### HERE'S CORRECT ANSWER TO QUERY

Don't feel badly if you fail to find all of the "f's" in the sentence—not one in a hundred does, even after several readings. If you have discovered four "f's" in the sentence your average is good. If you find five "f's" you are decidedly above average and if you discover six "f's" you rank 100 per cent. In other words, you make a perfect score. The word "of" is repeated twice and that's where most readers slip up. The six "f's" are found as follows:  
The Federal Fuses are the ultimate results of scientific investigation combined with the Fruits of long experience.  
Now bet your friends that they can't discover all the F's and you win nine times out of ten.

### THORNHILL

The Young Ladies of the United Church after a winter of many activities, meetings etc. held a banquet in the Sunday School rooms last Thursday night at 7 o'clock. The tables were beautifully decorated in pink and green, with bowls of spring flowers and roses. The menu was a very tempting one and all the girls did justice to the good things. Mrs. A. Henderson added to the enjoyment of the evening by reading the tea-cups which revealed many things for some of them, which will take place in the near future. The meetings will be continued in the early fall.

These talks by Mrs. Spencer through the year have been very interesting and educative and were much appreciated by the members. The bale of clothing will be packed Friday night in the School room.

A number of men were present at 12.30 and partook of the sumptuous lunch and the ladies came at 1.15. The luncheon was opened by a few remarks from Mrs. R. Simpson, the singing of God Save the King and the Blessing. Mrs. K. Armstrong sang two solos which were much enjoyed. The guest speaker, Miss Hart of the Fred Victor Mission, Toronto,

gave in a splendid manner, the information so many were wanting to hear, how things were carried on in the down-town section among the unfortunate ones. Miss Hart, on completing her talk was presented by Mrs. A. J. Thompson, with a huge bunch of lily-of-the-valley, also thanking her for coming out to speak at the gathering.

Great Britain always seemed to be able to go the world one better. This time it is the Queen Mary, the most wonderful steamship ever constructed costing \$25,000,000. The departure from Southampton, England, and arrival of this monster of the seas in New York, through the medium of the radio, had the eyes of the world focused on her as she crossed the Atlantic and docked at New York. The Queen Mary is the last word in sea going craft construction and a great reception was given her as she entered the Port of New York.
