By Wilfrid Iggleston Ottawa, August 25.-The first thing the cabinet did when the ministers had returned from overseas was to deal with the drought and no boddie could fodder situation in western Canada.

Final arrangements are still to be Monday : Jane concluded and the problem will need continuous attention until next summer. But meantime the following did the extreme assistance appears to be likely:

Free shipment of feed from areas where there is a surplus, to the yes it all ways drought areas. The railways will rehurts her worst in duce their rates one-third and the hot wether than federal government pay the remain-

Free movement of cattle from the Tuesday: Well drought areas to others where feed this vacashen has is plentiful, within the province.

(The Provincial and federal governments are likely to find it necessary to buy up all surplus hay, oats, barley and green-feed in Al-Wednesday: I & Pa went out driv- berta and Saskatchewan, to prevent speculation and export to the United States of needed fodder.)

> Reduced rates on cattle moving eastward. A bonus of five dollars per head to eastern farmers and ranchers for keeping western cattle at least two months.

> Payment by the big packing houses of One dollar per hundred pounds (about double the market quotation) for cows and canners, for processing and export sale; with the provision that any loss on the transaction will be absorbed by the federal government, and any profit be distributed pro rata among the farmers and ranchers supplying these animals. It is hoped to take 100,000 head off the market in this way. (Give Work Where Possible)

The problem of farm relief in the drought-stricken areas was also faced. Wherever it is possible it is proposed to give work to farmers in relief areas, but the openings for this sort of thing are confined to adjacent road-work and water con-'servation projects. Possibilities of the former have been fairly well exhausted in the recurrent dry areas, and the latter is a limited thing. Not more than \$200,000 at the most can be spent this fall on dams and dug-outs.

A great deal of the distress in the west this year is in a district which has had to be helped once or oftener in the past six years, and the machinery can readily be set up to deal with it. It will be necessary for Ottawa to increase substantially the should be eliminated. monthly "grants-in-aid" of the two ! most seriously stricken provinces. Alberta and Saskatchewan.

was getting \$350,000 a month and Alberta \$175,000. On the first of April these amounts were reduced will have to be stepped up again. 'Saskatchewan came down with an all 5000 total expenditure of \$12,000,000 and made a lot quieter and happier. Used Long Straw Collars For Sale Alberta has similar ideas. Both will Questions concerning health, adrequests. The federal government is will be answered personally by letgetting revenues in a bit more free- ter. ly than last year, but once again. nevertheless, we are heading into a heavy deficit. That 'balanced budget' is still quite a way off.

> (Promising British Market) Hon. J. G. Gardiner, Minister of Agriculture, came back from the United Kingdom impressed with the possibilities of the market over there, if we go after it. He thinks the annual shipment of 100,000 live cattle should not be difficult. The 000 which he can use toward this chine could do. end, and a small staff will probably be set up ever there soon, responsible to the Minister of Agriculture here, to push this affair.

question; and is trying to solve the financial end, admitted to be the quent high rents have made it unsound for builders and owners to go ahead. If a housing scheme could be launched with money at little more than the quotation on gilt-edge government bonds (say 31/2 per cent) it would be commercially profitable, woman. "We use gas." and the houses could be rented at prices within the reach of the average working man, it is believed. Anyway, the commission is going to take a crack at this end. Probably the government will in the long run have to come to the rescue, but private enterprise is in the meantime going to be given a chance to work it out. A building finance corporation is one suggestion. Repairs as well as new houses would be includ-

gara district.

IN CANADA

NOISE One of the greatest curses of modern civilization is noise. There is noise everywhere. Our streets are full of it, day and night - trucks motor horns, motorcycles, street cars, milkwagons at night. Our houses are full of it - vacuum cleaners, furnace blowers, and, if in apartments, elevators and the neighbours above. The modern fireproof construction of large dwellings but amplifies sound transmission through walls and plumbing.

And now, with the blatant radio screeching from every neighbor's window from morning until midnight the last vestige of peace for the city dwellers has been shattered.

It may be true that we can get used to anything, even hanging, but the effect on the human constitution during the process may be deplorable. Noise is definitely detrimental to health. Science has proven that a passing truck may so disturb a sleeper, even though he be not roused, that the blood pressure rises twenty millimeters. Noise raises muscular tension and the brain pressure has been found to be increased fourfold. Hearing may be impaired, sleep lost, and efficiency lowered.

What can be done about it? Many cities have set up anti-noise regulations, but the final solution rests with the individuals themselves. We are not likely to give up our paved streets, our mechanized transportation or our labor saving devices, therefore the solution lies in controlling their use.

Motor horns are needlessly loud and could be used less; night trucking and through trucking can be regulated - if we demand it; lazy cubs can get out and ring the doorbells rather than disturb the neighbours until her ladyship appears.

All horse-drawn vehicles should be rubber-tired; rubber horseshoes have been advocated; night delivery of milk is not absolutely essential.

Street cars should be gradually replaced by buses. Street cars should not be permitted to race over track crossings at high speed, particularly at night. Advertising loud speakers

The radio has an infinite capacity for providing pleasure and education, but in many homes it is auto-During last winter, Saskatchewan matically turned on when the blinds are raised and never turned off until bedtime. It does save one the trouble of thinking — if it be listen-15 per cent, and later there was an- ed to at all - but it makes the other small reduction. Now they neighbours do a lot of vitriolitic
