Peerless Poultry Prescription

—In Liquid Form—

Kills Germs - Makes Hens Pay

Thousands of hens are lost annually through contraction of disease. One sick bird drinking at the water fountain can poison the entire flock before you discover the ailment. Peerless Poultry Prescription used in the drinking water daily kills the germs and prevents the further spreading of disease.

PEERLESS POULTRY PRESCRIPTION

is a remedy for the entire poultry family and will save you lots of dollars. Every bottle guaranteed.

Get it now—a 16 oz. bottle \$1.00

NEWS AND INFORMATION FOR THE BUSY FARMER

Increased Potato Crop

Notwithstanding dry weather conditions throughout most of the potato producing districts of Canada, and the development of late blight in certain sections, the final estimate indicates a total yield of over 47 million cwt., or an increase of ten per cent. over last year's crop. Ontario's share will be 11,250,000 cwt.

Three Years Show Progress

Can good potatoes be grown in Ontario? The Central Ontario Potato Growers are showing that this province can produce potatoes which need not take second place to those from any other province. The association is demanding a premium for their "Tee-Pee" brand over New Brunswicks, and is securing a ready market that seems extremely pleased with the quality offered. The situation today stands out in decided contrast with the conditions of three years ago when eastern carload shipments invariably sold above locally grown stocks.

Royal Party For Girls

As in the case of the Royal 500 Party for farm boys in previous years the chief object of the Royal Fair trip sponsored by the Department for representative girls from each county this year is to provide opportunities and privileges which would otherwise not be available. They will visit all sections of the Fair and witness interesting portions of ring programs. In addition, visits will be made to educational institutions, manufacturing plants and retail centres which will be of particular interest and value to rural girls. The department hopes that the trip will establish ideals on the part of the girls concerned and enable them to return home and introduce improvements and methods which will add to the efficiency and comfort of the farm home. The Department is providing railway fare, lodging accommodation and meals.

Raised 2,000 Turkeys

In its effort to promote the profitable raising of turkeys, a turkey farm has been established in the County of Norfolk. The object was to show that birds of this variety can be raised with profit. The experiment has proven quite successful. This year more than 2000 turkeys were hatched and raised on the farm. A short time ago one thousand of them were sold at 30 cents per pound. What is possible on the Norfolk farm is equally so on other farms in the province. Turkeys can be raised and sold profitably at a much lower price than that demanded about Thanksgiving and Christmas.

A Timely Address

Addressing the St. Thomas Kiwanis Club, W. R. Reek, superintendent of the Ridgetown Experimental Farm, predicted that when the present period of depression and reduced prices

for farm products had passed, about ten per cent. of those in the agricultural industry whom he described as "fair weather farmers" would be out of business, while the farmers who weather the storm would be thinking more seriously than they have in the past. He declared that it takes periods of depression to make farmers realize the importance of culling the unprofitable cows from their herds and the boarder hens from their flocks. He criticized the doctrine of reduced farm production, at the same time advising that the farmer should endeavor to produce just as much grain on a smaller acreage and devote the other land to production of roughage and pasture.

Preparing Turkeys

Turkey growers are now beginning to finish or fatten their birds for the Christmas holidays. It is customary to begin the process of preparing the luscious turkeys for the nation's festive dinner tables by feeding them small amounts of grain which gradually are increased until the birds are on full feed. Due to the large supply of wheat available, this grain should be used to advantage in the fattening ration. Wheat has nearly the same fattening qualities as corn, but does not produce the rich yellow color of flesh that yellow corn does. It is important, however, that all grains be free from moldiness and they should be fed in hoppers to counteract certain diseases that cause heavy loss. Do not confine turkeys for fattening especially if they have been run on a range, for range birds cannot stand confinement.

Weekly Crop Report

According to the weekly reports of the agricultural representatives, fall work is well advanced in many parts of the province. In a few counties from 75 to 80 per cent. of the fall plowing is completed while in others not over 50 per cent. has been done. In Eastern Ontario there appears to be an increased interest in drainage. In several counties, it is reported, that many farmers are taking advantage of ideal weather conditions to clean out and open up satisfactory ditches. The report deals for the greater part with the difficulty experienced by farmers in plowing, on account of the dry weather. Bruce County had a snow a short time ago which left the ground in good condition but the dryness has been a serious handicap. In Dundas the milk supply took a 50 per cent. drop in one week. A yield of 8 1-2 tons per acre of sugar beets is reported from Essex, while Lambton states that the crop is above the average of the past three years.

"Fed Up" After Four Years In Council

SAYS PRESENT SYSTEM OF MUNICIPAL GOVERNMENT IS A JOKE

"Nothing doing," exclaimed Ald. P. J. Moran, of Barrie, when asked if he would come out for another year. "I have had four years of municipal life and have come to one conclusion—that the present system of municipal government is a joke!"

Questioned further as to what he would replace it with Alderman Moran said: "I am strongly in favor of the ratepayers voting on a bylaw to have a town management commission to handle the work of the council, board of education, board of health, and the various other civic boards and commissions which now exist in the town."

Such a body looking after the affairs of the town, under the direction of a "town manager" who would receive adequate remuneration, similar to the system used in several Ontario towns, was the only solution, he said. "The days of the council are over," he said, "and I can't see under present conditions how the heavy burden of taxes will be reduced. They have been going up year after year and will continue to go up. The only way to stop it is to have proper town management by a permanent commission."

BUTTONVILLE

Miss Wilkie, a former teacher in Buttonville school, spent the weekend with Miss Della Stephenson.

The hunters from this neighborhood are expected home this week. Their friends are looking forward to a taste of venison.

Miss Isobel Scott is spending a few days with Mrs. D. Hood.

About twenty-five members of the Buttonville Junior Women's Institute took advantage of the class held in needlework last week. Miss LeGrand who gave the instructions said that the work done by this class was well above the average. Miss Edith Craig took first place for fancy stitches with 100 per cent.; Miss Janet Brown was head in Raffia work, and Miss Jessie Thomson had the best sample of smocking.

Mrs. H. Patterson is visiting with her sister Mrs. L. Hood.

Mr. Russell Burr again showed his ability as a young ploughman when he carried off second place in his class, in a largely contested competition at Scarboro ploughing match.

Many from this neighbourhood attended the opening by Reeve Gohn of the new Community Hall at Victoria Square. We congratulate the citizens of that live-wire community on the completion of such a splendid and suitable building for their social and community activities.

ATTENTION. IS YOUR FORDSON HARD TO START?

Remedy —

Install a DYNAMO TIMER, and note how much easier your tractor starts. No oil to gum commutator surface, hence you get a clean, stronger spark everytime.

A DYNAMO TIMER also makes a great difference in Ford Car performance.

Instant starting, smooth running at all times, more power and pep, and freedom from commutator trouble, GUARANTEED FOR 3 YEARS.

Hundreds used in York County, on both cars and tractors. A recommendation from every user.

Many of these timers have already outworn many commutators on Fordsons in over four years of service.

None better by test and for durability.

Economically Priced at \$2.75

WITH THE FISHING FLEETS OF NOVA SCOTIA

The Bluenose fishermen of Nova Scotia have won a world-wide reputation as intrepid sailors of the salt waters, and their skill and courage and their storm-beaten schooners have been preserved to posterity in some of the finest of American literature. A typical fishing harbour of Nova Scotia is shown in the upper picture. Lunenburg boats have always been foremost among the fishing fleets and in the foreground can be seen schooners in various stages of construction, while anchored in the background are a number of the ships waiting to leave for the banks. At the bottom is a scene reminiscent of the old world, but one not unusual in the Nova Scotia fishing towns. It shows an ox team bringing a catch of cod fish from a schooner upon its arrival in port.
