NEWTONBROOK

The W.M.S. will hold its regular monthly meeting next Tuesday, Feb. 18, at 2.30 p.m., at the home of Mrs. W. T. Wells. Mrs. E. M. Benton, 2nd Vice-President of Toronto Centre Presbyterian, will be the guest speaker. Every member is requested to attend. Visitors welcome.

Miss Gladys Sutterby, convener of the Missionary Department, was in charge of the Y.P.S. meeting last Monday evening. A very fine missionary program was presented with several members taking part. It was arranged to hold a sleigh drive on Friday evening returning to the Sunnyside School room for refreshments. Although the evening was very cold and stormy there was a splendid attendance.

Mr. Clifford Brett and Mr. Jack Duggan will be in charge of the meeting next Monday evening. The topic of "Christian youth building a new world" with discussion, will be continued.

A lecture "Hitch hiking around the world" illustrated by lantern slides will be given by the Toll Brothers (sons of Rev. S. L. Toll) on Tuesday evening, Feb. 25th, at 8 o'clock at Newtonbrook United Church, under the auspices of the Y.P.S. This lecture comes very highly recommended so plan to come.

The Women's Association met last Friday at 10.30 a.m. for a sewing meeting. The business meeting was held after luncheon with the Vice-President, Mrs. A. W. Stephenson, presiding, and who led in the devotional service assisted by Miss E. Street and Mrs. F. Foreman. Plans were made to have a St. Patrick Supper on Thursday evening, March 5th.

The Girls Mission Circle will meet this (Thursday) evening at the parsonage.

The W.M.S. Day of Prayer will be held on Friday, Feb. 28th, in Willowdale United Church.

The postponed meeting of the Sunday School executive of Newtonbrook United Church was held at the home of the Superintendent, Mr. A. W. Galbraith, last Tuesday evening with a fine attendance present. Mrs. Halbert gave the report of the Markham R. E. Council which met a couple of weeks ago.

Mr. R. Pharaoh of Guelph spent last week-end with his brother, Mr. W. Pharaoh, Finch Ave.

Mrs. St. Clare of Los Angeles, Cal., is visiting her sister, Miss Ada Stephen, on Steeles Ave.

The song service in the United Church was very much enjoyed last Sunday evening, all joining heartily in singing the old favorite hymns. A duet was sung by Rev. A. H. Halbert and Mr. Geary.

The Red Cross Society gave the children at York Cottage a St. Valentine Tea and entertainment last Wednesday evening. Several members of the Red Cross attended the tea.

The boys and girls of Newtonbrook are thoroughly enjoying the skating season. Two fine rinks are at their disposal without charge, the Public School rink and one on Petawawa Ave. which are kept in splendid condition.

The North York Horticultural Society met last Monday evening with a large attendance. The guest speaker was Rev. Tebbs of Burlington, better known as "Old Man Sunshine" or "Dick the Amateur Gardener of Radio Fame." His lecture was illustrated by beautiful colored lantern slides which were very much enjoyed. The President, Mr. W. T. Wells, was in charge of the meeting.

The annual meeting of Toronto Centre Presbyterian W.M.S. was held last Thursday in St. James-Bond United Church. Those who attended from the local auxiliary were Mrs. Hicks, Mrs. Soden, Mrs. A. Brown, Mrs. Halbert and Miss Case.

BUSY FATHER, 98

Has 'Boy' Cut Off County Relief Lists Milwaukee—"Soda Ash Johnny" Horan, 98, vowed that as long as he could work "no boy of mine is going on the county," and his son's name was removed from the list of county pension applicants to-day.

Horan, who celebrated his 98th birthday Thursday on the job at the Milwaukee railroad shops, is the oldest active rail worker in the United States.

His boy, William H., who is 66, had applied for an old age pension but the plea was dismissed in court when the elder Horan and a nephew arranged to contribute toward his support.

The father, nicknamed "Soda Ash" after he introduced that chemical in the washing of locomotive boilers, has worked 82 years almost continuously for the road.

William put in 53 years for the line as engineer and call boy, but was forced to retire in 1931 because of ill health.

NEWS AND INFORMATION FOR THE BUSY FARMER

Elgin County was the leader in the Western Ontario district for the highest percentage of first grade cheese in 1935 with Oxford in second place. Oxford was first for the highest average score with Perth in second place, according to Frank Hems, chief dairy inspector for Western Ontario.

The application of fertilizers to plants through the air instead of the soil is foreshadowed by Dr. Earl S. Johnston of the Smithsonian Institution. He had conducted an experiment in which he said wheat produced better by feeding it large quantities of carbon dioxide, a common constituent of air. The experiment showed wheat plants which received about four times as much carbon dioxide as is normally present in air produced more and heavier heads, more grains, and heavier straw than plants grown in air alone.

Market For Toronto

Hon. Duncan Marshall, Ontario Minister of Agriculture, has announced a committee headed by Paul Fisher of Burlington, an official of the Ontario Vegetable Growers' Association, is investigating his proposal for a \$1,000,000 wholesale fruit and vegetable market in Toronto.

Mr. Fisher has visited Montreal and Detroit to inspect similar markets, and presented the Minister with an interim report.

After a full report has been made Mr. Marshall will call a meeting of growers in the latter part of February to go further into the proposal. The plan is to have this market near the waterfront in Toronto and provide under one roof facilities for growers disposing of vegetables and fruit.

Mr. Marshall said some time ago the main problem connected with the project was one of finance, and at that time he indicated the Provincial Government would not likely make a contribution.

The Plowing Match

Efforts are being made by organizations in Guelph to secure the International Plowing match for 1937. This event is to be held this year near Cornwall and the custom is to alternate between eastern and western Ontario.

There has been a steady growth in the number of entries in the ploughing match since it was organized in 1913. This growth in the number of entries has been paralleled by a corresponding increase in attendance. For the first two years, the match was held at Sunnybrook Farm, Toronto, with 32 and 29 entries, respectively. By 1919, when the contest was held at Chatham, and tractor competitions were introduced, the number had risen to 90, while two years later at Woodstock it jumped to 216.

When the competition was held at Stratford in 1930 there were 439 entrants, and last year at Haldimand County, near Caledonia, there were 544.

Clover and Grass Seeds

A fair demand continues for most items and prices have changed little during the past month. There is still available in eastern Ontario some 350,000 pounds of red clover, 250,000 of alfalfa, 50,000 of alsike, 300,000 of sweet clover and 2,000,000 pounds of timothy in principal production localities. Alsike is in particularly good demand at the present time with little available and timothy and red clover are in stronger demand at present than alfalfa and sweet clover.

Prices to growers based on cleaning to no. 1 grade range from 10c. to 15c. for red clover; 10c. to 13c. for alfalfa and 3 1/2c. to 5c. for timothy. Most of the good alsike has already been sold and that remaining is selling at from 10c. to 15c. per pound.

In south-western Ontario timothy is plentiful but mostly of the lower grades due to off colour and hulling. Some 4,000,000 lbs. are estimated in this part of the province. The alfalfa and alsike has nearly all moved to the trade. Red clover is being threshed steadily and is in fair demand.

Prices paid growers based on cleaning to no. 1 grades range from 10c. to 12c. per pound for red clover; 14c. to 16c. for alfalfa; 12c. to 15c. for alsike; 3c. to 4 1/2c. for sweet clover; 3c. to 4 1/2c. for timothy and 3 1/2 to 4c. for country run Canadian blue grass.

There is still some seed in north-western Ontario in the Oxdrift and Emo districts, possibly 13,000 pounds of red clover, 55,000 pounds of alsike and some mixtures. A large quantity of timothy-alsike mixtures is reported in northern Ontario but a great deal of it is low grade owing to immaturity.

Corn Borer Threatens

The corn growers of Southwestern Ontario are viewing with more or less alarm the amount of corn still standing and the absence of clean-up measures in some fields that should have been instituted last fall in order to control the corn borer. The borer has not been so prevalent the past two or three years, but it has by no means been eliminated, and there were enough borers in the corn last fall to create a real menace to the crop next year if the weather should be favourable at the time the moths are emerging.

At a meeting of the Ontario Corn Growers' Association the following resolution was endorsed: "Whereas it is the considered opinion of the Ontario Corn Growers' Association that control measures as recommended by those in charge of the administration of the Act are important factors in the control of the corn borer we respectfully ask that municipal and county councils in the corn growing area urge the ratepayers to make every effort to effect a highly satisfactory cleanup of the large 1935 crop, an unusually large percentage of which remained standing as winter approached. With this in mind we would further recommend that the county corn borer inspectors commence activities immediately and by so doing render valuable service to the individual grower and to the farmers of Southwestern Ontario generally.

Breeding Troubles

Following long winters with deep snow, as this winter promises to be, a great deal of trouble is unusually experienced with hairlessness in young pigs, goitre in calves and lambs, and joint ill in foals. It is suggested that these troubles may be traced to a lack of iodine in the thyroid gland of the pregnant female, losses from this cause may be avoided by feeding iodine, in the form of potassium iodide.

Potassium iodide has a generally stimulating effect, toning up the whole system, and exerts a particularly strong influence on the generative organs. Females which are apparently non-breeders will often become pregnant after this drug has been administered for a few months.

For cows, dissolve two ounces of Potassium iodide in a cup of warm water; sprinkle this solution over 700 pounds of salt spread evenly and in a thin layer on a clean floor, and mix well. When the salt is dry, place it in a box where the animals have free access to it. For ewes, follow the same method as for cows.

For sows, dissolve one ounce of potassium iodide crystals in one gallon of water, and mix one tablespoonful per sow daily in the feed or drinking water. For mares, give each mare a half teaspoonful of potassium iodide in the feed grain or water on the first and fifteenth of each month.

When dizzy spells Make You Feel Unsafe, Just Try

Parke's LIVER TONE

It stimulates a lazy liver to healthy, normal action and soon restores you to your usual normal health. It is a harmless corrective for constipation, biliousness, headaches and dizziness.
