HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

SUMMER CARE OF THE BABY

The infant is dependent upon others for care. Whether or not the hot weather makes baby uncomfortable depends upon the attention he receives. The baby may show his discomfort by crying, but he cannot beg for a drink or a bath, or ask to be left alone and not handled. He cannot say that he has too many clothes on and that he would be more comfortable if he could get them off.

In order to keep the baby comfortable, we must consider his hot weather needs.

Not so many years ago, summer diarrhoea, or summer complaint, as it was known, used to take a toll of infant lives that rose as high as one life in every three. This was because mothers had not been taught how to care for their babies, and because milk supplies were not protected by inspection and pasteurization.

Those who talk of the "good old days," who laugh at the idea that women need to be taught how to care for their babies, and who do not see why milk should be pasteurized, might well compare conditions in the past with those now prevailing in places where, through the teaching of mothers by public health nurses and the safeguarding of milk supplies, summer

diarrhoea, among infants have been almost eliminated.

Keep the baby as cool as possible. It is not too much to give him a bath morning and evening, and a sponge in the middle of the day during the very hot weather.

A sleeveless shirt and a diaper are sufficient clothing for hot days. Clothing can be added from day to day and from day to night as the temperature varies.

Change the diaper as often as it is wet. If the skin is chafed, apply a little vaseline or olive oil.

In hot weather, the baby prespires like everyone else, and he naturally becomes thirsty and wants water. Water is an essential part of the baby's diet. Between feedings, unsweetened water should be offered to him. The baby will take a considerable amount of water when he is thirsty.

The child should be kept out of the sun, in the coolest shade available, during the heat of the day. Protect him from flies, insects and other pests because they carry disease germs.

If, in spite of all care, diarrhoea does develop, stop all feedings, give as much unsweetened water as the baby will take and consult your doctor at once. Prompt proper treatment should be secured at the earliest possible moment.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

MAPLE

At the social held by the Owaissa Group of the C.G.I.T. of the United Church last week over \$20 was realized.

The ladies of the three congregations of this circuit were invited to a social afternoon in the school room of the United Church on Wednesday of last week. None of the members from Hope and very few from Maple were able to attend. A splendid programme was given by the Edgeley ladies, after which Mrs. A. S. Kerr served afternoon tea.

The funeral of the late Aaron Fenwick took place on Monday to the Mennonite cemetery at Edgeley and was largely attended by friends and relatives.

About thirty ladies were present at the annual quilting meeting of St. Andrew's W.M.S. which was held in the school room of the church on Wednesday, June 4th. Dinner and tea was served and thirteen quilts were completed.

The President and several members of St. Andrew's W.M.S. attended the sessional meeting which was held at Nashville last Friday.

Mr. S. McClinton, of Creemore, spent the week-end at the home of Mr. H. C. Bailey.

Mr. and Mrs. D. F. Brown and Miss Dorothy Brown, of McKeesport, Pa., motored over and are spending a few days with Mr. and Mrs. H. C. Bailey.

There were four candidates writing on the Associates' Banking Course examination, on Monday evening. The examination continues every evening this week.

Mr. and Mrs. C. W. Manning and Mr. and Mrs. S. Martin, of Hamilton, spent Sunday with Mr. and Mrs. J. Manning.

Mrs. Crocker and Miss Margaret Crocker, of Toronto, spent Sunday at the home of Mrs. I. Watson.

Mrs. I. Watson has gone to Thorold, to visit her sister Mrs. A. Clarke who is ill.

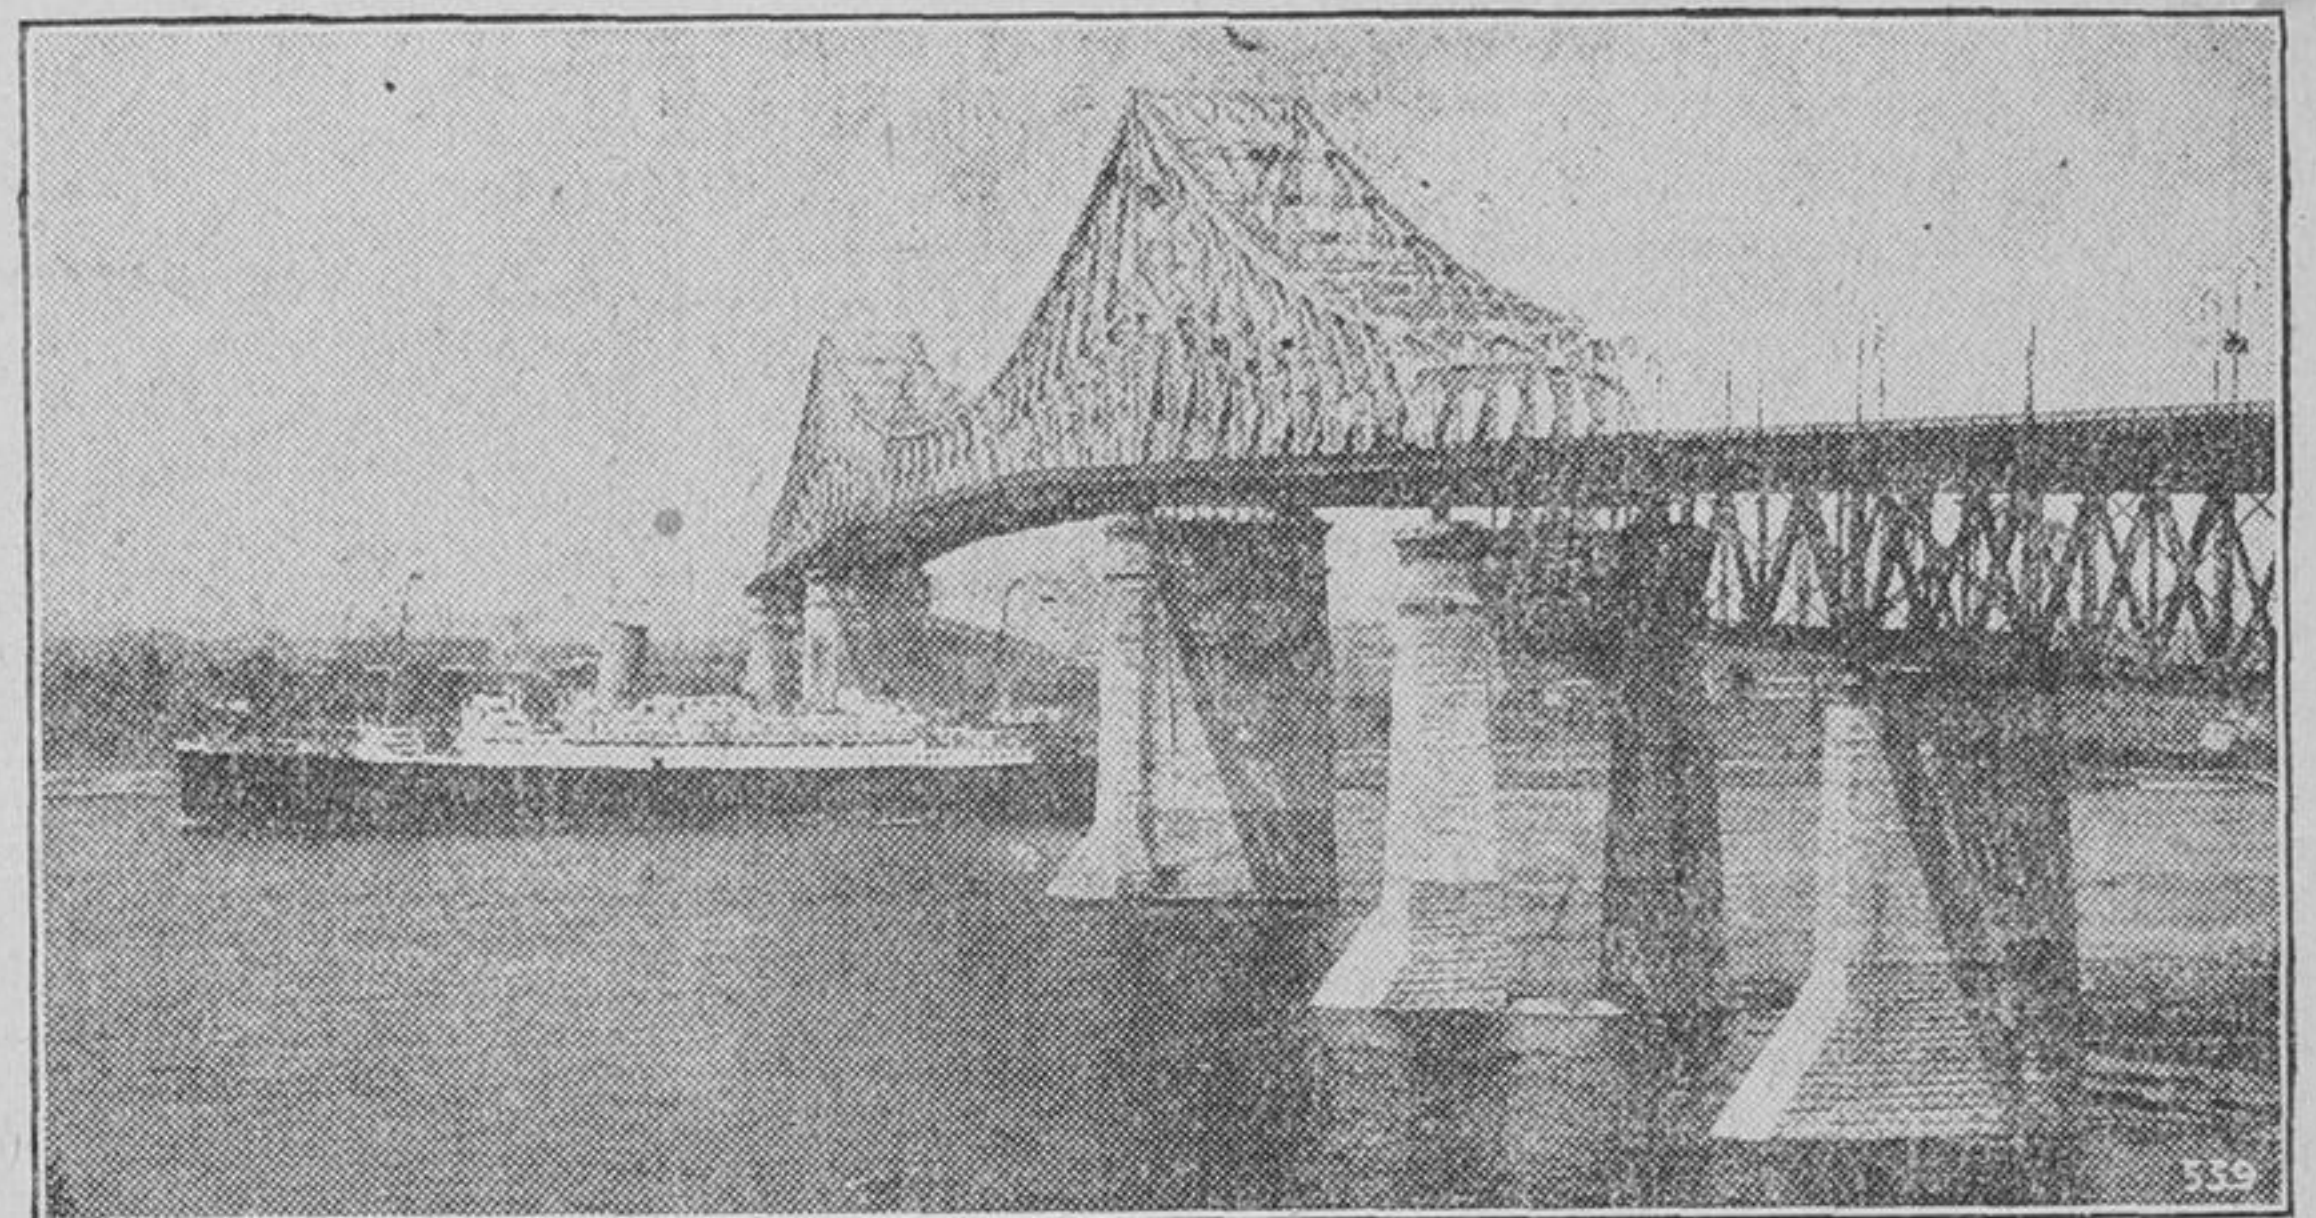

Here and There

(533)

"I think that the increase in unemployment has stopped in the United States and that by the time the Fall comes around, things will be much better," declared Professor Leo Wolman, of Boston, interviewed aboard S.S. Empress of Australia, on his way to the International Wage Conference at Geneva. "The worst has passed," he added, "and things are looking brighter again."

Canada's new championship golf course, the Royal York of Toronto, was opened officially May 19, in the presence of a distinguished gathering of golfers and Canadian Pacific and civic officials. George S. Lyon, Grand Old Man of Canadian golf, drove the first ball, and later in the day, the clubhouse was honored by the inspection visit of Their Excellencies, Lord and Lady Willingdon. The course is in connection with the Royal York Hotel and will be at the disposal of guests.

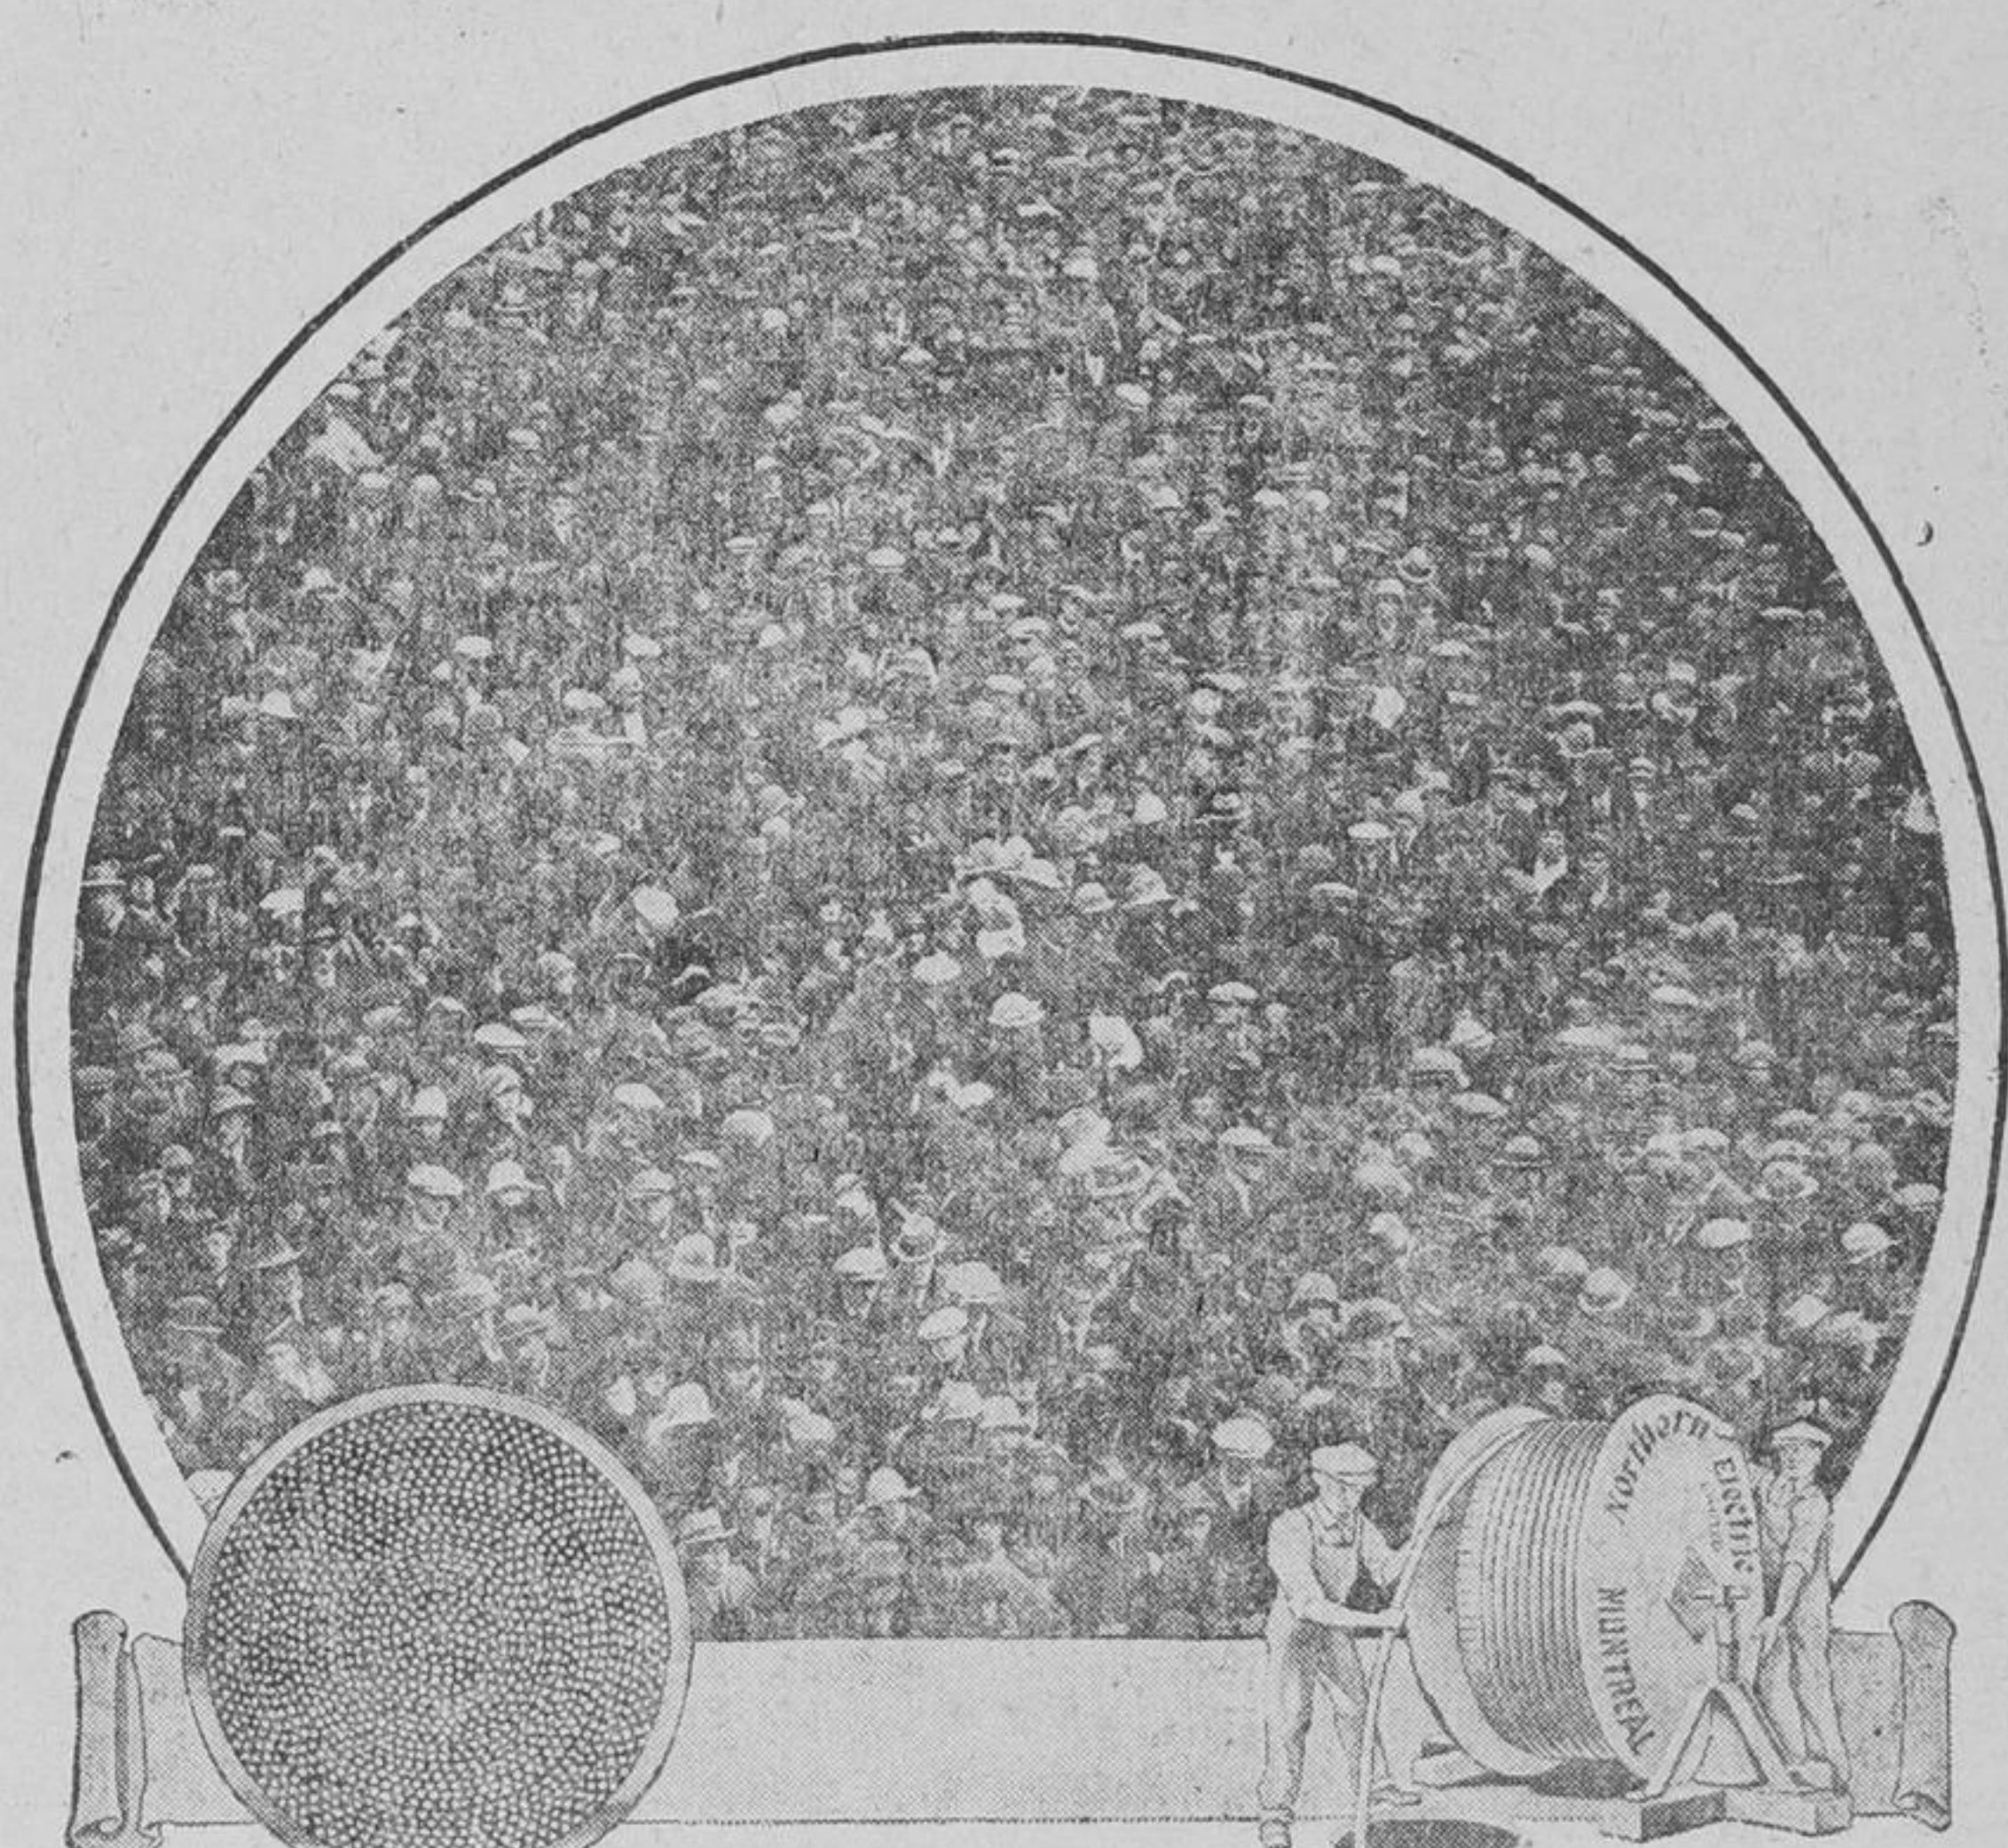

"Duchess" Salutes Bridge

There was a happy incident at the opening of the \$20,000,000 Montreal Harbor Bridge on Victoria Day when the Canadian Pacific liner "Duchess of Richmond," 20,000-ton giant under the command of Captain A. Freer, R.N.R., added the salute of its deep siren to the cheers of the thousands assembled. Just as Premier Mackenzie King was formally opening the bridge, the liner passed dramatically

beneath it with multi-colored flags fluttering from bow to stern and her ensign dipping in the salute. Then she hailed the bridge with the stentorian "long, two short and long" blasts that herald arrival of Canadian Pacific ships. It is interesting to note that what is seen of the bridge contains the same weight of steel—20,000 tons—as there is in the ship.

2,400 People Converse With Ease Through a Small Lead Tube

Imagine the roar of 2,400 voices confined within the walls of one huge room!

What a babel of confusion if the people in that room should try to shout messages to each other! Yet, through a lead tube, only 2 1/4 inches in diameter, 2,400 people may converse at the same time with ease, without confusion and in strict privacy.

This lead tube (illustrated in section above) is the casing of a telephone cable manufactured in the Montreal plant of the Northern Electric Company, containing over 1,200 pairs of insulated wires, each pair connecting at one end with a telephone instrument and at the other a central exchange. In the large Canadian cities there are scores of such telephone cables.

A BARRIER TO FIRE, STORM AND WEATHER

RIB-ROLL

WARRANTED
COUNCIL STANDARD
EXTRA HEAVY COATING

Crops, property and livestock destroyed by fire and lightning last year amounted to more than \$2,000,000 in Ontario. That's one of the reasons so many farmers are now using RIB-ROLL—the original new-style roofing. It defies

fire, eliminates up-keep, increases property values and lasts a lifetime. Protected against lightning when properly grounded and equipped with Preston Pointed Ventilators—as required by the Lightning Rod Act. Each sheet has seven ribs—a nail every five inches. It is wonderfully easy and inexpensive to lay. Made of the famous "Council Standard" quality. Under the most severe weather conditions RIB-ROLL keeps every building on the farm safe and secure.

Use Rib-Roll Roofing and Preston Led-Hed Nails

RIB-ROLL and PRESTON LED-HED nails form an unbreakable roofing combination. The nails are scientifically designed to use with metal roofing. No punching or threading required. Remarkably easy and speedy to use. The lead on the head completely seals the nail hole—making it rust-proof, weather-proof and water-proof. Write for free sample of RIB-ROLL and PRESTON LED-HED NAILS.

Preston Steel Truss Barns

No barn made equals the strength and fire resisting qualities of the PRESTON STEEL TRUSS BARN. Built with rugged Steel Trusses. Braced against wind pressure from every angle. No cumbersome cross-beams. Well ventilated, well lighted. More than 1,000 in Ontario—not one lost through lightning. We use your timbers and make liberal allowances for them.

Preston Barn Ventilators

Abolish danger of spontaneous combustion. Use Preston ventilators for roof, side wall adjustable windows and wide doors. They draw out the warm, moist air and ensure proper ventilation.

FREE BOOK

"The Preston Book About Barns" is worth money to you. Gives a world of information about modern barn building. Write for it.
