Over 500 enjoyed the Fowl Supper here Wednesday evening and partook of the fine fowl and many good things provided by the ladies. After the supper there was a splendid program supplied by Rev. Wesley Hunnisset and his orchestra and Miss Jean Topper, elocutionist. Sunday services were well attended when inspiring and helpful messages were delivered by the special preachers, Rev. J. R. McCrimmon of Maple and Rev. T. Hart of Toronto.

Two unfortunate accidents occurred this week. Mrs. Harry Ireland fell and fractured a bone in her wrist, and Mrs. James Robson while visiting at J. Kyle's fell and fractured a bone in her ankle. **PRODUCTION OF POTATOES IS SLIGHTLY INCREASED**

The total production of potatoes in Canada, estimated at 41,799,000 hundredweight, is slightly larger than last year's crop of 39,034,000 hundredweight. As usual, there were considerable differences in provincial yields, due to the varying weather conditions. Prince Edward Island and Nova Scotia after an unusually dry summer and autumn are harvesting lower yields on an increased acreage this year, and the total production is somewhat below that of 1936. New Brunswick and Quebec are also getting lower yields per acre, but the increased acreage in New Brunswick is giving that province a slightly higher production.

As a result of dry conditions during the period of tuber development, yields per acre in Quebec are running lower than last year. In Ontario, both acreage and yields are higher than in 1936. The ample rainfall in Manitoba this year has contributed to a notable increase in the 1937 crop over the drought-affected crop of 1936. The reverse holds for Saskatchewan, where the crop this year is still smaller than that of a year ago. Alberta and British Columbia have both increased acreages and better yields than in 1936.
