HIGHWAYS DEPARTMENT —  
BROOKSIDE ROAD AND  
MAY AVENUE WILL  
BE GRAVELLED

A petition for an improved gravel roadway was received from residents of May Avenue. It was sufficiently signed and the council will proceed with the work as soon as possible.

A communication was received from the East Vaughan Ratepayers Association urging that the council take action to have sidewalks constructed on Yonge Street. Elsewhere in this issue is the local improvement notice for the graveling of the balance of Brookside Road which will be gone ahead with as quickly as possible.

Following the council meeting the members inspected the progress of the work at Patterson on the Maple sideroad where the large culvert was recently installed. The hill has been cut down and a fill made at the culvert at an expense of \$898.50. The work was done by contract. ### MARKHAM TOWNSHIP RECEIVED PREVIOUS ACCOUNTS FOR WATER SAYS CHAIR- MAN OF COMMISSION

Councillor Albert Chapman, chairman of the Richmond Hill Waterworks Commission interviewed regarding the account for \$454.65 rendered to Markham Township and which was questioned by the council of that municipality at the Tuesday meeting stated that the bill was quite in order. "The matter has often been brought up in council and I understand that Markham had been told of the condition and had been billed before but we got no results. If we hadn't heard from them soon I intended to move to have the water shut off" he said. Other town officials verified the statement of councillor Chapman that Markham had received previous accounts, Councillor Chapman said that as soon as he was asked by engineer Babcock to have Richmond Hill workmen repair the main he consented and the work was done promptly.

The account in question is for water used by Markham township residents in the Elmwood Park sub-division. In the five years since the installation of the system Markham residents have used \$67.41 worth of water and the council of Markham is called upon to pay \$454.65. The cause of the difference was a leak in the main which was allowed to remain unrepaired for a long period.
