

Way Back in the Liberal Files

THIRTY-FIVE YEARS AGO
From Our Issue of Jan. 27th, 1898
Twenty of the stables at the Woodbridge Fair grounds were burned on Monday evening. Loss was about \$150. No insurance, and the cause of fire unknown.

At the opening of the first session of York County Council for 1898 Mr. G. W. High, County Councillor for this division was elected Warden for the year.

The Conservative Association of Markham Township met at Unionville on Saturday and elected the following officers for the year: President, W. Stiver Sr.; vice-pres., John Turner; sec't.-treas., Alex. Pringle; chairman of divisions, No. 1, Stewart Wilcox; 2, F. Marsh; 3, Wm. Padgett; 4, G. A. McCague; 5, A. Hood; 6, A. Pingle; 7, H. Duncan; 8, G. C. Morrison; 9, Wm. Burton; 10, W. J. Bains.

The travelling public along Yonge Street learned with regret that the car sheds of the Metropolitan Railway Company were burned Sunday evening about 9 o'clock. All their cars were burned except one of the new cars which had run to this Village in order to clear the track after the snow storm. The power house was saved after hard work by the firemen of North Toronto and Rose Ave., Toronto. A live wire was supposed to have caused the fire. The loss, some \$10,000, was covered by insurance.

The Liberals of Richmond Hill met in the council chambers on Saturday evening, Jan. 22nd, 1898, for the purpose of reorganization. On motion, Dr. J. N. Hutchison was appointed chairman of the meeting, and T. F. McMahon, secretary. The election of officers resulted as follows: Pres., Andrew Newton; 1st vice-pres., J. A. E. Switzer; 2nd vice-pres., T. H. Trench; secretary, T. F. McMahon; treas., D. Hill; executive committee, J. Brydon, W. A. Wright, C. Skeele, J. Casley, J. T. McElroy, F. W. Garvin, Walker Hall, W. Innes, Dr. Langstaff, A. Moodie, Dr. Hutchison, G. McDonald, J. Hill, J. Mortson, W. T. Storey. On motion it was decided to hold a joint meeting with the Liberals of No. 2 Markham, in the same place, the following Saturday evening when addresses would be expected from Mr. John Richardson, M.P.P. and others.

A meeting of the local curlers was held in the council chambers on Monday evening. New members enrolled were W. Innes and A. E. Coombs. The members proceeded to select skips by ballot to choose teams to play for the G. B. Smith medal and honors fell to the following: P. G. Savage, W. H. Pugsley, F. McConaghy, J. Palmer, W. T. Storey, M. Boyle, F. Sims, J. H. Sanderson. It was then decided that the skips meet in McConaghy's shoe store on Saturday evening to select their rinks. After the business of the evening was concluded all those present, by the kind invitation of the popular president, Mr. J. H.

Sanderson, proceeded to Mrs. Soules' oyster parlor, where they were treated to a tempting oyster supper with all the necessary appendages. After votes of thanks by Messrs. Pugsley and Storey for the thoughtfulness of the president, and similar expressions by Messrs. Sims and Innes for the excellent supper prepared by the hostess, brief remarks by Messrs. Sanderson and McMahon, a couple of good stories by Mr. McConaghy, and a song "Annie Lawrie with variations," by Mr. Moodie, the curlers separated, all declaring that no better evening had ever been spent, even in old Scotland, by the "Knights of the Stanes."

TWENTY YEARS AGO
From Our Issue of Jan. 30th, 1913
The High School Skating Party and Carnival in the rink Monday evening was a great success, though the previous mild weather did not help to keep the ice in good condition. Many of the costumes were fine, and the proceeds amounted to nearly \$50.00.

The Richmond Hill Curlers went to the City Thursday to play for the tankard, but play was withdrawn on account of the mild weather. Mr. Alex. Moodie retired from business that week and thanked his customers for their patronage and good wishes during many years past.

The King and Vaughan Plowmen's Association held a most successful banquet at the Maple Leaf Hotel, Maple, Thursday evening, when 169 sat down to an excellent supper prepared by the host and hostess Mr. and Mrs. R. Jones. The musical part of the program was rendered by Eddie Pigott and Harold Rich, and short addresses were made by W. H. Clubine, J. A. Cameron, W. J. Wells, J. McLean, Dr. Routley and the president Harry Fisher. During the evening Mr. Stanley Tyndall was presented with a silver medal for best plowed land in 1st or 2nd class in sod at the recent match. The secretary, Mr. Saigeon, read a number of "Regrets" from gentlemen unable to be present.

A sad fatality occurred at Maple on Saturday afternoon when John Albert younger son of Mr. and Mrs. John McNaughton lost his life. He was going to Watson's pit for a load of gravel and when crossing the railroad was struck by a fast train from the north and instantly killed. A freight on the siding hid the approaching train from view. The funeral took place on Wednesday afternoon.

VELLORE

The Vellore Euchre Club met in the Township Hall on Monday night with fifty in attendance. The ladies provided lunch and the committee in charge served the luncheon. The prize winners were: ladies first, Mrs. M. McDonald; second, Miss Edna Harker; third, Miss Marion Phillips; consolation, Miss Gwen Beck; gentlemen first, George Davison; second, Mr. McDonald; third, George Brownlee; consolation, Mr. Wm. Bates.

The Junior Farmers and Farm Girls will hold their February meeting in the Township Hall and basement of the school on Tuesday, Feb. 14th, at 8 o'clock. After the separate meetings both will join for a social hour in the hall where a debate and a well balanced program is being prepared by a committee.

The play "The Wrong Flat" was given at Temperanceville last Thursday night by a group of the young people of Vellore.

Miss Jane McNeil, Messrs Alex Neil and Sam Davison are taking part in a play which will be given the early part of March by the Orange Society of Woodbridge.

Mr. Alex. McNeil spent the weekend with his brother Art at the O. A. F., Guelph.

Miss Jean McKinnon visited the Junior Institute of Nobleton and judged the house dresses and record books which the girls had finished for their sewing project.

CARRVILLE

The Young People's Society are holding a Valentine Social at the home of Mr. and Mrs. L. Burton on Monday evening, Feb. 13th, at 8 o'clock. A good program is being prepared. Ladies please provide lunch; for gentlemen a charge of 35c. is being made.

The W.A. of the church are holding a Pot Luck supper at the home of Mrs. McCrone on March 1st.

Mr. Maxwell expects to occupy the pulpit of the church next Sunday evening after his long illness.

Miss Kay Wark spent the week-end in Toronto with friends there.

Mrs. Jack Clement is spending several days in Toronto, the guest of her niece Mrs. F. Connor.

NEWS AND INFORMATION FOR THE BUSY FARMER

Put Flesh on Market Cattle

With the plentiful supply of feed, the cattle going on the market this winter should be well-fleshed. Well-finished young cattle command a premium on both the home and export markets. The poor quality, under-fleshed animals have a depressing effect on the market. Steers or heifers showing breeding and type make good use of the home-grown feed. Time alone will tell what the profit will be on the hundreds of cattle going into the feed-lots this fall. But, it is reasonable to expect that it will be the deep, mellow-fleshed bullocks that command the top prices when they go on the market. Inferior feed or a skimpy ration does not make market toppers of even the best type of cattle.

Clean and Sterilize All Dairy Utensils

The keeping quality of milk depends directly upon the number of bacteria present and this in turn depends upon the thoroughness with which dairy utensils have been cleaned and sterilized. The use of live steam or scalding with boiling water is always effective providing it is available in sufficient volume, but as a general rule the quantity available on the average farm is inadequate for effective results. It is for this reason that the use of chlorine in suitable form is recommended by bacteriological experts. It acts rapidly in cold water, and is cheaper and more convenient than the heat treatment generally recommended. When properly employed chlorine sterilization gives excellent results and the practice, already general among milk and other food plants is spreading to the dairy farms.

Layers Need a Real Home

While there are many factors that enter into the management of the poultry flock, there is nothing that will have greater influence on the poultry raiser's success or failure than the way in which he houses his

flock. Birds of good breeding, no matter how well fed, will not return maximum profits unless well housed. The poultry house is the hen's home, and to be comfortable and give good production, the house should have proper ventilation, insulation and sanitation; it should have a proper location, plenty of light, be dry and have ample floor space.

Weekly Crop Report

Haldimand County was the scene of a sale of purebred Dual Purpose Shorthorn cattle recently at which the top price of \$127.50 was paid for bulls and \$135.00 for cows, with the average price for the sale running around \$80.00 for all cattle of all ages. This was considered most satisfactory by all concerned. The sale was very well attended and bidding was remarkably brisk at all times. Both Haldimand and Kent counties report that plowing was general in January, many farmers taking advantage of the mild weather to catch up on this work which was delayed owing to the dry weather last fall. The wheat crop has suffered in some districts owing to unusual weather conditions. On the heavy lands some heaving has taken place and the crop somewhat discoloured. New seedlings of clover have also suffered. Lincoln county reports that eggs are being produced in much larger quantities now that spring is approaching. Hatcheries are incubating eggs by the thousands and in a few cases the first lots of chicks have been sold. There are more enquiries now for productive breeds, namely purebred registered stock. Down in Peterborough County, the attendance of farmers when the swine train visited that country recently showed that there is still considerable interest in hog-raising despite low prices. Eastern Ontario has lacked snow and much heaving of meadows is reported and heavy damage for hay crop next summer is feared. Wood, an important cash crop, has been trucked and drawn in wagons.

GRANT FLEMING, M.D., ASSOCIATE SECRETARY

SUNLIGHT

Light means life. If it were not for the light and heat of the sun, life, as we know it, could not exist on the earth. No wonder that the ancients worshipped the sun as a god, for even they recognized the power of this great planet.

Light is made up of a number of light waves of different lengths, having different properties. White light can be broken up into different colours, as is seen in the rainbow; red forms a band at one edge, and violet a band at the other edge. Beyond these bands there exist rays of light which we cannot see and which are called infra-red and ultra-violet.

The different rays produce different effects upon the body. It is difficult to say just what are the effects of sunlight upon the body as distinct from other climatic factors, such as fresh air, wind, temperature and humidity.

Following upon an unusual exposure of the skin to sunlight, reddening occurs quickly as a result of the warmth of the sun's rays. This is followed by an inflammatory reaction further reddening and subsequent tanning caused by the ultra-violet rays. The extent to which this occurs depends upon the length of the exposure and upon the individual himself. Individuals vary in their response to sunlight. Sunlight is powerful and we cannot all stand the same amount of exposure to its rays.

The effects of sunlight, whether natural or artificial, are not limited to the skin. Light and air influence metabolism, by which is meant the entire functioning of the body. By stimulating metabolism, a general sense of well-being is produced, and, in this way, the mind and the body are both affected. We know very little about any definite values of sunlight; what is known is the common experience of a feeling of greater energy after exposure to sunlight and air.

While small doses of light may be good, larger doses may be harmful, if not destructive. What is good for the normal healthy person may be harmful for the sick. Because sun-

light is helpful in one form of tuberculosis, it does not follow that its effect is beneficial in all forms of the disease.

Ultra-violet rays are successfully used in the treatment of one form of skin disease; in others they appear to be helpful, while in others still, they have injurious effects.

As far as normal persons are concerned, there is no conclusive proof of the many specific beneficial effects which are claimed for sunlight. As a treatment for disease, sunlight should be regarded as a powerful agent to be used according to the directions of someone who is qualified to prescribe treatment, this being particularly true as regards any form of artificial light treatment.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.
