## Boost Business In Your Home Community.

It is well to remember that even the worst of us have some good points.

It is best to find the good things about our neighbors and our country and boost them all the while.

A boosting spirit means helping your community.

Many countries are held back because they fail to let the outside world know about their country and its resources and opportunities.

They have lacked putting the boosting spirit into practical operation.

All citizens should inculcate a boosting spirit into their systems. The time is past when they should withhold this information from the world.
