

**Gyproc Makes Summer Homes FIRE-SAFE!**

PROTECT your family by making your Summer home draught-proof, dust-proof and fire-safe. The new Ivory coloured Gyproc, that does not burn will render you this service at small cost.

Use it for structurally strong walls, ceilings and partitions. It needs no decoration (when panelled) but you can tint, paper or plaster it if you wish. It is easily and quickly applied, is a permanent asset, and is vastly superior to other building materials.

Your dealer's name is listed below. Ask him today for full information on Gyproc Wallboard or send for interesting free book "Building and Remodelling with Gyproc."

**NEWS AND INFORMATION FOR THE BUSY FARMER**

**Testing Fertilizers**  
A new method of bringing the Ontario Agricultural College into contact with farmers is the practice of holding evening meetings on field demonstrations with fertilizers. These demonstrations, of which several hundred were laid out on a variety of crops throughout the province, consist of plots of half-acre or acre size, on which different combinations of fertilizing elements are compared with unfertilized plots and with one another under practical farming conditions. This work has been made possible by co-operation of the college, county representatives, farmer demonstrators and fertilizer interests.

So far this season ten field meetings have been held in Kent, Essex, Elgin, Middlesex, Welland, Oxford, Waterloo and Wellington. Further meetings are planned as the later crops reach maturity. At each meeting the crops are inspected and a general discussion opened on the subject of fertilizers, led by soil fertility experts from the O.A.C.

**Reduction in Alsike**  
A considerable reduction in the seed crop of alsike and red clover is officially forecast for 1930. Ontario is expected to produce not more than 70,000 bushels of alsike or about one-third of the 1929 production. An increased acreage of alfalfa is being held for seed in Ontario. There was practically no carry-over of alfalfa seed and owing to the extent to which this year's crop was winter killed it is expected there will be a good demand for alfalfa seed during the coming season.

R. H. Clemons, agricultural representative in North Wellington, estimates that West Luther Township alone will have about 4,000 acres of summer fallow. "Nothing has improved our crop yield so much and reduced our weeds more than July plowing," he declares. "Some have found however, that when a great deal of work is put on a clay field, it runs badly in the spring and becomes wet and soggy, remaining so until it becomes hard on top and produces a later crop than one would expect. This may be overcome to a great extent by duck footing in the fall with a cultivator and some farmers are planning on ridging with a plow. Ridging summer fallows with a plow is highly recommended in clay areas."

**It Takes Brains**  
"It takes more brains to be a farmer than to be a high court judge," asserted J. Lockie Wilson at a recent gathering of provincial fair judges. "There never was a greater need for co-operation between the scientist and the farmer than to-day. The most scientific business at the present time is farming," he added.

**Dairying in the North**  
In 1917, the Ontario Government demonstrated its interest in the dairy industry of the North Country by establishing a creamery at New Liscard. This creamery was opened in March of that year and until the end of December of the same year, drawing cream from as far north as Cochrane and east and west on the Transcontinental, manufactured 40,000 pounds of butter. This was the only creamery along the T. & N. O. at that time, but since then, four other creameries have been located in the District of Temiskaming and more in the district of Cochrane. Last year, namely, 1929, the butter output of the districts of Temiskaming and Cochrane, was well over one million pounds. This is concrete evidence of the progress the dairy industry has made in this part of Northern Ontario. This year all creameries report increased production over last year.

**Junior Fair Brings Results**  
The Barrie Junior Fair of 1929 was one of the outstanding features of the Barrie Fall Fair. With 50 Junior exhibitors with 227 entries, including live stock, poultry, field crops of various kinds, a very creditable showing prize list and the addition of a Junior Girl's Section, it is expected that the Fair will reach 150 to 250 Juniors as exhibitors. From the present prospects it is expected that there will be over 80 entries of live stock alone, to accommodate which the Barrie Kiwanis Club is building a modern live stock building 135 feet in length by 25 feet in width. The competition will also be heavy in poultry, potatoes and crop products, while a special feature of the indoor exhibit will be 70 displays of home Garden produce.

The Junior Fair is demonstrating more forcibly each year its value as an encouraging factor in Agricultural improvement. It is not to be confused with School Fairs but is rather a connecting link between School Fair and Fall Fair, appealing chiefly to those between 14 and 20 years. Already numerous incidents have been observed of the purchase of purebred stock and registered seed grain and potatoes, and other evidences of increased interest and enthusiasm in farming by the young people as a direct result of the Junior Fair.

**Oak Ridges**  
Oak Ridges and District are still suffering from lack of rain. Late potatoes and root crops are likely to be a failure, and wells are beginning to feel the effects of the continued drought. Though rain has fallen all around, Oak Ridges still remains dry.

We regret to announce the death of Mrs. Skinner of Bond Lake. Mrs. Skinner who was apparently in good health, had crossed the road to visit a neighbour when she was taken suddenly ill and died before the doctor could be called.

Mrs. J. Hiltz and family who have lived in this Village for some time, have returned to their house in Richmond Hill. Mr. Hiltz still carries on his garage business in Oak Ridges.

Mr. Wilson, who teaches school here has left for the North country for his vacation.

Service will be held at 1 p.m. on Sunday next, August 23rd at St. John's Mission Hall, Oak Ridges.

Miss Marion Griffith of Toronto, is spending a few days at the home of Miss Grace Hampton.

Miss Dorothy Legge left on Thursday for Big Chief Lodge, Orillia, for two weeks' vacation.

Mr. William Hodgins and family have left their house and are now living in the home of their father, Mr. J. Hodgins.

Mr. and Mrs. Hann, of Toronto spent the week-end with their parents, Mr. and Mrs. Elford to celebrate Mrs. Elford's birthday which was on Sunday last.

Mr. Browning of Toronto has purchased land at Oak Ridge Acres and will commence building operations immediately. In the meantime he and his family will live in one of Mr. Gardner's houses on the west side of Yonge Street.

Mr. Lloyd of Aurora has moved to Oak Ridges to live, and has taken Mr. Thomas Monkman's house next to the schoolhouse.

A very successful Masquerade Dance was held on Saturday last, at the Pavilion of Percy Ash, Wilcox Lake. Costumes were very good and over thirty dollars was given in prizes. A large crowd was in attendance.

**Roup, Coccidiosis, Canker, Chicken-Pox, Cholera, White Diarrhea**

Those Diseases are Contagious  
**Peerless Poultry Prescription**  
—In Liquid Form—  
**Kills Germs - Makes Hens Pay**

Thousands of hens are lost annually through contraction of disease. One sick bird drinking at the water fountain can poison the entire flock before you discover the ailment. Peerless Poultry Prescription used in the drinking water daily kills the germs and prevents the further spreading of disease.

PEERLESS POULTRY PRESCRIPTION is a remedy for the entire poultry family and will save you lots of dollars. Every bottle guaranteed.

**To the householders**

Consumers and Retailers have bought less coal from April 1st to date of this year than ever before.

Production April 1st to July 5th, 1929	14,100,000 tons
Production April 1st to July 5th, 1930	13,200,000 tons
Decrease	900,000 tons
Producers Storage, July 1st, 1929	3,120,000 tons
Producers Storage, July 1st, 1930	2,165,000 tons
Decrease	955,000 tons

There will consequently be a greater demand for coal with the advent of the first cold weather and with so much less coal in consumers' cellars, dealers' bins and producers' storages, the rush for deliveries both wholesale and retail is bound to be greater than ever before. Buy your coal now and save money as it cost the dealer 55c per ton more September 1st. This requires the most careful thought for the consumer.

**Attractively Different**

GENERALLY speaking, a business man is averse to having his stationery changed from the accepted form. For ten, twenty, or more years it has conformed to a rigid standard, and usually, he feels it should be kept so.

But consider this: If the business itself was conducted on a basis of 1910 merchandising policies would the customers of 1930 patronize that business?

Business stationery and printed forms are an integral part of every going concern. When a customer or business associate reads a message or invoice from an indifferently printed or constructed piece of stationery the impression is not good.

Next time you require printing think over it a while. It's worth a lot of thought. If suggestive advice or co-operation from your printer will help, call 9. We'll be glad to assist. And we produce Good Printing.
