A TRIBUTE TO THE COW "The cow is a most wonderful laboratory. She takes the grasses of the pasture, and the roughage of the field, and converts them into the most perfect food for man. In that food there is a mysterious something which scientists have found essential to the highest health of the human race, and which can be found nowhere else. Men have sought for centuries the fabled Fountain of Youth. The nearest approach to that fountain which has yet been discovered is the udder of the cow. Without her milk, children languish, the vigor of the adult declines, and the vitality of the human race runs low."—A tribute by Hon. Frank O. Lowden, Sennissippi Farm, Illinois.
