CATCH

In Tottenham, England, Mayor E. A. Jay published the letter of an unnamed British soldier stationed on the lonely island of Mauritius in the Indian Ocean, asking for a wife who is "blodne, lively, a non-smoker about five feet three, not too plump." Of himself he mentioned only his hazel eyes. Mayor Jay got applications from 250 British women, forwarded them without comment to Mauritius.

Toronto is the Dominion's largest Scouting centre, with 9,700 Scouts and leaders, a net increase during 1935 of 1,240.

NEWS AND INFORMATION FOR THE BUSY FARMER

With regard to the export of live poultry from Canada to the United States, there is no duty charged on properly marked return crates, but a duty of 30 cents per crate is charged Canadian shippers on the return of their crates into Canada, unless, prior to shipping the poultry to the United States, the Canadian shipper has the crates properly tagged by a Canadian Customs official as being of Canadian manufacture. A Customs stamp is placed by the Customs officer on wooden crates, and a metal seal is attached to metal crates. In order to have this stamp placed on the coops, it must be requested by the Canadian shipper.

Poultry Shipments to U. S.

The trade in live poultry from Canada to the United States has again become a factor of considerable importance to the poultry industry in Western Ontario as a result of the tariff reductions made effective under the recent Canada-United States Trade Treaty. During January, 1936, shipments of live poultry to nearby United States points, chiefly Buffalo, N.Y., amounted, according to unofficial figures, to 11,233 head. In January, 1935, shipments totalled only 566 head. By the terms of the Treaty the United States duty on live poultry was fixed at four cents per pound. It previously had been eight cents per pound.

Shipments are made up largely of fowl. Prices on live fowl at Montreal and Toronto at the present time are approximately five cents higher than last year.

Hay Market Report

There has been practically no change in the hay marketing situation during the past month. Large supplies of the 1935 crop are still available in growers' hands. The demand is generally poor at present owing to local farmers' supplies being plentiful and the terminal markets and large stables stocked heavily with hay last fall. The Toronto market is still receiving some hay from eastern Ontario. Large quantities of market hay are reported generally throughout the province and particularly from the northerly sections and the Ottawa Valley. In the heavy alfalfa hay producing area between Markdale and Meaford and vicinity, a fair quantity of alfalfa hay is being ground into alfalfa meal. The low prices being paid for this hay are enabling the grinders to compete on export markets with this product.

Prices per ton to growers are: for no. 2 timothy mixtures \$7.50 to \$8.50, for no. 3 \$5.50 to \$6.50, for alfalfa \$4 to \$10 depending on location, and for straw \$2.50 to \$3. At Fort William clover mixtures are selling at about \$9 per ton in car lots.

To Provide Information

Ontario vegetable growers will have accurate and up-to-the-minute crop, storage and marketing information, provided by the Provincial Government, S. H. H. Symons of the Ontario statistical department, told the Growers' Association at their convention in Toronto.

The scheme is part of a federal system sponsored by the Dominion Bureau of Statistics in co-operation with the Canadian Horticultural Council and Provincial Governments to gather crop growing, yield and marketing information.

The Ontario service, as planned tentatively, will include publication of five reports, Mr. Symons said, the first to be issued May 1, giving estimated acreage of various crops and the proportions of such acreage for marketing and canning. The second, issued June 15, will provide a further check on acreage and information on growing conditions. A third, July 15, will cover crop conditions and marketing prospects, and a fourth Sept. 1, will record marketing prices. The fifth, Nov. 5, will record the yield, storage amounts, and marketing prices during the year.

New Horticultural Head

J. B. Spencer, B.S.A., of Ottawa, was elected President of the Ontario Horticultural Association at the 30th convention of the Association held recently at Toronto. No man in Canada is more worthy of this honour, for he has devoted his life and talents to the betterment of Canadian horticulture and agriculture. As a successful horticulturalist, and expert agriculturist, author, and trained newspaper man, Mr. Spencer has never spared himself in the interests pertaining to horticulture and agriculture.

For several years he has been an officer of the Ontario Horticultural Association, is a past president of the Ottawa Horticultural Society, a mem-

ber of the Canadian Society of Technical Agriculturists, a graduate of Ontario Agricultural College, and is an active member of the Federal District Commission, Ottawa. He is also famous as a rose grower, and in community circles has given much practical advice on the growing of trees in city streets. He was secretary and editor of the Dominion Government agricultural commission which studied the various phases of production, curing, and marketing of bacon in Denmark and in the United Kingdom. His report, together with other bulletins covering the sheep, beef, and swine industries, are authentic works of reference.

Legume Inoculation

This time of year when farmers are making preparation for seeding, the question arises whether or not alfalfa, clover or other legume seed should be inoculated before sowing. The answer depends on the circumstances.

Where a legume is grown for the first time the proper nodule-forming bacteria are often lacking in the soil, and inoculation is strongly advised. Where the same crop has been grown within a few years there are probably sufficient bacteria in the soil to inoculate successfully a fresh seeding. Bacteria of some legumes survive in the soil longer than others without the host plant. Recent experiments indicate that red clover bacteria may survive in soil better than alfalfa and sweet clover, or pea and vetch bacteria. After a lapse of years, therefore, re-inoculation appears less urgent with red clover than with the others.

Even where the soil contains sufficient bacteria to produce nodules, re-inoculation may be of benefit. Investigations have shown that there are good and poor strains of nodule bacteria. Therefore, re-inoculation may be very helpful by introducing a good strain of bacteria into the soil having a much higher power to fix nitrogen and thus help the crop and the soil.

Farmers should realize however, that inoculation is only one factor in the production of a successful legume crop and cannot overcome other unfavourable factors such as poor seed, acid soil, poorly prepared seed bed, etc. The only unfavourable factor it can overcome is lack of nitrogen in the soil, and the poorer the soil is in nitrogen the greater the gain will be from inoculation.

NEWMARKET HIGH SCHOOL WINS HULSE CUP

In the final round of the North York Inter-School Debating League, Newmarket High School scored a double win over the representatives of Earl Haig, Collegiate Institute and captured the T.A.M. Hulse trophy for 1936.

Upholding the affirmative side of the subject: "Resolved that the New Trade Agreements with the United States offer greater advantage than disadvantage to Canada."

The Newmarket team, of Dorothy White and Thomas Johnston defeated Cecil Clark and Eileen Trimbee at Willowdale, while at Newmarket, Lillian Watson and Herbert Squires successfully upheld the negative side of the subject, against Esther Purdy and Merrill Cox of Earl Haig.

Last year Earl Haig Collegiate Institute scored a double win in the finals against Aurora High School. Miss Purdy and Mr. Cox who were this year defeated by a narrow margin being the members of the 1935 Championship Team.

The six debates held this year provided exceedingly keen competition between the schools, victor and vanquished being separated by only a few points in each case. The depth and soundness of the arguments advanced and the platform ability of every speaker was of a high calibre. The debates were held under Intercollegiate rules, style and material being judged on an equal basis.

Isn't science grand? It teaches us that acquired traits can't be inherited, but they cause evolution.

THE PROPERTY OF

FRANK GRAHAM

Lot 19, Con. 2, Vaughan

1 1/2 Miles West of Richmond Hill on Maple Sideroad

WEDNESDAY, MARCH 11th

at 12 o'clock noon

HORSES

- 1 Grey Mare, Percheron
- 1 Grey Gelding, Percheron
- Above team well matched.
- 1 Bay Mare, General Purpose
- 1 Percheron Gelding, 1700 pounds

DAIRY

- 1 Cream Separator, Primrose, good
- 1 Milk Strainer, Rapid Flow
- Number of Milk Pails
- 1 Milk Plunger
- 1 Dai y Churn, No. 3
- 1 Butter Bowl, Ladle and Print

CATTLE

- Rose Echo Spofford (No. 230916)
- 5 years old, due time of sale.
- Mollie Alcartra Echo Segis (No. 219817). 5 years old, due time of sale.

About 50 Bags Seed Dooley Potatoes
Quantity of Ensilage

IMPLEMENTS

- 1 Tractor, Massey-Harris, 12-20, new
- 1 Tractor Cultivator, 17 tooth, M.H., new
- 1 Tractor Plough, M.H., new
- 1 Cultivator, 13 tooth, good
- 1 Disc Drill, I.H.C., almost new
- 1 Manure Spreader, M.H., new
- 1 Steel Drum Roller
- 2 Sets 4 Section Harrows
- 1 Binder, 7 ft. cut, M.H., new
- 1 Set Grain Lifters
- 1 Mower, 5 ft., I.H.C.
- 1 Hay Rake, good
- 1 Corn Cultivator with Discs complete, M.H.
- 1 Lumber Scufflers, M.H., new
- 1 Lumber Wagons, good
- 1 Set Heavy Sleighs
- 1 Flat Rack
- 1 Set Hay Racks
- 1 Stock Rack
- 1 Milk Wagon
- 1 Cutter, Trench
- 1 Set Milk Sleighs
- 1 Wagon Box
- 2 No. 21 Flurry Ploughs
- 1 Potato Plough
- 1 Power Jack
- 1 Fanning Mill, Chatham
- 1 Set Scales, 2000 lbs.
- 1 Cumming's Cutting Boxes
- 1 Gas Engine, 2 1/2 h.p.
- 1 Set Distributor Pipes for Silo
- 1 Block and Tackle and Rope
- 1 Fleury Grinder, 10"
- 1 Set Stewart Clippers
- 1 White Wash Sprayer
- 1 Orchard Sprayer, complete
- 1 Potato Sprayer
- 1 Cyclone Grass Seeder
- 1 Sickle Grinder
- 1 Wheel Barrow
- 1 Hay Knife
- 1 25 ft. Ladder
- 1 Stone Boat
- 1 Poles and Neckyokes for Team
- 6 Sets Team Doubletrees
- 1 3 Horse Doubletree
- 1 Sets Twin Neckyokes
- 3 Neckyokes
- 2 Bag Trucks
- 1 Grain Cradle
- 3 Tarpaulins
- 2 Crow Bars
- 3 Logging Chains
- 2 Picks
- 1 Post Hole Auger
- Several Lightning Rod Points and Cable

POULTRY

- 35 White Leghorn Pullets
- 35 Barred Rock Pullets

These Pullets are from Bray's best strain.

This is a selected herd of fully accredited Holstein Cattle. In the last six months this herd has had an average dairy test of 3-5 and 3-6.

HARNESS

- 1 Good Set of Brass Mounted Harness
- 1 Set Milk Harness
- 1 Set Plough Harness
- 1 Set Show Delivery Harness
- Several odd Bridles and other harness
- A number of Collars, all sizes

FURNITURE

- 1 Childs Crib
- 1 Childs Cradle
- 1 Small Table
- 3 Kitchen Chairs
- 3 Chairs, perforated seats
- 1 Rocking Chair
- 1 Market Chair
- 1 Wardrobe
- 1 Rubber Bath Tub
- 1 8 Day Kitchen Clock
- 1 Long Bench
- 1 Extension Table
- 1 Cadalac Carpet Sweeper
- Several Oil Lamps
- 5 Sad Irons and Handle
- 1 Lawn Mower

Number of Cedar Posts
Number of Grain Bags
2 Sets Ice Tongs
2 Iron Kettles
2 Copper Kettles
2 Gasoline Drums
And numerous other articles too numerous to mention.
