Sale at 1 p.m. A. S. FARMER, Auctioneer

NEWS AND INFORMATION FOR THE BUSY FARMER

Frozen Vegetables
 Asparagus, beans, corn, peas and spinach were the principal products in the frozen vegetable pack in Canada in 1937. Like the Canadian frozen fruit pack, they are finding a ready market in the hotel and restaurant trade, but, as they require a temperature of about zero they cannot be offered to the general public until proper storage facilities are available in the retail trade.

Starters and Cheese
 One of the most important factors in determining the quality of the cheese is the starter which is used to hasten and control the acid fermentation of the milk, and it is, therefore, highly important that uniform starters of high quality be used. A starter correctly made and handled cannot harm the product in any way; rather it should improve it, whatever the quality of the milk may be. The question of starters is wholly under the control of the maker, and he has only himself to blame if the quality of his product is injured by the use of a poor starter.

Horses In Demand
 In nine breeding station districts in Canada, saddle and hunter horses, and horses for police, remount, and light delivery purposes, are being produced in considerable numbers. This type of horse is in keen demand in Canada and in the United States, and there is little likelihood of any decline in popularity. Horse breeding clubs among Canadian farmers increased from 125 in 1933 to 254 in 1937, while the number of purebred stallions qualifying for approval in 1937 showed an increase of 21 per cent over 1936.

Seed Growers' Convention
 The next annual meeting of the Canadian Seed Growers' Association will be held at the Ontario Agricultural College, Guelph, Ontario. The dates set for the meetings are June 15th, 16th and 17th, 1938, and plans are under way for a busy three days. It is expected that workers in the promotion of improved seed production from coast to coast will be in attendance. Officers coming from the west will include the President, Mr. F. W. Townley-Smith, Lashburn, Sask., and the Vice-President, Mr. F. L. Dickinson, from Winnipeg, Man. The Secretary-Treasurer of the Association is Mr. W. T. G. Wiener, Ottawa, Ont.

Alfalfa Hay Crop Moves
 Movement of alfalfa hay from Haldimand County is now in full swing. It is estimated that last year's crop of 3,000 tons will be exceeded.

A large portion of the crop is moving to the large dairy herds in the Eastern States.

Considerable alfalfa is being ground into meal for export and domestic consumption. Up to eight alfalfa meal mills have been grinding in the Caledonia district at one time. Another new outlet may be provided as result of a test shipment just made to Nova Scotia for a Department of Agriculture experiment in feeding young deer for the first time. Although the plant is one of the oldest under cultivation, it is only in recent years that it has been grown here generally, and it seems to thrive on the heavy clay land. Haldimand and Peel are two of the banner producing counties in the Province.

Current Farm Report

Bruce County reports a smaller mortality in pigs this winter than is usually experienced. Wellington County reports that fall wheat is showing up particularly well as it has been covered with a nice blanket of snow during most of the winter. The high prices of alfalfa and clover seed prevailing there are diverting farmers' attention to timothy which has the advantage of being considerably cheaper and at the same time a home-grown product. In Halton and some other counties livestock breeders are reported as disappointed at prevailing market prices for their cattle. In Haldimand a definite move has been made towards having the county declared as a tuberculosis-free area. The county council has already approved the movement and the Livestock Improvement Association is proceeding with the passing of petitions. Middlesex has experienced some floods in low areas due to heavy rains. Wheat is still green there and in good condition though fear has been expressed because of lack of snow. Quite a demand for horses has been noticed among the tobacco growers of Norfolk county and good teams are bringing from \$300 to \$450. Demand for springers and new milkers in Prince Edward County appears to be a little brisker, both from American and other outside buyers, at

fairly satisfactory prices. Horses are also selling well there. Livestock in Eastern Ontario is in fairly good condition considering the scarcity of home-grown feeds and the high price of commercial feeding stuffs.

Records Reveal Cost of Raising Pullets

In order to ascertain the cost of raising pullets to maturity, that is the age at which they lay their first eggs, a record of all feed, coal, and litter used was kept during the 1937 season at the experimental station, Summerland, B.C.

Starting with 680 White Wyandotte chicks hatched on three different dates, April 6, 14, and 29, respectively, and brooded under coal brooders, 391 were sold as broilers and roasters, and a few as ready-to-lay pullets. These latter have been included for purposes of experiment at their actual weights and the prevailing live price per pound. Mortality, caused mostly by hawks and coyotes, accounted for 48 birds. The balance of 241 represents the number of pullets coming into laying from September 2 onwards. No eggs laid by these birds have been credited, as such inclusion would only create a fictitious profit or unfairly reduce the cost of rearing.

The number of chicks brooded might easily have been cared for by two brooders instead of three if hatching dates allowed this, thereby reducing the amount and cost of coal used.

As anyone knows who kept poultry in 1937 feed prices were high. Wheat for this experiment cost \$50 per ton, home-mixed developer mash of which large quantities were consumed cost \$40 per ton.

In order that the figures may be of some benefit to those poultry-keepers who raise their pullets from purchased day-old chicks, the cost of the original 680 chicks has been reckoned at \$14 per hundred, the approximate price of heavy breeds in the Okanagan Valley. In calculating the cost of raising the birds, no charge has been made for labour.

Cost of Raising Pullets to Maturity
 Estimated cost 680 chicks . . . \$ 95.20
 Brooder coal, 1900 lb. 14.01
 Litter, 800 lb. 4.00
 Chick feed, 784 lb. 24.43
 Developer mash, 8398 lb. . . . 167.96
 Whole grain, 4600 lb. 105.00
\$410.60

Sale of broilers and roasters, 1602 lb. 303.62

Cost of raising 241 pullets . . \$106.98
COST PER PULLET—44.39 cents.

MORTGAGE SALE

UNDER AND BY VIRTUE of the Powers of Sale contained in a certain Mortgage which will be produced at the time of sale, there will be offered for sale by

G. PHILLIPS, Auctioneer,
 at
PUBLIC AUCTION
 on
FRIDAY, THE 11TH DAY OF MARCH, 1938

at the hour of one-thirty o'clock in the afternoon at the farm of **JOHN A. LEEK**, three miles from Richmond Hill, Ontario, the following property, namely:

ALL AND SINGULAR that certain parcel or tract of land and premises, situate, lying and being in the Township of Markham, in the County of York, being composed of the East half of Lot 16, in the Second Concession of the said Township of Markham, containing 100 acres more or less.

On the said farm there is said to be erected a barn.

The lands will be sold subject to a reserve bid.

TERMS OF SALE:—Twenty-five per cent of the purchase money to be paid down at the time of the sale, the balance to be secured by a mortgage with interest at four per cent per annum.

For further particulars and Conditions of Sale refer to **W. ERIC STEWART, K.C.**, East Block, Parliament Bldgs., Toronto, Ontario, Solicitor to the Mortgagee.

DATED at Toronto this 19th day of February, 1938.

NOTICE OF APPLICATION FOR DIVORCE

NOTICE is hereby given that **WILFRED AUGUSTUS COTTE STEAD** of the City of Montreal, in the County of Hochelaga, in the Province of Quebec, will apply to the Parliament of Canada at the present or next session thereof, for a Bill of Divorce from his wife **ELSIE MAY STEAD** of the City of Toronto, in the County of York, in the Province of Ontario, on the ground of adultery.

DATED at Montreal, in the Province of Quebec, the 8th day of February, A.D. 1938.

OSMOND F. HOWE, 56 Sparks Street, Ottawa, Ontario.

"Yep," said the farmer. "When a seller has to know the botanical name of what he raises, and the entomological name of the bugs that eat it and the pharmaceutical name of what he sprays on it — things is bound to cost more."
