HYDRO RANGE CAMPAIGN

The Ontario Hydro and the local Hydro commission are to be commended on their enterprise in offering attractive inducements to hydro users to install ranges and additional electrical equipment. True the more equipment installed the more electric current will be used which is good business for the Hydro, nevertheless the inducements offered are attractive enough to interest the average consumer.

BETTER LIGHTING FOR YONGE STREET

In urging that the electric light commission investigate the possibility of improving the lighting of Yonge Street at Monday night's council meeting Reeve J. A. Greene expressed the wish of the great majority of citizens. Yonge Street in Richmond Hill at the present time is not adequately lighted and a poorly lighted main thoroughfare is a very poor advertisement for any town.

YONGE STREET WIDENING

The widening of Yonge Street from Steele's corners to Richmond Hill recognized by everyone as an urgent necessity appears to be shelved at least for another year. Then there is talk of a parallel road several miles to the west designed to relieve congestion on Yonge Street and if it is proceeded with and justifies the hopes of its sponsors Yonge Street widening may be indefinitely postponed.

The big hold-up as far as Yonge Street widening is concerned seems to be the uncertainty surrounding the continued operation of the North Yonge radials. There are rumors which persist that sooner or later the service will have to be discontinued because of recurring deficits on operation. As long as there is uncertainty as to the continued operation of the car line the Department of Highways apparently does not feel justified in going ahead with the widening on the east side of the car tracks.

The radial question should be definitely settled so as not to further hold back Yonge Street widening and Yonge Street development. If it is thought that there is any considerable sentiment in favor of discontinuing the radial service on account of the heavy deficits the question should be put to the people to decide the issue. The people of the North Yonge Street district voted to buy the radials and if they are to be discontinued it should only be after the people have expressed their opinion in a vote.

THOSE WHO WANT NO WORK

The startling statement that 10.4 per cent of Canada's huge relief army never have been employed was made in the House of Commons recently by Hon. Norman Rogers, Minister of Labor, in a survey of national conditions. Of course, the greater proportion of this ten per cent is made up of youths who have come into manhood since the depression began, and who unfortunately have never been able to secure a job, and who consequently have never known the discipline of work.

Included in that 10.4 per cent., however, are the loafers, who never have done any continuous work in good times, and for whom relief has been even more welcome than the flowers in May. It has saved them the necessity of tramping around the country in search of handouts. Ne'er-do-wells have shared in the country's bounty along with the deserving unemployed. They are parasites upon those who would work if they could as well as upon the taxpayer, for they bring discredit upon the whole class of relief recipients by their laziness.

Ah kin lie down and sleep beside it."
