FEEDING for TOMORROW

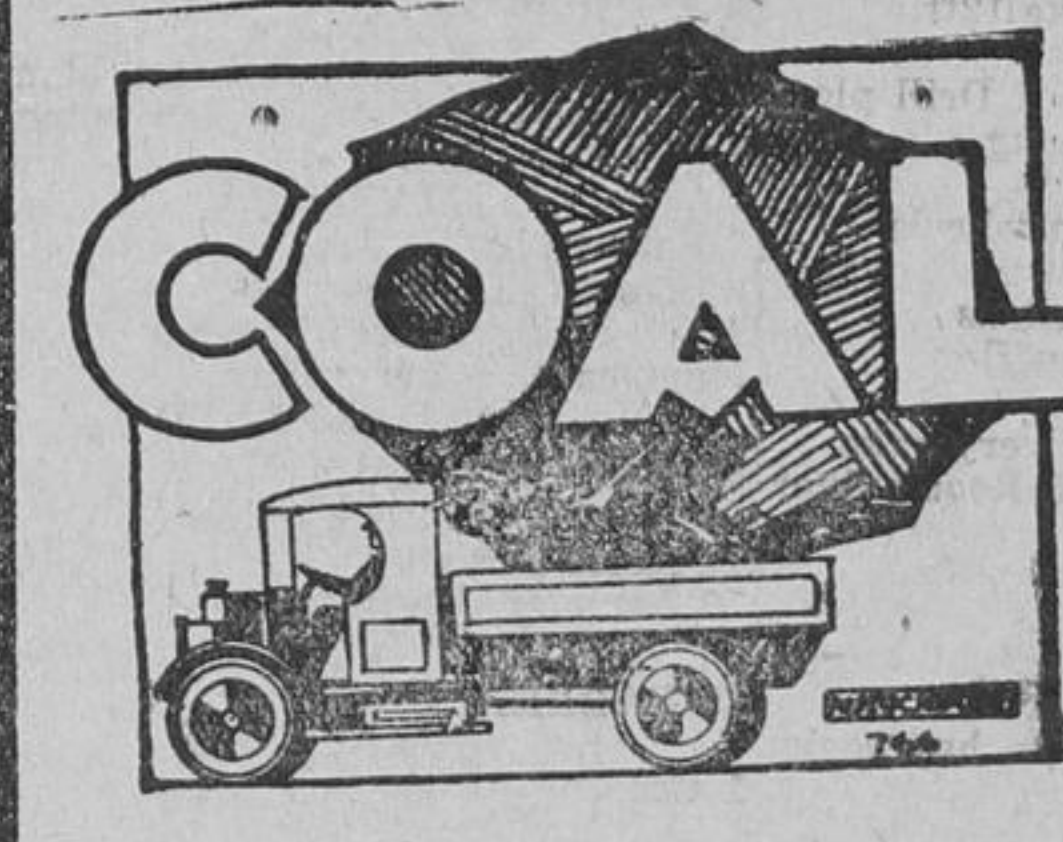

Whatever action you take to-day, is reflected in the results you get to-morrow—whether it be your GROWING PULLETS, Your BROOD SOWS—or your DAIRY COWS.
In feeding your stock on Marmill Balanced Rations you can with confidence look forward to satisfactory results in the future.

MARMILL SWEET "15" DAIRY FEED—A balanced dairy feed supplying necessary Protein, Carbohydrates, Minerals, etc., for feeding on grass—it will increase milk production now—as well as keeping cows in proper condition to hold up on flow of milk later in season when pasture is short and flies are bad. Marmill Fed cows will produce better calves, and more milk during next lactation period—by building up the system for the work it will have to do.
MARMILL HOG GROWER fed to sows previous to breeding, and during the gestation period will produce larger litters and more thrifty pigs. The pregnant sow requires as careful balanced diet to grow the unborn pig as she does to supply milk for nourishment after farrowing.

MARMILL GROWING MASH is essential for giving pullets the growth and development required to withstand heavy egg production next fall and winter. FIVE DOLLARS spent for feed on the growing pullet will do more than TEN DOLLARS spent on Laying Mash next winter, in bringing the backward pullet into profitable production.
