VELLORE

Woodbridge Fall Fair was the centre of interest on Saturday for our district. The boys played a very important part in the Woodbridge Calf Club. Albert Rutherford, Cameron and Alex McNeil were well up in the results. Mrs. Archie Cameron secured many prizes for her flowers. Mrs. Wm. Bates won several awards for her knitting.

Miss E. Boulton of Weston spent the week-end with her girl friend, Miss Jane McNeil.

Mr. and Mrs. George Garrow of Toronto spent Sunday with Mr. and Mrs. Wm. Bates.

An invitation has been extended to the Vellore Clubs by the Unionville Junior Farmers to attend a social evening at Unionville on Saturday night. The members are looking forward to having a good time.

Miss Elma Farr spent the Thanksgiving holiday with Mr. and Mrs. Bob Allan of Montreal, formerly of Woodbridge.

A miscellaneous shower was given in honor of Mrs. A. Wideman, formerly Miss Ruth Jennings, at Miss Laurena Rutherford's home on Wednesday evening. The evening was spent in playing Court Whist followed by a Mock Wedding. The bride, Miss Mary Constable, and bridesmaid Miss Sara McNeil, looked very beautiful in their mothers wedding dresses while the groom was impersonated by Miss Marion Phillips and the best man by Mrs. Nelson Kerr and were dressed in military costume. Miss Jane McNeil gave the bride away and the ceremony was performed by Miss Elma Farr. The wedding march was played by Miss Margaret Watson and Miss Laurena Rutherford sang during the signing of the register.

Mrs. Wideman received many useful and beautiful gifts and thanked the girls for so kindly remembering her.

The W.M.S. of St. Paul's Church Vaughan met at the home of Mrs. Milton McDonald, Maple. The president, Miss Annie Kerr, presided and the Roll Call was answered with a verse of scripture using the word "Honour." Mrs. A. L. McNeil gave an excellent paper on "Thanksgiving" followed with prayer led by Miss Laurena Rutherford. Gleanings from the Glad Tidings were given by Miss Mary Constable. A feature of the program was the presentation of a Life Membership of the W.M.S. to Mrs. Wm. Bishop, presented by Mrs. Elmer Bryson and Mrs. G. Jarrett. A piano solo was given by Miss Laurena Rutherford. An excellent report of the W.M.S. Autumn Rally held at Runnymede Presbyterian Church was given by two of the delegates, Miss Mary Constable and Mrs. S. Jones. Lunch was served by the hostess and the committee.

RICHVALE

Next Sunday, Sunday School at 2.30 p.m. and Church Service at 7 p.m. Mr. Hoddinott will be in charge.

The W.A. are holding a sale of work and home cooking in the church on Saturday, Oct. 27th, at 3 p.m. There will also be a Gypsy Tea.

A free land is one where the violent are suppressed unless they are numerous enough to affect a coming election.

ROYAL WINTER FAIR IN OUTLINE

DATE—November 21-29—Eight days. PLACE—Royal Coliseum, and Winter Fair Buildings, Toronto.

A SYMBOL—Symbolized by Agriculture, the whole Dominion "goes on parade" in Royal Week.

ROYAL OBJECTS—Promotion of Canada's basic industry; to link the nine provinces in common interest; to set high national standards for farm products.

NATIONAL—Distinctively all-Canadian. Entries from Prince Edward Island to British Columbia, from the States to Hudson Bay.

INTERNATIONAL—Uniquely international—a linking on Canadian soil of British and American Show traditions.

FOREIGN—European, American and Empire Army Officers' Teams compete for international trophy.

VICE-REGAL PATRONAGE—Under gracious patronage of Their Excellencies the Governor-General and the Countess of Bessborough.

SOCIAL—A brilliant assembly of fashion and sport nightly at the Royal Horse Show.

PROVINCIAL DAYS—Products from different parts of Canada are given prominence on their "provincial days" at the Fair.

SPONSORSHIP—By all Canadian Departments of Agriculture, and ALL Livestock Breeding Associations.

EXTENT—Over 25 acres, all indoors, steam-heated; 15,000 head of livestock, poultry and birds in luxurious comfort.

TEN BIG SHOWS IN ONE—The Royal Shows for horses, cattle, sheep, swine, dogs, cats, poultry and pet stock, fruit, flowers, seed and grains are large and specialized shows for each.

VARIETY—Vast variety; the assembly of so much excellence under one roof and organization gives the Royal at Toronto a distinctiveness not matched anywhere else in the wide world.

CAPITOL THEATRE

MOVE FARM 400 MILES TO MATCH AUTHENTIC SHOTS

Barn, Livestock and Even Cherry Tree Transported in Filming of "Hide-Out"

They moved a farm 400 miles to make a motion picture.

Although Southern California is noted for its varied scenery, a simple little thing like a New England farm was the toughest problem during the filming of the Metro-Goldwyn-Mayer picture, "Hide-Out," which plays at the Capitol next Friday and Saturday.

Sahara Desert scenes are to be found fifty minutes from Hollywood. A French Riviera can be reached within an hour and five minutes. Typical Alpine peaks are within a two hours' ride. But the nearest "New England" farm was four hundred miles away.

In Santa Cruz County

It was found in Santa Cruz County, California, where forty M-G-M actors and employes spent two weeks filming the exterior scenes for the new picture. Then the company turned homeward to film the interior scenes.

Director W. S. Van Dyke demanded the original barn, so it was knocked down, freighted to the studios and rebuilt. The barn had sheltered a white mare and a Jersey cow. No "doubles" for the animals could be found near Los Angeles, so the original white mare and Jersey made the trip to the movie town.

On "location," Robert Montgomery and Maureen O'Sullivan had climbed a 40-year-old cherry tree for other scenes. None so old could be located near the studio . . . so, in due time, the real tree was forwarded to the studio.

House Built to Scale

And on the same stage, one of the largest in movieland, the Santa Cruz farm house was built to scale, room for room, and with every room furnished exactly like the 40-year-old house 400 miles away.

The new picture, produced by Hunt Stromberg, also has Edward Arnold, Elizabeth Patterson, Whitford Kane, Mickey Rooney and C. Henry Gordon in the cast.

NEWS AND INFORMATION FOR THE BUSY FARMER

Cement Wash Helps

The increased use of wall-board in the construction and lining of poultry houses shows that birds sometimes peck at the wall-board material and do considerable damage. An effective way to overcome this difficulty is to use a mixture of equal parts of lime and cement mixed with water to the consistency of a thick paste, and apply with a brush. This mixture forms a hard, durable surface on which the birds can make no impression.

Information on Tomatoes

Since the value of the tomato has been fully realized, its production and use has increased tremendously, until now in Eastern Ontario alone there are 2,000 growers supplying the canning factories. They plant, in a normal year, over 8,000 acres of tomatoes. The centre where most tomatoes for canning are grown consists roughly of a strip of land five miles wide and extending along the shore of Lake Ontario from Port Hope to Napanee. This includes all of Prince Edward County. In this district there are over seventy canning factories. In addition to the acreage grown for canning, there is a considerable acreage grown for soup companies, who operate in other localities. The returns to the growers from this crop amount to approximately \$800,000 in a year.

It is essential that these growers know the latest methods and the correct prevention of diseases and insects if they are to succeed and to this end the Department has published an excellent circular on the subject which should be in the hands of every tomato grower. The bulletin is very concise and everything is tabulated and easy to find. The circular, No. 3, may be obtained free by residents of Ontario by writing to the Department of Agriculture, Parliament Buildings, Toronto.

Keep the Pullets Well Fed

The time is at hand when pullets should be confined to their winter quarters, but the pens should first be thoroughly cleaned and disinfected. Birds will not do their best work if infested with lice or mites. It is during the winter months that the birds make their best profits, and for this reason they should be housed and fed in a manner that will keep them healthy and vigorous. They will require a full ration of suitable feed, besides plenty of clean water, green feed, shell and grit.

The change from the growing ration to the laying mash should be made gradually. Home-grown grains cannot be sold for much on the market, and while they may form a large proportion of the bird's ration they do not supply all necessary ingredients for the production of eggs. The use of a high protein commercial mash mixed with chopped home-grown grains will give much better results than the grains alone.

Good Care Essential

The properly balanced ration accomplishes wonderful results when fed to stock that is rightly bred, well managed and correctly housed.

Houses and equipment, such as brooders, feed hoppers, drinking pans, etc., that are sufficient to accommodate 100 chicks will not take care of 500. Satisfactory growth cannot be made under such conditions. Growing stock needs lots of feed; provide a good grain feed and a good growing mash in hoppers so the birds can get it.

The condition of a carcass when it is marketed depends almost entirely on the way the bird is cared for up to the time it is killed. This means the way in which it is grown and the way it is fattened for market.

A poorly grown bird will not take on weight satisfactorily; its digestive organs have not developed sufficiently to handle the more or less concentrated feed that is fed during the fattening period, nor does the bird have the vitality to stand up under this fattening process.

Planting of Evergreens

The nurserymen's slogan, "It is not a home until it is planted," is very true; and the farmhouse which has to stand on its own merits, and is often set among unsightly outbuildings, would seem to be more in need of background and foundation planting than the town or city house which, in many cases, gains in value and appearance from the plantings on neighboring grounds. Evergreens are being extensively used for foundation planting now and where circumstances permit are unquestionably the most satisfactory. Once established, evergreens require a minimum of attention and are attractive at all seasons.

Dwarf Mountain Pine, Japanese Yew, and certain varieties of juniper and cedar are most suitable for foundation planting; and, while the cost is greater than for many other shrubs, they are worth the difference.

After planting on the shrubs to be planted, the work can be accomplished over a period of years. In this way the outlay at any one time need not be unreasonably high. Watering can also be better attended to when only a few are planted at a time, because evergreens must not be allowed to dry out during the first year.

Weekly Crop Report

Mangels and turnips are reported to be a very good crop in many localities. Dufferin County farmers have planted only 25% of the acreage of fall wheat seeded last year. Corn growers in North Simcoe have a surplus over the amount needed for silos. Corn ear worm there has been serious causing considerable loss in late crops of sweet corn. Demand for farm labour in Simcoe County has exceeded the supply. Fall plowing and after-harvest cultivation is well advanced in the majority of districts. Livestock is in much improved condition due to improved pastures. Cases of bloat among cattle have been reported in Lincoln County and some have died as the result of eating too much green alfalfa. A larger quantity of alfalfa seed has been harvested in Lincoln than for some years. Oxford reports a big improvement in the feed situation, with an abundance of feed every where. Heavy frost in Prince Edward County caught many tomato vines, pumpkin and other tender foliage. Many canning factories there will cease operations at once. Spring seeding in Victoria County appears to be excellent. Barley was an excellent crop there, selling as high as 72 cents a bushel. A number of cheese factories in Frontenac have closed owing to lack of sufficient milk to carry on. Renfrew County reports the largest acreage of alfalfa that has ever been saved for seed, this year. Yields have reached as high as 350 to 400 lbs. per acre and red clover is giving about 150 lbs. to the acre.

CAN IT BE DONE? - By Ray Gross
