**Giving up Farming and Housekeeping**  
**Terms:—Cash**  
**Sale at 1 p.m.**  
**A. S. Farmer, Auctioneer**

**NEWS AND INFORMATION**  
**FOR THE BUSY FARMER**

**The Hay Market**  
Hay is in fair demand in South-western Ontario and there is some prospect for exporting second-cut alfalfa hay to the United States. About 85% of the crop is still in the farmers' hands. Timothy No. 1, timothy mixtures and alfalfa are much above requirements in most districts. Prices are as follows: Timothy No. 2, \$8 per ton; timothy No. 3, \$7 per ton; mixed hay \$8; alfalfa first cut \$7; alfalfa second cut \$10 to \$11; wheat straw \$5 per ton.

**Clover and Grass Seeds**  
The present demand in South-western Ontario is good for red clover, alfalfa, alsike and sweet clover, and fair for timothy. Domestic red clover will be supplanted by imported seed to a great extent this season on account of the scarcity of supply and the price factor. Supply of all seed, except timothy, is becoming scarce. Estimated quantities still in growers' hands are: Red clover 60,000 lbs.; alfalfa 190,000 lbs.; alsike 34,000 lbs.; sweet clover 200,000 lbs.; and timothy 875,000 lbs.

**Farm Price Index**  
The disadvantage which farmers experienced in exchanging their produce for the goods which they needed for approximately six years was terminated in November 1936 when the index of prices of farm products overtook the prices of manufactured goods. During the whole of 1937 farm prices continued to be higher than manufactured goods as compared with the relationship which prevailed in 1913, which is usually considered to have been a normal year. Notwithstanding the decrease of field crop prices in August 1937 farmers still enjoyed a slight advantage in November 1937, the last month for which figures are available.

**Fertilizer Contents**  
Chemical fertilizers sold in Canada are required by law to contain the amounts of nitrogen, phosphoric acid and potash guaranteed by the manufacturer or importer. For example, a 2-12-6 fertilizer must contain 2 per cent of nitrogen, 12 per cent of available phosphoric acid and 6 per cent of potash. This is required so that farmers and other buyers may be sure of obtaining good value for their money outlay. Each year hundreds of samples are analysed by the official analysts and the results published so that the public may see for itself the record of each of the fertilizer companies in meeting their guarantees.

The results of 1937 are now available and when carefully studied few failures to meet the required guarantee are to be found. There has been a substantial increase in the consumption of fertilizers in recent years and this may be attributed largely to increased public confidence, due to good results from their

use. Every purchase of fertilizers should be based on a guaranteed analysis and every buyer of fertilizers should consult first the annual Report of Analyses, which may be obtained free from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

**GIRLS LEAVING FARM.**  
**AND WHY? ASKS M.P.**

**Argues It's Because Urban Living Standard Higher, and Calls for Accounting of What Farmers Make**

Farmers, said R. J. Deachman, (Lib. Huron North) aren't getting enough money.

He said it loud and long, before the present sessions of the House of Commons, and before he finished he suggested, in a non-partisan way, that the Government should select a group of farmers, provide them with a simple cost-accounting system, and find out exactly what an average farmer did make in a year.

That is, the Government might find out, barring wind, drought, hail, wet weather and a few other little items that made of farming a series of little surprises.

Farmers, pointed out Mr. Deachman, today have such interesting work. Like potato bugs. They never knew what was going to hit them.

**Says Girls Leaving**  
In any event, he emphasized, the position of Canadian agriculture was the most serious factor in Canada's economic position. It must be. For didn't the 1931 census report show that there was a decrease in the number of girls of marriageable age living on the farm?

"And I want to tell you," he said, "when the female population declines on the farm, it is a serious factor in the social life of the community. Our women make the social life."

Out of that came his conclusion that the girls of marriageable age were going to the cities, following the higher standard of living that the urban communities afforded.

The point was, he said, there was no accurate information of the depth to which the farmer's standard of living had fallen. The nearest he could get to it was by taking the total income from agriculture, as reported by the Bureau of Statistics, dividing it by the number of farmers, and deducting the more or less theoretical cost of their living. By this involved reckoning, he figured the average farmer in a year had a net return of slightly under a dollar a day.

**Wants Exact Data**  
"Oh, I know," he said, "when you discuss it, they say the farmer has his house and his barn and all that kind of thing. They say down here, 'Oh, he's got all that.' But that isn't the point. The circumstances demand that we should know exactly what the farmer's income amounts to."

He figured the cost of the economic survey would be trifling. He suggested that cost-accounting system might be applied to 100 or 1,000 farmers—in any event a representative number. He believed it should be applied over a period of two or three years in the interest of accuracy.

There were, he believed, branches in the Ontario Department of Agriculture, that in association with the Federal branch could supervise such an investigation, without the setting up of additional machinery.

**Mr. Whitmore Resigning Soon**

We were informed by Mr. John G. Whitmore on Tuesday that it is quite possible that he will resign the management of the Woodbridge Farmers' Company at the close of the company's fiscal year, May 31st, to go into business on his own account. Mr. Whitmore has been manager of the company since its organization in 1921 and since that time under his very capable management the company has experienced considerable expansion and no small degree of prosperity. Its development originated from a United Farmers' Club, of which there were many organized throughout Ontario after the close of the war. This was one of the few that survived and in the course of time proved to be a successful business venture. Having himself previously been a successful farmer, Mr. Whitmore was particularly fitted to directing the affairs of a business organization, the great bulk of whose business has been transacted with a farming clientele. The turnover of the company for the year ending May 31st last showed more than fifty thousand dollars of an increase over that of the previous year.

**SLATS' DIARY**  
(By Oliver N. Warren)

Sunday: Went to church and S. S. as ushel. How could I help it if I haft to. When I arrived home Ant Emmy sed to me sed she what do I think of the preachers sermint & I replide okey doke but they was 2 or 3 good places whair he could of stopt. Ant Emmy sed I ottent of sed that but I bleeve in telling the truth so I did.

Monday: Ast Unkel Hen ott I marrie a bewtifle girl or a senseable 1 & he sed I wooddent get neether & that a bewtifle girl could do better & a senseable 1 otto no better. Unkel Hen then laft & seamed to think he sed sum thing smart. But diddent tho.

Tuesday: I seen Elsy on the St. & sed to her I herd she loved a boy on the north side. She replied & sed yes & on the south side & the east side & west side & up & down & all over. So it lookt to me like he is got her purty well hooked as Napoleon sed when he got a bite.

Wednesday: Pa made a hit with the editur this p. m. he sed. I ast him why & he sed the editur told him to go out & get the dope on a crook wanted in Checaggo & Pa sed what do they want of enney more crooks there. Pa sed it went over big with the editur but I cant see no thing smart about same.

Thursday: In the class at school this a. m. the teacher sed sum men thirst after nolledge & sum after love & still others after weth & do any of us kids no of eney thing still other ones thirst after. Blisters sed he does & it are salted P-nuts. All the kids laft & the teacher sed she guest Blisters were about 1/2 right at that. So she just kinda dropt the subject.

Friday: The teacher ast Jake how do he no the world are round & just simply flotes in space without being fasened to nothing & how can he prove it. Why do I haft to prove it sed Jake when I aint never sed it were thataway. Then the teacher diddent hardly seem to no what to say & got off on sum thing elts besides the soler sistem & etc.

Saturday: No school today & at brekfest I sed I dont haft to lern no thing today & Pa sed Well just stick clost around home & mebbe I won't lern sum thing. I suppose he had referents to learning sum thing I ottent to no. He watches over me thataway. Sort of.

**W. CLARKSON ASSUMES FAIR PRESIDENCY**

William Clarkson, a former reeve of Etobicoke township was elected President of the Woodbridge Agricultural Society when the members held their annual meeting last Saturday afternoon. The new vice-presidents are Wilbert Cousins and Alfred Thompson. D. C. Longhouse, one of the oldest members, was re-elected to the board of directors for the 58th consecutive year. Directors and associate directors added to last year's list include Charles Wallace, John Kellam, Mrs. John Kellam and Mrs. William Clarkson. Saturday, October 8th and Monday, October 10 were selected as tentative dates for the 1938 fair.

A small son makes life happier. Without one, you're ashamed to buy a toy train to play with.

A man is a person who buys a new overcoat and friends call to see him and he doesn't show it to them.

**NOT SPENT IN DRINK**  
(Porcupine Advance)

A transient in town this week begged fifteen cents for the avowed purpose of buying that cup of coffee that seems so desirable and necessary when fifteen cents is required. The generous Scotsman who was expected to provide the coffee money expressed his earnest disinclination to providing a small sum of money to supply another man with any of the well-known intoxicants. He was assured that the money would not be wasted in that way. "I'll not drink up your money, my good friend!" said the transient with so much earnestness that even the Scotsman believed him. But the Scotsman followed him — past one beverage room, past another! Ah, here is a restaurant! The man turns in with his recently acquired three big nickles! An honest man! He knew his way about, too! He knew the nearest restaurant! He entered the cafe! But he did not take a seat at one of the tables, nor at the counter! He spent the three big nickles in a slot machine.

**IMPORTANT SALE OF**
