 5th, 1929

Editor Liberal,
Sir:—

There is much said, thought and done in the name of "economy" but your last issue contained a letter over the signature of A Subscriber which in my estimation won the prize for the worst suggestion of the year as to how to reduce our taxes.

I hope none of the council or rate-payers took the suggestion seriously and therefore will not dwell on the many reasons why the town should not take any such action. The town had an opportunity to take over the Old High School which in many ways admirably lends itself to transformation into a Municipal Hall. This could have been accomplished without any immediate expenditure and should certainly be a much better "economy" proposition than the one suggested last week by your correspondent.

I would like to hear what A Subscriber thinks of the Old High School proposition as compared to his suggestion. Thanking you Mr. Editor and hoping these few lines will not be consigned to the W.P.B. As one of your subscribers I wish to thank you for the opportunity given to express opinions through your "letters from the people" column. I enjoy the letters very much. All are very interesting and some are enlightening. Again thanking you,

CIVIS.

New Pontiac Big Six Many Fine New Features

Power, performance and luxury previously obtainable only in the big car field distinguish the new Pontiac "Big Six," latest product of General Motors of Canada, which has just been put on display in the showrooms of S. A. Barraclough.

An inspection of this new car reveals that to the many features of sound basic design which in three years have brought the Pontiac swiftly to leadership among the sixes, the designers have added an impressive array of big car specifications which seem to graduate this car above the small car field in everything but price.

In view of the interest aroused by the "Big Six" at the national motor shows in Toronto and Montreal, its appearance here has been eagerly anticipated, and the local dealers are featuring the first showing as an event of more than ordinary interest. Explaining the reason for his enthusiasm, Mr. Barraclough asserted that the new Pontiac line provides not only new body lines that instantly catch the eye, but a chassis and engine almost entirely new.

The engine, accordingly to his authority, is more powerful than a year ago, with 200 inches of cylinder displacement and developing fifty-seven horsepower. Refinements include a harmonic balancer and counter-balanced crankshaft; larger valves, manifold and carburetor; sturdier rear axle redesigned transmission assembly and new Hotchkiss drive with two universal joints.

Paralleling the new performance of the power plant are beautiful new longer and wider Fisher bodies. Overall length has been increased to 167 inches. On the hood a smart new louvre grouping sets the car instantly apart in traffic. In manner unlike the conventional the louvres all are grouped in one panel, and extend horizontally across the bonnet.

The Fisher closed bodies, all have adjustable driver's seats, smart new sun visors of all-metal construction, tilting beam headlights operated by foot control, ebony finish instrument panel with individual mounting and illumination by two shielded bulbs, smart elliptical windows in rear, slender ebony finish steering wheel and deep luxurious upholstery in solid colors harmonizing with the new and beautiful exterior Ducco combinations.

Smart low wheels of the heavy artillery ten-spoke type, with large hub caps and flanges, take 29 x 5 non-skid cord tires. The smaller wheels, however, do not affect road clearance, which is simple at 8 1/2 inches. Special equipment, consisting of six wire or demountable wood wheels and tires,

with spares carried in front fender wells, is available at extra cost.

Safety is assured by the new dirt-and-water-proof four-wheel brakes, of the internal expanding type, with a useful parking brake on the main driveshaft. Riding ease comes from luxurious upholstery, improved springs and lovejoy hydraulic shock absorbers on all four wheels.

Seven models comprising the line are a four-door sedan, two-door sedan, sport roadster with folding rumble seat, sport phaeton, coupe, and two new types—a custom like landaulet sedan with a folding top over the rear quarter section for all weather driving, and a convertible cabriolet with rumble seat.

Features characteristic of the entire line include larger head-lamps of modified bullet type design with chrome-plated door and narrow rims, running boards bound with polished aluminum moulding, hood catches cadmium plated, new tire carrier supported on sturdy brackets, VV windshield on closed body types, rear view mirror, automatic windshield cleaner, new approved combination stop and tail light, larger motor driven horn and theft-proof door locks.
