

**THE PAPERS OVERLOOKED HIM**  
The papers overlooked him for he never beat his wife,  
He never tried to rob a bank or take another's life.  
And he wasn't very brilliant and didn't try for fame,  
So there was no real reason for the press to print his name.  
The papers overlooked him—he was never deep in debt,  
He never slipped away from town with all that he could get.  
He never made a million, never wrote a modern play,  
So there wasn't much about him that the editor could say.  
And the more I think about him, it's the ordinary man  
Who's the glory of the nation and the strength of every clan.  
So I pay this tribute to him—not the genius or the crook,  
But the honest, normal, average man the papers overlook.

—Anon.

**Real Automobile Service Offered**

**THORNHILL MOTOR SALES HAVE CHEVROLET AND OLDSMOBILE CARS—ALSO GOOD USED CARS**

As we look back upon the industrial progress of our country, no one particular unit stands out as does the manufacture of automobiles. Getting a closer view of this industry, and an analysis of the various types and makes, we find the General Motors Products have always been the outstanding leaders where lines, perfection of mechanism and true value-giving are concerned.  
The new Chevrolet and Oldsmobile cars have created more interest than any other new car, because they are so startlingly new, new symmetry of design, new riding comfort, new luxurious interiors, and a motor that lives up to the name of dependability.

If one would have the outstanding motor car value in Canada, see Thornhill Motor Sales. Arrange for a demonstration, and they will be glad to point out to you the many advantages of these cars.

So many people have chosen these new cars that Thornhill Motor Sales have on their floor now, used cars that are of exceptional value. Cars that have been fully reconditioned at prices that are worth investigating.

One will here find an authentic line of auto accessories, gas, oils, and greases. They also have one of the most complete parts departments in this section.

In their repair department, as in their sales department, "service" is the motto, and is backed by reputation, proving they render motorists of this district a real service. If your car is in need of repair they have every detail of equipment and the finest experts among workmen to give your automobile whatever attention it needs. This service includes everything from making the smallest repair to completely overhauling or rebuilding your car.

We congratulate the owner of this garage, Mr. W. D. Morton, upon his up-to-the-minute service. Do you know the price range of the Chevrolet and Oldsmobile?

\$3 cash prizes for best constructed set of answers to questions in these "Do You Know" stories. Call the above firm to assist you.

**NEWS AND INFORMATION FOR THE BUSY FARMER**

**Preserve Wild Flowers**  
The wild flowers situation in Ontario is becoming serious, and calls for careful conservation before they become extinct in some sections.

Recently the Ontario Horticultural Association sponsored a request to the Ontario Government that the "Trillium" be constituted the Provincial Flower. Very favourable comment has been made by the Press in many sections of the Province.

Parents, Teachers, Scout Leaders and interested flower-lovers are invited to urge the children to refrain from wholesale picking and destruction of wild flowers, especially where only a few exist. Girls and boys may greatly assist in saving the wild flowers, and parents are asked to give the matter careful consideration.

**Agricultural Features**  
The Wilmot Township Agricultural Society in Waterloo County is to be congratulated on launching a new program. A series of educational meetings has been commenced. At the first of these, the main subjects for consideration were "Control of the Warble Fly" and "Reforestation."

Two other meetings of a similar nature, but on other subjects will be held this spring.

This organization plans to serve all farmers in the Society area, with a general agricultural program instead of being satisfied to function in the holding of a fair only.

On March 8th the South Ontario Agricultural Society gave a complimentary dinner to members who had brought honour to the Society, and Ontario County by winning major awards at National and International Shows. The president of the Society, Hon. W. E. N. Sinclair, was a very genial host, to representative live stock men from other parts of the Province in addition to Directors and Members of the Society.

In presenting illuminated Addresses to these leading stock men, it was made evident the raising of good stock is a cherished tradition in Ontario County, as several families are now in the third generation of prominent stock men. Some of those honoured were—Robt. Duff & Son; Lance Beath; S. B. Glaspell; Wm. Dryden and Frank Batt.

**Cleaning Out Couch**  
The eradication of couch grass, otherwise known as quack, twitch or scutch grass, is one of the hardest problems with which the farmer has to deal. Few people realize the enormous quantity of couch grass roots which exist in infested soil. Tests conducted by the Central Experimental Farm at Ottawa show weights of roots ranging from 1,531 to 6,997 pounds to the acre—as much as a heavy crop of hay. No wonder it is hard to clean out when it spreads by roots as well as seed. Thoroughly cleaning out the roots is the one effective way of getting rid of couch.

In small areas this may be done by hand. In larger areas by shallow plowing and working thoroughly with the cultivator to keep the roots turned up to the sun long enough for them to "kill." Only as large an area as can be thoroughly cleaned up at one time should be undertaken, as half-way measures are only lost time and effort.

**Demand For Canadian Pears**  
A general survey of production of fresh pears in Canada suggests that pear acreage can be increased 20 per cent before the domestic market reaches a saturation point. This situation, together with an increased export demand, seems to warrant consideration being given to the possibility of increased plantings, mainly of the Bartlett variety. The United Kingdom cannot get enough Canadian pears, the British market absorbing all the Canadian exports and asking for more. The 1934 statistics show that 44 per cent of the total imports of pears into Great Britain were from Empire sources, Canada contributing less than five per cent. During the twelve months, ended March 31, 1934, exports of canned pears from Canada to the British market increased 46 per cent compared with the previous season's exports. On the other hand, fresh pears amounting approximately to 180,000 bushels are imported every year into Canada from the United States, a large proportion of this import finding its way into canned stock.

**Hay Market Report**  
Eastern and Northern Ontario: There is still plenty of hay available and farmers who have held their hay since last autumn for firmer prices are now wishing to sell so that dealers are able to discriminate as to price and quality. About 400 tons of hay have been graded in eastern Ontario during the past month for shipment

to the Maritime provinces. Current prices being paid growers range from \$7 to \$9 per ton according to grade and class. Plenty of hay is being offered in northern Ontario and prices paid are somewhat lower ranging from \$9 to \$12 per ton, basis shipping point.

**South-Western Ontario:** A fair supply of timothy and timothy mixtures and alfalfa is still available in the Owen Sound district and there has been some movement of alfalfa recently for meal manufacturing purposes. There is a shortage of hay in a number of counties in this part of Ontario but this is being offset largely by other roughage such as corn stocks and straw supplemented perhaps with molasses, so as to winter the stock without hay. There was a fair crop last year in most counties, which produced a fair quantity of good silage and besides many farmers have plenty of grain, all of which lessens the need for hay. It is believed that most counties will have sufficient fodder to carry their stock until at least April 1st, at which time there should be a fair demand for hay from outside sources.

Prices being paid growers, per ton, at principal market centers less freight costs are: for timothy No. 1 \$16 to \$17.50; No. 2, \$14 to \$16; No. 3, \$12 to \$14; wheat straw \$7 to \$8; oat straw \$5.75 to \$7.50.

**COFFEE AND TEA**  
One habit of to-day which can be blamed neither on the depression nor on the young folk is the use of coffee and tea. Coffee came into use in England about 1650, at which time coffee houses were established, which became centres of social life.

Coffee and tea contain substances, classed as drugs, which produce certain definite effects in the human body. Caffeine is the chief active substance in both coffee and tea. Tea is actually richer in caffeine than is coffee, but as less tea is used in making a cup, there is less caffeine in the average cup of tea than there is in a cup of coffee.

All over the world, man has turned to the use of those plants which he has found from experience have freed him from such unpleasant sensations as fatigue and fear. Tea and coffee are the least harmful of such plants. This we know because tens of thousands of persons use them throughout life without ill effect. There is no evidence to show that, for adults, moderate amounts are harmful.

Tea and coffee give a feeling of exhilaration. They relieve a sense of fatigue. The pulse is quickened as is also the rate of breathing, and muscular action is strengthened. The kidneys are stimulated, resulting in an increase in the amount of fluid excreted.

Tea and coffee are not uniform beverages. They are prepared from varying qualities and quantities of tea leaves and coffee beans, in many ways, resulting in vastly different qualities ranging from terrible to delicious, according to the taste of the consumer. The taste of the consumers varies as does the effect upon the consumer of the stimulating caffeine. Most regular users develop a tolerance so that they can drink coffee and go to sleep immediately afterwards, while the occasional user may be kept awake as the caffeine has rendered his brain keener to sounds which keep one awake.

Tea and coffee are stimulants. They should never be given to children because children are usually over-active and it is undesirable to increase their activity as this leads to fatigue, irritability and sleeplessness. Besides, if the child uses tea and coffee, he will likely lose his taste for and refuse to drink the milk which he really needs.

As individuals, we differ, and the type of person who is forever in motion, who cannot sit still, who is likely sensitive and troubled with insomnia—that type of person is harmed by stimulants.

The average person who uses tea and coffee as a pleasing warm drink does not suffer any ill effects. Some people find that a warm drink helps them to sleep, whether it be tea, coffee, milk, or some advertised food. Be moderate in your use of tea and coffee.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

**Tweddle's R.O.P. Sired Government Approved CHICKS**

Barred Rocks, White Rocks, White Wyandottes, White Leghorns.

Tweddle Chicks are noted for their quality. Read the following ten points:

- (1) We are Canada's largest producers of R.O.P. sired Government Approved Chicks.
- (2) More pedigreed males used than any other breeder or hatchery in Canada.
- (3) More pedigreed chicks from 200 egg breeders than any other breeder or hatchery in Canada.
- (4) Largest official R.O.P. entry in Canada, every one of these breeders being a pedigreed bird from a 200 egg or better hen, all trap-nested under government supervision.
- (5) Only R.O.P. pedigreed males used in every mating.
- (6) Every one of them from a 200 egg or over hen.
- (7) Every breeder blood tested by Dr. Nelson of Guelph by Agglutination method which we believe to be the best.
- (8) Every incubator fumigated by the latest O.A.C. methods which is extra precaution against disease.
- (9) All setting eggs average 25 ounces and over per dozen.
- (10) Every one of our breeders is culled and branded by a Government Inspector.

**TEMPERANCEVILLE**

The W.M.S. met on Thursday afternoon at the home of Mrs. Arwood Harman.

A St. Patrick's supper was held on Friday evening, March 15th, in the basement of the church. The regular Y.P.S. program then followed, with the vice-president, Harry Rumble, in the chair. The topic was given by Mabel Jennings. Jean Umehara rendered a delightful piano solo, and Mae Harman gave a humorous Irish reading on "Pat's Birthday." A half-hour recreational period was then indulged in conducted by Clifford Rumble.

The monthly meeting of the Women's Institute met at the home of Miss Mary Barker on Wednesday afternoon, March 13th. There was a good attendance of members, also quite a number of visitors. With the president, Mrs. Wilkins, in the chair the meeting opened with the Institute Ode, followed by the creed. The roll call was answered by "My Best Garden Hint," which proved very helpful to all. Miss A. Ferguson of King gave a very interesting and instructive talk on gardening. A paper was read by Mrs. Jack Brown of Oak Ridges. She gave an account of a special meeting of the Oak Ridges Women's Institute which was held at the home of Mr. J. C. Durham in May 1927. The meeting closed by all singing the "Maple Leaf Forever." A dainty lunch was served by the hostesses, Mary Barker and Mrs. Geo. Thompson.

Mr. and Mrs. Norman Rumble visited relatives in Toronto on Saturday.

Mrs. F. Pugsley spent Thursday in Toronto visiting friends.

Mrs. W. Whitten and the Misses Ella Dibb and Ella Kerswill attended the funeral of the late Mr. Taylor of Finches Corners on Tuesday.

Mr. and Mrs. Giles Kerswill and son Jim visited Mr. and Mrs. Geo. Kerswill of Markham on Tuesday.

The A.Y.P.A. met in the parish hall on Monday evening. Plans were made to start an autograph quilt. Each member is requested to collect as many names as possible the fee being ten cents or three for twenty-five.

The local A.Y.P.A. will entertain the Toronto Local Council sometime in April. Further announcements will be given later.

Short engagements are better. The bride hasn't time to wear out her finery showing it to friends.
