### HEADFORD

The anniversary services on Sunday last were a splendid success in every way. Dr. A. P. Brace, of Toronto, was the preacher for the day. Large congregations were on hand to have this opportunity to hear Dr. Brace again and they were not disappointed with the inspiring messages he brought. At the morning service the choir was composed of children and young people, Mr. R. Phipps, of Richmond Hill, assisted and sang in splendid voice, two solos, "The Lord is My Shepherd" and "Like as a Father Pit, ieth His Children," which were much enjoyed by all. In the evening Carrville choir provided the musical programme and three anthems were splendidly rendered.

On Saturday last the annual Sunday School picnic was held at Musselman's Lake. The weather was ideal and over a hundred were present. The afternoon was spent in various kinds of races, horseshoe pitching and softball. All reported a good time.

We are glad to see Miss S. L. Mapes back again to our community after spending the winter months in Toronto.

Mr. Harland Hague, of Toronto, visited at the home of Mr. and Mrs. Charles Horner this week and also called on other friends in the vicinity. He returned to Canada a few months ago after spending the past six years in South Africa.

Mrs. John French, of Newmarket, is visiting her daughter Mrs. Fred Lee. A number of men are busy applying a coat of gravel to our main street. This work will be greatly appreciated by motorists.

### FORD CAR HOUDAILLE HYDRAULIC SHOCK ABSORBERS

### Positive—Smooth— Double Acting—

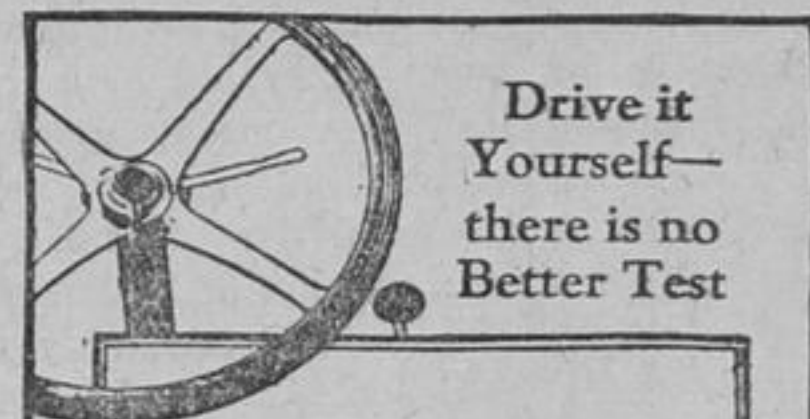

**H**OUDAILLE Hydraulic Shock Absorbers, four to every Ford car, are entirely defensive in their action since they remain inactive and in neutral position on smooth roads. Let a wheel encounter the slightest depression or bump, however, and they respond with the velvet precision of a cat's paw.

Houdaille Shock Absorbers were not adapted to the Ford car after it was built, but were part of the specifications laid down by the Ford engineers as they planned the car. Therefore, Houdailles, their powerful operation coordinated, became integral parts of the complete chassis. It is for this reason that they function with such perfect efficiency on the Ford car.

Houdailles absorb both the upward and downward thrust of the shock through slowing the spring action by means of a heavy glycerine solution, which is forced through a small valve from one compartment to another. They check the rebound of the car softly, exert no tension on the springs and are always ready to offer resistance to the blow when and as required. In fact, the more severe the shock, the more effectively Houdailles operate.

Different from any other shock absorber, the Houdaille connecting link between the frame and the axle of the car is a steel arm, not just a fabric strip to wear out and be replaced. Adjustable to suit differing road conditions and various loads, the Houdaille is more than a shock absorber and more than a snubber.

Inspect the Ford car carefully part by part. Then know the thrill of driving it. By its performance you will realize the easy riding comfort of an Houdaille equipped Ford.
