THE DIAMOND JUBILEE

Early next month present and former citizens of Richmond Hill will celebrate the sixtieth anniversary of the incorporation of this village.

Community birthday celebrations are always interesting and beneficial. It is interesting to turn back the pages of time and glimpse at conditions as they were in the "good old days."

We hope the Jubilee celebration may be really a community celebration, and that everyone young and old will join in its observance with enthusiasm.

DIFFICULT DAYS FOR MUNICIPALITIES

These are difficult times for those on whose shoulders rest the responsibility for municipal administration. Municipalities are faced with baffling and perplexing problems which a few years ago were practically unknown.

COUNTY COUNCIL IN SESSION

York County Council is in session this week. The County legislators will make a better impression on the ratepayers of the County if they make the session short.

TAXES, SWEET AND BITTER

At the annual convention of the Women's Institutes of Eastern Ontario held recently at Ottawa, one of the resolutions passed called for a removal of the tax on sugar, cereals and matches, on the grounds that these articles are necessities.

REMOVING HATS AT FUNERALS

A frequent cause of death, especially among older people, is illness brought on by exposure while attending funerals during raw or cold weather.

Health Service

OF THE Canadian Medical Association

HEART BEATS

The menace of heart disease is brought home to us when some friend dies suddenly from this condition.

The increase in heart disease after forty-five is due, in part, to the fact that more people are now reaching adult life as a result of our better control of the diseases of early life.

Heart disease, other than the form that is due to actual old age, or to premature old age, is the cause of much suffering and of the cutting short of many lives.

Heart disease may follow any of the ordinary communicable diseases of childhood, such as diphtheria, scarlet fever or measles, but it is especially apt to occur after rheumatic fever, even of the mildest form.

The periodic health examination is of great value in detecting the early signs of any heart troubles.

tor will discover any infected teeth, tonsils or head sinuses, which may be the focus from which the heart is being poisoned and damaged.

The correction of defects and the proper treatment of chronic infections will protect the heart from damage. Thus, the periodic health examination protects those who take advantage of a medical check-up at regular intervals.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

A couple were celebrating their silver wedding; and several guests turned up with appropriate gifts. Smith brought a silver cream jug, inscribed "With best wishes."
