

# THE LIBERAL

## CONTINUES

### Its Sensational Offer

# Facts

The New, Modern, Up-to-date, Pictorial Encyclopedia Available to its Readers at only a Fraction of its Original Cost.

This Set is New and Complete—the latest published by the world's largest publishers, Doubleday, Doran & Company.

It is the most modern Encyclopedia published, condensing into four large beautifully bound volumes more reliable up-to-date information than has previously been found in old ponderous types of encyclopedia containing 10, 12 or more volumes.

Come in, if you wish, and examine the Set at The Liberal Office

See how the world's largest publishers have maintained their reputation of compiling authentic, reliable and interesting information to produce a complete Encyclopedia second to none.

# FACTS

**Contains**  
 Four Large Volumes  
 3,200 Explanatory Pictures  
 72 Maps  
 Over 1,000,000 Words  
 Deluxe Artcraft Binding  
 30,000 Separate Subjects  
 Full-Page Illustrations  
 Color Plates  
 Time-Saving Abbreviations  
 Charts and Diagrams

**With Coupons ONLY**

**\$4.95**  
 Plus Duty and Transportation

Picture shows actual size. Each volume measures 6 1/2 x 9 1/2 inches.

**You Will be Proud to Own and Display This Set**  
**ACT AT ONCE ! The Richmond Hill Liberal**  
**CAN'T CONTINUE THIS AMAZING OFFER INDEFINITELY**

To co-operate with our readers we have made it possible for you to obtain this outstanding set, bound in DeLuxe Artcraft Binding, at such a sensationally low price. The offer is limited, and it is advisable that you start saving your coupons NOW in order to avoid disappointment. Here's how you get your Set:

Clip and save Two Coupons from these announcements. Mail or bring the coupons to The Liberal Office, with only \$4.95. Your Set of FACTS will be sent you, transportation and duty charges collect.

THE LIBERAL,  
 RICHMOND HILL, ONT.

I am a reader of THE LIBERAL and accept your offer on FACTS, the New Concise, Pictorial Encyclopedia for only \$4.95, plus duty and transportation.

(Send Two Coupons and \$4.95 to The Liberal Office. You pay duty and transportation on arrival of books).

## NEWS AND INFORMATION FOR THE BUSY FARMER

**Swede Roots for Seed**  
 Swede roots for seed may be stored either in outside pits or in a dark, well ventilated cellar, free from frost, yet sufficiently cool to keep them from sprouting too early in the spring. When the roots are pulled the tops should be cut off about an inch to an inch and a half from the crown.

**A Good Time to Raise a Foal**  
 According to the Dominion Animal Husbandman there is at present a definite scarcity of good, fresh, young horses for farm and city work and an increasing demand for them at fairly remunerative and generally increasing prices. Since it takes four or five years to breed, raise and develop a horse to marketable age, it will be some time before the demand can be satisfied, therefore present prices may be expected to hold or even improve for a number of years. It would seem, therefore, that it would be a profitable venture for any farmer who has a reasonably good draft brood mare, that he can spare from heavy work, to breed her and raise a foal.

**Potatoes as Stock-Feed**  
 When the true value of potatoes as feed for live stock and poultry is realized, much larger quantities than at present employed will be used. With high prices for stock and poultry feeds and a surplus of potatoes in Eastern Canada, stock raisers near the plentiful supplies of potatoes have a good opportunity to reduce their feed bills by feeding potatoes. Other countries make much use of potatoes as stock-feed. In Germany for instance, only 30 per cent of the total potato crop is used for table purposes, and approximately 40 per cent for stock feeding. On the other hand, in Canada 64.5 per cent of the crop finds its way to the table and only about 11 per cent for stock feeding. Stock raisers, would be well advised to inform themselves on the proper methods of feeding potatoes in the rations to ensure the best results. In brief, potatoes are in fact "watered" carbohydrate concentrates. They may be used, therefore, as a substitute for barley and corn, as in the rations of pigs, in which case it is important to bear in mind that four pounds of potatoes are equal to one pound of cereal meal.

**Assistance for Sheep Industry**  
 Ontario sheep breeders and sheep raisers are again to have the benefits of the Ram Grading and Ram Premium Policies. The government realizing the importance of a continuous policy in the production and use of good rams are providing liberal assistance so that farmers may buy good rams with confidence at a reasonable cost to the purchaser. The Government is anxious that purebred breeders of sheep should continue to improve the purebred flocks so that better quality rams and ewes may be produced. Furthermore, it is hoped that as a result of the use of graded rams on grade flocks throughout the province, the quality of market lambs will show a marked improvement.

All purebred breeders will be given an opportunity to make application for the Ram Grading Service and the premium which will be paid on graded rams will be as follows:

On the Purchase of	Bonus Payable By Dominion Department of Agriculture
XX Ram Lamb	.....\$4.00
XX Yearling Ram	..... 6.00
XXX Ram Lamb	..... 6.00
XXX Yearling Ram	.....10.00

These premiums apply only on rams officially graded under the Federal Ram Grading Policy in 1935.

Applications for Ram Grading should be mailed to James Telfer, Paris, Ont.

**Cutworm Control**  
 Although the farmer knows much about the matter, the amateur gardener little suspects that long before he sows his highly-prized seeds an enemy has been waiting in preparation for immediate assault. This is the cutworm which attacks all kinds and conditions of plants, and so far as agriculture is concerned, is such a menace that each year the Dominion and Provincial Departments of Agriculture publish the latest intelligence on the most effective means of counteracting the ravages of this destructive pest. Bran bait, has given most effective control for many years and it is made up as follows: bran 20 pounds, Paris green 1-2 pound, molasses 1 quart, and water about 2 1-2 gallons. In making the bait, the dry ingredients should be mixed thoroughly first. The molasses is then stirred into the water and this solution added to the bran and Paris green. In mixing the bait, only enough water should be added to reduce the material to the consistency

of wet sawdust. The mixture must not be made sloppy but should be so that it will crumble in the hands and slip through the fingers easily. Land that was heavily infested last year should be treated before the plants are set out. This is done by broadcasting the bait at the rate of 15-20 pounds per acre a few nights before transplanting. The bait should be spread in the evenings just before dusk, and, if possible, on a still warm night.

**Housing Farm Equipment**  
 Want of care of farm equipment causes heavy inroads into the operating costs of a farm, and the fact is not always appreciated that a machine should not be left out in a field or shed unless properly protected at all times from the effects of weather. It is not always feasible to afford this sort of protection to machinery on a farm, but a great deal more can be done to prevent deterioration than is sometimes the case. Machinery requires suitable housing all the year round, if the overhead is to be kept in check, although often in the exigencies of farming this is not always an easy matter. In the absence of proper protection from the weather, rust and decay play havoc with the various parts, and careful farmers make it a rule to get their machines under cover as soon as possible. These farmers know that stabling for machinery is as necessary as for the live-stock. Besides building inexpensive but efficient sheds for their machines they make it a rule to inspect each machine every day to see that the bearings have been properly oiled, that the nuts are tight, and the working parts are in alignment and working smoothly. These precautions have saved money, prevented loss through delay, and obviated exasperation and worry. The present-day machine-worked farm really requires to be equipped with a forge, an anvil, a stock of dies, a drill, a tool grinder, and sets of hammers, wrenches, punches and chisels, not to mention a supply of stock repairs for replacement of parts.

### Chimneys Repaired

It is cheaper to build a chimney than it is to be burnt out of house and home. Delay in this regard may mean a fire. Stone and brick walls pointed.
