STATEMENTS BY PROMINENT HEALTH

Speakers at a health demonstration in Massey Hall, Toronto, during the past two weeks, noted the fact that the Dominion Government is calling and beauty will prevail?" a conference of provincial premiers at which the health of the Dominion will be discussed. The Prime Minister, the Right Honourable Mr. R. B. Bennett, was congratulated by the speakers and those who had moved resolutions for his action on this matter.

Principal W. L. Grant of Upper Canada College stated that the Dominion government should take a more active interest in health and coordinate all health agencies. By a standing vote more than 1,000 women on one afternoon indicated their approval of Premier Bennett's action and unanimously carried a resolution urging that every possible step be taken to inaugurate a co-ordinated health programme for Canada.

Dr. J. W. S. McCullough, Chief Health Inspector for Ontario, in speaking one evening, presented a startling contrast when he informed the audience that \$300,000,000 is being spent yearly in Canada for medical treatment and only \$6,000,000 to prevent the necessity for such a huge outlay.

Dr. Gordon P. Jackson, Medical Officer of Health, stated in his address that it took the curse of war to awaken many to the absolute necessity of studying the truth of the old saying "an ounce of prevention is worth a pound of cure" and to awaken authorities charged with the care of the health of a community to a sense of their responsibilities.

Judge H. S. Mott, of the Toronto Juvenile Court, stated, "We have found that a sound physical body is necessary for a normal life. A boy who has a sound body and a reasonable knowledge of its functions has a strong chance of overcoming any other handicap with which he may be burdened.

Dr. A. L. McKay of the Provincial Department of Health, stated that constituted health authorities can do much by regulations governing pasclinics and so forth, but it has been left largely to the voluntary agencies to educate the public to take advantage of the knowledge available.

Miss Edna Moore, Chief Public Health Nurse of the Division of Child Hygiene of the Provincial Department of Health, stated, "Every individual, particularly those who live in cities, should assume a personal responsipility in the control of communicable diseases."

"One of every three persons who die has been murdered by society," Rabbi Maurice N. Eisendrath stated to a large audience at Massey Hall during this two weeks' engagement.

Leadership from the top down in a Municipal, Provincial and Federal programme of health preservation was advocated by Dr. L. A. Pequegnat, Deputy Medical Officer of Health for the city.

Dr. R. S. Pentecost, Past President of the Academy of Medicine, stated that the whole future of medicine lay in prevention. His Worship, Mayor Stewart, stated that the Social Hygiene Council had made a great contribution to Toronto's Centennial Year He stated "the city of Toronto is very proud of this work of yours which has gained national recognition. Not only are people benefited who come in direct contact with your organization but every contact made is helpful to every citizen of our Dominion." In concluding his address he stated "! hope that every Premier and representative at the conference will give Premier Bennett the support your splendid movement deserves."

Dr. Margaret MacAlpine said that 'we should aim for the prevention of all diseases so that our country from the Atlantic to the Pacific may be healthy and virile, able to cope with all problems."

Mrs. J. P. Hynes, President of the I.H.C. Tractor Plow, narrow bottom Local Council of Women, stated, "I am so glad that a national health programme may be effected, if only on behalf of the 90,000 women employed in industry in Toronto." Mrs. J. W. Bundy, in presenting a resolution urging "that every possible step be taken servation programme for Canada" | stated that without good health one

cannot enjoy life. Mr. T. A. Stevenson, former secretary of the District Labour Council, stated, "I hope that all citizens of Ontario, as well as the other Prov- Bus. Phone EL. 1744

sentatives at the conference know that national health should receive the utmost consideration."

Miss Jean E. Browne, National Director of Junior Red Cross, stated at a meeting for women one afternoon that "we should be ashamed of our death rate in this country when we consider the amount of knowledge we possess for the prevention of disease. What we need is a national crusade, something which will seize PEOPLE REGARDING NATIONAL the imagination of the people as the Great War did. Is it not possible to inspire men, women and children, especially children, with a desire to make a new Canada in which health

> "By adoption of preventive health measures in Canada our daily sick list could be cut 50%," declared Controller Simpson. "This has been done in certain fields, and we must now make a public attack on cancer, tuberculosis infantile paralysis, heart trouble and our maternal death rate, just as we have with regard to diphtheria and are now conducting in relation to scarlet fever."

Dr. J. T. Phair, Director of the Child Hygiene Division of the Provincial Health Department, stated that "knowledge of disease prevention should not be the prerogative of the few but the right of the many." Dr. Alan Brown, outstanding Canadian child specialist, stated to an audience of men one evening that "there are 307 diseases that a child may have and only 100 of these are important or significant. Of this group only 37 cause 56% of all child deaths, and each is 100% preventable."

Dr. George Porter, Health Director for the University of Toronto, stated that "The Canadian Social Hygiene Council, through its health educational work, is waving the red flag to you and me and all Canada to prevent one of the greatest scourges from seizing | Horse-Shoe Pitching more victims. Life is hard enough for young men to-day without their having, through ignorance, to run the race of life barefooted."

there has been a conspiracy of silence through many centuries regarding there is no metal base enough to comrare with silence on this subject.

taken to develop a co-ordinated health conducted by a special committee. conservation programme for Canada.

LASKAY

A crowd that filled the church to almost more than its capacity at tended the fowl supper and concert under the auspices of the W.M.S. Wednesday last. The musical play from Bolton was well presented and much enjoyed. The event proved very successful both in a social and financial way.

Laskay mixed quartette sang at the Mt. Pisgah fowl supper on Friday. Rev. W. Johnson, minister of the Eglington United Church, gave a very humorous but very practical address on the "Thrills and Spills of Life," some of which were personal.

Y.P.S. members who were fortunate to be present at Epworth United Y P.S., Toronto, last Monday night enjoyed a real treat. The meeting was addressed by Mr. Bruce, a teacher and missionary of Korea, also further program was given by members of the Toronto Mission. These people who have become citizens of our country certainly are not behind anyone in their ability to produce very sweet music.

The sudden death of the late B. Richards, on Saturday, comes as rather a shock to the community. Sympathy is extended to Mrs. Richards and the family Jesse, Mazie and the spring without receiving much Albert. He also leaves a brother and sister, H. Richards of Kleinburg and Mrs. H. Hamilton of Laskay.

Entries in the horseshoe contests must be in the hands of the Manager, Royal Winter Fair, 217 Bay St., Toronto, on November 14th.

Putting Bees Away for Winter Bees that are to be wintered in cellar or dug-out should be carried in immediately after the last good cleansing flight they are likely to get. At the Central Experimental Farm this is usually during the first week in November.

The last two weeks in October is the best time to clean up the garden to reduce insect infestation. Department advises burning all leaves refuse, weeds, fallen fruit and other material after being raked up, and then ploughing or digging the soil deeply. Fences, arbours and trellises should be brushed with a corn broom.

Proper Ration Needed A hen may lay a few eggs early in

feed or attention or she may lay at the end of the season when feed may be picked up in the fields, but the hen has not yet been developed that will lay without the proper ration during the fall and winter months. A good mash is important if the hens are to lay, and it should be before the birds all the time. If any one of the necessary elements required for the making of eggs is absent, production is impaired. Pullets require a little different mash than the old hens and it is a mistake to house them together and have them feed from the same hopper. Home-grown feeds with the addition of some purchased concentrates may be mixed, or a commercial mash may be purchased that will supply the necessary ingredients to the bird. Chickens will pay dividends if properly housed and given the right rations.

Royal Winter Fair The Royal Winter Fair is being held November 21st to 29th, at the Royal Coliseum and Winter Fair buildings,

British Apple Market

Mr. Andrew Fulton, overseas fruit

arriving in England a few weeks ago, he has found the principal markets all heavily loaded with cheap English apples, with the result that ordinary The soybean gives every indication quality Canadian apples are making

He advises Ontario shippers to place such varieties as Baldwins, Ganos, Ben Davis, Greenings and Starks, with shredded oil paper and place them in cold storage until they are required after the New Year. There is no doubt that good quality apples will make good values before the season is finished.

The English apple crop is the largest in many years, the quality is generally very good, though practically every market has more than its share of inferior grades. Values are extremely low, a fact that is influencing the price of coloured Canadian apples.

Ontario Bartletts have met an unfavourable market. The pears have landed in excellent condition, but unfortunately many of them are very small this season, with the result that the market has not been as good as f they had been larger. English pears are quite plentiful, as well as English plums.

It is easy to pick out your inferfors and superiors. Just be courteous and observe which ones get impudent.

Things adjust themselves. Those
