

King Township Council

Regular meeting held at Kettleby, February 17, 1934. Minutes of previous Regular and Special Meetings read and adopted. Accounts ordered paid. Unemployment Relief Works: Voucher No. 1—\$1043.30 Road Account: Voucher No. 2—\$260.61. Resolutions:

Fox-T. MacMurchy—That the Treasurer be and is hereby instructed to pay the following sheep claims as set opposite their respective names as per valuations sworn statement now on file. John W. Dew \$10.00.

T. MacMurchy-Lawson—That the Treasurer be and is hereby authorized to issue cheques to the following as rebates on dog tax, same being wrongfully assessed. Gordon Petch \$2.00; Harold Bovair \$2.00; Mrs. D. Dion \$2.00.

Fox-T. MacMurchy—That the Treasurer be authorized to issue a cheque to the P.V.S. for the sum of \$40.00 for services in attending fires at Mitchell's and Robb's farms.

T. MacMurchy-Lawson—That the Treasurer be and is hereby instructed to issue a cheque to W. W. Gardhouse for \$27.62 being King Township's share of Hospitalization for the month of January 1934.

T. MacMurchy-Lawson—That the Treasurer be and is hereby authorized to issue a cheque for \$20.00 to M. L. Andrews, Clerk of the Town of Aurora, same being payment of King Township's share of Division Court costs, as per statute, and that the Seal of the Corporation be affixed to this resolution.

Jefferson-T. MacMurchy—That this Council bring to the attention of the Globe Indemnity Co. the Claim of one Mr. Creighton of the Village of Kettleby and recommend a favorable settlement of same.

Lawson-Fox—That the Treasurer be instructed to issue a cheque to Arthur Wellesley for \$16.68 re his duties as School Attendance Officer.

Lawson-Fox—That this Council hold a special meeting every month during the period of relief work, to pass accounts; same to be held on the second Saturday of each month, or at the call of the Reeve.

Lawson-Jefferson—That the Clerk be authorized to arrange a meeting between Mr. Cavell, Land Surveyor, and Mr. Reddick, Assessor, re arranging any mistakes on Holland Marsh assessments re Engineer's Report.

T. MacMurchy-Fox—That the Treasurer be and is hereby instructed to issue a cheque for \$5.00 to Fred Boys, Secretary Robertson Lodge for nomination meeting, held in hall, Dec. 22, 1933.

Lawson-Fox—That the Treasurer be authorized to issue a cheque to the Hospital for Sick Children for the sum of \$15.00, this being the usual donation.

Jefferson-T. MacMurchy—That Mr. James Murray be paid the sum of \$2.00 for services as Fence Viewer for the year 1933.

Fox-Lawson—That the Clerk be and is hereby authorized to write the Council of the Village of Richmond Hill that as we have no agreement with Richmond Hill concerning fires in King Township, and as such district is supposed to be in Aurora's district, and considering the financial conditions of the parties affected by the fire, this Township Council feels that those so concerned should make settlement.

T. MacMurchy-Fox—That the Clerk submit the following resolution to the Minister of Public Highways: "Whereas the expenditure on Township Roads in the Municipality of King Township for the year 1933 amounted to \$14,426.15, and whereas the Department of Highways authorized a subsidy on an expenditure of \$14,000.00, be it hereby resolved that the Council of the Municipality of King Township respectfully solicit that your department award the said subsidy on the actual expenditure for the year; and that the Reeve, Treasurer, and the Road Superintendent be and are hereby authorized to sign the required forms thereto."

Lawson-Jefferson—That the Reeve, Deputy-Reeve, and Councilors, also the Road Superintendent are hereby delegated to attend the Good Road Convention.

Jefferson-Fox—That the attention of our Constable be brought to the complaint of Addison Brodie that some person or persons have located and built a shack on his Marsh property, and are destroying his timber on Lot 7, 3 Concession, old Survey.

Fox-Lawson—That the Treasurer be and is hereby authorized and instructed to send cheque of \$5.00 as Membership Fee to the York County Municipal Organization, for the benefit of the Clerk, Assessors and Collectors of this Municipality.

By-Laws Passed: No. 606—To provide for Expenditure on Roads in the Township of King during the year 1934. No. 607—To borrow money from the Bank of Commerce at King.

Meeting adjourned. Next Regular Meeting at Schomberg on Saturday, March 31, 1934.

A MAGIC LAKE

One of the "eight wonders of the world" is Trinidad's Pitch Lake, discovered in 1595 by Sir Walter Raleigh. Its surface is like a great, wrinkled tarpaulin, 100 acres in extent. An automobile left standing on the pitch surface sinks gradually.

A pipe 160 feet long was forced into the lake in an unsuccessful attempt to find bottom. It vanished overnight and re-appeared years later, 800 feet away, gnarled and twisted. Trinidad is the southernmost island touched by Canadian National liners and freighters in the West Indies service. The pitch is used extensively for highway surfacing, roofing and cementing.

ICELANDERS DEMAND LONG RUBBER BOOTS

Icelandic fishermen, who for centuries have worn a traditional kind of heavy leather boot, often fitted with a thick wooden sole, are taking to the rubber boot of Canadian origin states the Industrial Department of the Canadian National Railways. Early attempts to introduce boots for fishermen met with considerable opposition, because of a certain superstition in favor of the traditional foot wear. The rubber boot, most in demand, is of knee height, to which the icelander adds a hip top made by himself from red rubber imported in rolls and cut to suitable shape.

We must prepare ourselves for constant change. Otherwise we'll be pushed aside to become mere spectators instead of actors in the great game of life.

TEMPERANCEVILLE

Mrs. H. Casely and Stanley visited Mrs. C. Boynton on the third line on Sunday. We are sorry to hear that Mrs. Boynton is not in very good health.

Mr. and Mrs. Giles Kerswell visited Mr. and Mrs. Geo. Kerswell of Markham on Sunday.

Mrs. W. Pellatt and Miss Mary Barker, delegates of the W.M.S., attended the W.M.S. Centre Presbytery Conference in St. George's Church, Toronto, on Thursday.

Mr. and Mrs. Geo. Phillips were guests of Mr. and Mrs. Geo. Dibb on Sunday.

The Y.P.S. held their regular meeting Friday evening with the president, Miss Ruth Jennings, presiding. After the devotional period, a debate, "Resolved that the Christian citizen should oppose war under all circumstances" was given. The affirmative side was upheld by Messrs. Harry Rumble, Wallace Jennings and Jack Brown, and the negative upheld by Misses Violet McColeman, Margaret Henshaw and Mrs. Nelson Thompson. The judges, Miss Jennie Kerswell, Mr. William Barker Jr. and Rev. G. W. Lynd, gave their decision in favor of the affirmative, they also gave a number of constructive criticisms.

The Y.P.S. have commenced practicing a play "The Winning of Joy" a comedy drama in three acts. Following closely upon "Mother Mine" by the same author, it is being anticipated with eagerness by the public.

On Wednesday evening a large number of relatives and friends gathered at the home of Mr. and Mrs. John Jennings. A social time was spent in playing progressive euchre, after which Mr. Aubrey Lloyd on behalf of the community, presented Mr. and Mrs. Wilbert Jennings with a lovely silver tea service. Miss Mary Barker and Mrs. Wesley on behalf of the choir presented them with a beautiful tray. Following speeches of gratitude from the recipients, refreshments were served, after which, with many good wishes to the happy couple, the gathering dispersed.

Miss Ella Kerswell was the guest of Mrs. W. N. Thompson last Wednesday.

The Mission Band met at the home of Miss Mary Barker on Saturday, with Miss Mildred Folliott, the president, in the chair. Readings were given by Mabel Jennings, Eliza Barker, Connie Jones and Laurine Dibb. A piano solo was rendered by Miss Norma Jones. A main feature of the program was the presentation of a life membership certificate and pin to Mae Harman, who was president of the band for two years and never missed a meeting. We are going to miss Margaret and Mary McQuarrie at our meetings as they are leaving the community in the near future. They were also made life members.

Mr. and Mrs. Elmer Orr and family visited Mr. and Mrs. Wm. Jones on Sunday. It seemed like old times to see Isabel, Nora and Orphie at Sunday School. Mr. Wm. Jones celebrated his birthday on Sunday.

Miss Violet McColeman visited at the Ethelmere Farm on Sunday.

The Y.P.S. are planning to hold an attendance and program contest to begin now and last until May 1st. Clifford Rumble and Aubrey Lloyd are the captains.

Despite the cold weather and, bad roads, there was the usual good attendance at Sunday School. After the lesson, the missionary superintendent, Mrs. N. Thompson, gave an interesting reading on "The children in Manchuria hear about Jesus."

The monthly meeting of the W.M.S. and W.A. met at the home of Mrs. R. Brown on Thursday. Plans were made to hold an oyster supper on Wednesday, Feb. 28th. A play "The Bishop's Candlesticks" will be presented by the young people of Concord.

The U.F.O. met at the home of Mr. Wm. Barker on Monday evening.

The Misses Ruth and Mabel Jennings spent the week-end with Mr. and Mrs. B. Andrews.

Mr. Robert Mullen visited friends in Belle Ewart on the week-end.

Miss Ethel Shepherd of Toronto visited her country home on Saturday.

Little Ruth Folliott has been ill with the chicken pox chicken box as Ruth calls it) but glad to say she is improving nicely.

Miss Patricia Brown of Toronto spent the week-end with her parents here.

A woman who did not understand the language of business went into the Bank of England and asked to consult some one about her war loan holding. The clerk to whom she talked happened to be a rather grave person. He inquired: Young Banker—Is it a case of conversion or redemption, Madam? The Woman (faltering)—Conversion? Redemption? Er—pardon me, is this the Bank of England or the Church of England?

SLATS' DIARY

BY ROSS FARQUHAR

Friday—well it seemed like as if this week never wood come to an end

dent come out 1st in the test witch we went threw this week. But they was oney leven a hed of me. I dont Xpeck pa wood beleave me if I told him they was one in the class which's grades was lore than mine was. I wont tell pa and ma that she out 3 weeks with the measles.

Roony Sells got 1st honners. he is the kid who has his neck warshed on weak days. a big Sissie.

Saturday—went to a weener roast down at Blisterses house and walked home with Jane and when I was a telling her a story she begun to yon on me. I got even with her though. I diddent finish telling the story.

Sunday—Wile I was on my way to Sunday skool the wind blowed Mr. Fudges hat off and I run and got it for him and he give me a nickel and so I put it in the colleckshun. and saved my nickel. I gess the old saying is Right. Its an Ill wind that has no turning.

Monday—I am afraid teecher put a ketch kwestion in are spelling lessen today. she sed for us to define Barter and I rote down it was sum thing you try to clean off yure teeth and cant without you go to yure dentist twice a yr. Jake says it means to swap things and etc.

Tuesday—Pa has ben planning to spend his vacashun in the mountins but today I herd ma tell Mrs. Gillem that they was a going to Canada when pa gets his vacashun. I bet pa is a going to be very very mutch suprised when he hears that.

Wednesday—well pa has sent off fer his seed witch he wants to plant this spring when it gets warm agen. He is iddisidedd weather he wants the wheat crop back of the Garrage or over by the Bird Bath.

Thursday—I walked home with Jane agen this evning and I got a little sentimentle I gess. I sed they issent nothing nicer then to be alone with the girl you like the best. and she sed. Well go on and get with her and then she went in the house. Sum times I got a Noshun to not pay her emy mind frum now on. I wander just what she wood do.

NEWS AND INFORMATION FOR THE BUSY FARMER

Planting Early Cabbage

Early cabbage is a very good money crop. More value may be obtained from an acre of it than from the same area devoted to many other crops. Seed sowing should be done early in March and the plants grown in flats of thumb pots and later put in four inch pots. Hardening off before planting in the field is very important. This will make the plants frost hardy. As soon as the plants show signs of growth in the open field, apply a side dressing of nitrate of soda.

Cuts Hog Costs While hogs have been climbing to the best price reached since 1931, Clark Young of Milliken, Ontario, has been busy establishing a world's record for cheap production. He reports a hundred pounds gain for every 281 pounds of feed used, which is eight pounds better than the record of the Indian State College previous holder of the record. Authorities at the Ontario Agricultural College consider one pound of pork gain for every four and one half pounds of feed decidedly above the average. Mr. Young gives his total cost per hundred pounds of pork for the entire six months feeding period as \$4.78 which represents more than \$13.00 net profit per 200 pound hog at present prices. Not only have Mr. Young's hogs been fed cheaply and quickly (they were marketed at six months) but the quality according to the grading at Toronto and the bacon reports from Great Britain, where the pork was marketed, has been the best. Mr. Young figures his costs from weaning to six months as follows: 2,050 pounds of mixed home grown grain, 400 pounds of shorts, 1,650 pounds of special concentrated feed, total cost \$69.57 for one lot of eight hogs.

Hatching by Incubator Before using the incubator check it for leaks and breakage and test the thermometers. Place the machine in a well ventilated room or cellar which is kept at a uniform temperature. The eggs used should be of normal shape and appearance and at least 24 ounces to the dozen. Control the moisture according to the appearance of the eggs after they are set. On the seventh-day test the air cell should be about one eights the size of the egg and on the eighteenth day about one quarter. The eggs should be turned twice a day. Test

for fertility on the seventh and eighteenth days, closing the machine on the eighteenth. Above all follow the instructions given with the machine when purchased.

Proper Finishing Will Repay Ontario Shippers "The cattle feeder who ships only properly-finished cattle," said Garnet H. Duncan livestock investigator, Ontario Marketing Board, "is very definitely helping himself."

"The liquidation of unfinished cattle will meet a poor sale, under present conditions. This is due largely to the fact that packers have such huge quantities in storage. On the other hand Ontario has considerably less cattle feeding than normal consumption demands.

"The rise in hog prices will reflect itself on cattle prices, and finishing cattle properly will repay the feeder, and reduce this excess storage of beef.

"The result of marketing unfinished cattle at present will be an increase in the storage supply. Further than this, feeders will find themselves with no cattle to ship when prices advance.

"In my opinion, the wise shipper will feed to finish his stock, and distribute the supply over the next few months."

The Mutton Sheep The production of mutton has become largely a question of furnishing lambs to the markets. As in beef or pork, the demands of the market call for young meat and comparatively light weights in carcass. The premium paid for baby beef and bacon hogs applies with even greater force to sheep. Thick, fleshy, but rather light joints are what the cook calls for whether for the home table or the restaurant. The tastes of the consumer have been cultivated to discriminate in favour of the tasty, tender, lamb until we find that from 70 to 80 per cent of the sheep that reach the market are less than one year old. The age of heavy mutton is passed—a condition most favorable to the sheep raiser, who is thus enabled to reap quick returns from his flock. The increasing demand for lamb mutton this season augurs well for the future of the industry, provided care is taken to keep up and improve the grade of the product.

STRANGE HOSPITAL FOR SICK PLANTS At Australia's Federal Capital, Canberra, there exists a remarkable hospital for the treatment of sick plants. Complete with operating theatre, surgical and medical wards, isolation blocks, etc., it has been designed to save the country hundreds of thousands of dollars annually, states an official of the Canadian National Steamships.

The "wards" are glass houses screened against summer sun and warmed against the winter frosts. In one, lie the incurably anaemic plants. At night, they need the help of a huge electric lamp of many hundreds of candle power. Their wasted cells cannot absorb sufficient nourishment during the daylight hours.

Through the glass walls of the "ward" next door can be studied exactly the progress of disease upon the leaves and even roots of a number of infected plants in enormous tubes. Next door, again, are cereals growing in beds equipped with a complex system of warmers to adjust the ground temperature.

In the operating theatre, stems, buds and seeds are dissected to ascertain why fruit refuses to set, why it is small and deformed, or why crops are light. In the dieticians department the effects of fertilizer are noted in the bacteriological laboratories cultures are growing of the germs which attack plants. Even the consequences of late autumns, mild winters and early springs upon the yield of fields and orchards are the subject of continuous intensive study.

CANADA PUBLISHED 1752 The first newspaper in Canada was the Halifax Gazette, first published in 1752, which preceded the first printing press by one year, installed also in Halifax. Quebec City Gazette, started 12 years later. The province of Nova Scotia has the honor of aving many "first" things in Canada, some of which were the first in North America, states the Tourist Department of the Canadian National Railways. The first stationary steam engine in Canada was installed at the Albion mines in Stellarton, N. S., in 1827. The first highway in North America was that at Port Royal, now Annapolis Royal, N. S., in 1605. The first wireless station in America was at Glace Bay, N. S., in 1903.

ANAEMIA Did you ever wonder why a person who has had a haemorrhage complains of thirst? One important function of the blood is to supply fluid to the tissues of the body. After a haemorrhage, the blood is diminished in volume, and fluid is withdrawn from the tissues to make up this deficiency. The tissues are thus deprived of fluids, so the patient complains of thirst.

The sudden loss of comparatively large amounts of blood causes one form of anaemia. Other anaemias which occur are due, not to loss of blood, but to changes in the blood. Millions of red blood cells carry oxygen to the tissues. The average life of a red blood cell is a month. The body machinery is able to replace red blood cells at this rate. There is a reserve of red cells in the spleen and bone marrow sufficient to meet any sudden or unusual demand. If, however, the extra demand continues, the reserve is soon exhausted and the machinery for making new cells is unable to meet the demand, with the result that there is a deficiency in the quality or quantity, or both.

Chlorosis is a type of anaemia which occurs in young women. There is no reduction in the number of red blood cells, but there is a change in the haemoglobin, with the result that the complexion takes on a yellow-green tinge, hence its popular name, "green sickness." This condition, which used to be common, is now comparatively rare in this country. The cause is unknown. It is readily cured by the administration of iron properly prescribed.

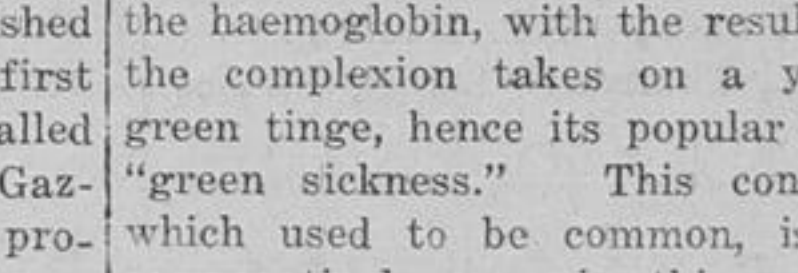

Pericious anaemia, or Addison's disease, is a type of anaemia in which there is a tremendous decrease in the number of red blood cells. The onset of this disease is slow and gradual. The patient becomes aware of an increasing lack of energy. He finds that he fatigues easily and becomes breathless; he has no appetite and is

occasionally dizzy. Numbness and tingling in the extremities are common. The skin is pale or yellow tinged, but there is no loss of fat. A few years ago, it was discovered that the addition of liver to the diet of those suffering from pericious anaemia brought about a startling improvement and the blood became normal again. What substance is present in liver which does this is not known; it is found in extracts from the liver tissue and the tissues of other organs. This discovery marks one of the great advances in medical treatment for, through the use of liver, patients are brought back to normal. They are not cured, but they are kept normal by the continuous use of liver.

Up until recently, pericious anaemia was usually fatal, but now the disease has been added to the list of those for which we have a specific remedy.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.
