ONE OF THE BEST CHICK VALUES YOU CAN BUY

Dollar for dollar, Bray's "Xtra-Prof" chicks offer you one of the best values in chicks you can find anywhere. They are not the "cheapest" chicks you can buy, but they do the things that count most in producing year-round poultry profits.

- 1—They live with few losses during brooding. Many customers report losses of only 3 or 4 chicks out of a hundred.
- 2—The cockerels grow rapidly and are ready for market in the least possible time. They make 2 to 2 1/2 lb. broilers in 8 to 9 weeks—or 6 to 7 lb. dressed chickens in the Fall.
- 3—The pullets grow large and mature early. Most Bray pullets begin laying at 5 months old and often Bray flocks are laying 50% at 6 months.
- 4—The size of the eggs rapidly increases once the pullets commence to lay. During 5 months including November and December, one of our customers graded out only 6 dozen "pullet" eggs from the entire production of 102 Bray Barred Rock pullets.

One of the main reasons for the success of Bray's "Xtra-Prof" chicks is this. They are hatched from eggs weighing 25 ounces up to 30 and 32 ounces per dozen. They are bigger than average when hatched, and keep on growing and maturing faster than most other chicks of the same age.

Stop in and get a copy of our Free booklet. See for yourself what Bray's "Xtra-Prof" chicks can bring you in dollars and cents, next Fall.
