NEW TYPE ROADWAY TO BE TRIED OUT

A "salt road," a new type of cheap roadway said to have given good results in Michigan, will be tried out in Simcoe county, according to Herbert J. Crawford, chairman of the Simcoe county roads commission. At Ifirst an experiment will be made on a stretch of about a mile.

Describing this new type of road, Mr. Crawford said that first a chemical analysis is taken of the existing road to determine the gravel and clay content. The required amount of salt is mixed in and consolidated af ter the surface has been scarified about three times. In point of hardness and durability, the result is said to be very similar to concrete. Winter frosts do not harm it, it is

It is pointed out that one advantage of such a road is that repairs are easily made, a mixture of salt and gravel being applied to any places where repairs are needed.

Here and There

Reduced fares to cover the Labor Day week-end from Aug. 31 to 12 noon Monday, Sept 3, have been authorized on the Canadian Pacific Railway between all stations in Canada. Round trip tickets will be at the rate of fare and a quarter and will be good until midnight, Tuesday, September 4.

Returning from White City, London, Eng., aboard Canadian Pacific liner Montcalm, the athletes who represented Canada at the British Empire games came back practically in a body to the number of around 100. They sailed for England aboard the Duchess of York July 20.

Australia is showing very substantial evidence of recovery with continued betterment in sight, is the view of John P. Brophy, Commonwealth Trade Representative at New York, stated when interviewed aboard S.S. Niagara on arrival recently at Victoria.

Fifty per cent. ahead of last year at mid-August with prospects for balance of season exceptionally good for the Canadian Pacific hotels and resorts in the Rockies is reported by A. E. Robertson, assistant general manager, in charge of the Company's western hotels.

Prominent British parliamentarians are visiting the Maritime Provinces this year, including Prime Minister J. Ramsay Mac-Donald. The Canadian Pacific liner Montcalm recently carried as a passenger Dr. E. Leslie Burgin, M.P., parliamentary secretary of the British Board of Trade, who will stay at St. Andrews-by-the-Sea, Saint John and Digby, N.S.

Canadian Pacific flagship Empress of Britain claimed a new record recently for the Quebec-Cherbourg Atlantic crossing, making the trip in four days, six hours and fifty-eight minutes, being thirty-four minutes under her own previous record set in August, 1933.

Montagu Norman, governor of the Bank of England, whose evasive tactics have given newspaper men some strenuous times in the past few years, actually posed for a photograph aboard Canadian Pacific liner Duchess of Bedford on his return to England recently. "Wait till I get my hat on straight," was his comment to the astonished and gratified photographer.

Railway building is by no means at an end in Canada, E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, stated recently following an extended inspection trip through Western Ontario. "Completion of our development will probably mean construction of more railway mileage to outlying districts as prospects and development warrant," he said,

Dalrymple was third in Ayrshire judging.

Menace of Low Grade Seed Low grade seed is a menace to the reputation of Canada in the export markets and a drug in the domestic market. The marketing of seeds in general in the last three or four years has been attended by serious difficulties and comparatively low prices to growers, but has at least taught the value of producing a high grade product. No. 1 seed has most | always sold at a profitable price, while low grade seed has been unsaleable or sold at a loss to the grower. It should be the practice of every grower to save seed only from clean fields, so that it may be cleaned to grade No. 1.

Marketing Geese

The time to prepare geese for market is when the weather turns cold in the fall. They should then be taken off pasture and those selected for market should be placed in small penned enclosures, provided with plenty of water and grit and kept clean. They should be fed heavily on whole corn, the best medium for the fattening of geese, and about two weeks' heavy feeding should fit them for market. Twentyfour hours before killing geese should be starved, but given plenty of water. Care should be used in plucking, the dry or steam methods being Treasurer's Sale of Lands in Arrears recommended, for the reason that the

When to Apply Lime

land satisfactory practice. Lime is not a fertilizer, but simply neutralizes the acidity of the soil and should be thoroughly worked into the soil during the preparation of a seed bed to become efficient. It is poor business to farm land that is lacking in lime and strongly acid in reaction. The productive power of the soil is reduced when it becomes acid. Correcting this condition with the use of ground limestone increases the efficiency of the manures and fertilizers applied and therefore contributes to the cutting down of costs of crop production.
