NEWS AND INFORMATION FOR THE BUSY FARMER

The Dairy Industry
A Monthly Dairy Report is now issued regularly by the Department. Anyone wishing to receive this report may do so, free of charge, by making a request to the Statistics Branch, Ontario Department of Agriculture.

The initial report shows that commercial sales of fluid milk and cream in Ontario for the month of January amounted to \$2,624,000. It is apparent that the annual volume of commercial fluid milk business in Ontario is in the neighborhood of \$30,000,000. For January the total sales of milk by dairies and producer-distributors amounted to 20,249,300 quarts, having a sales value of \$2,297,300, and fluid cream 731,300 quarts at \$326,900.

Production of both creamery butter and factory cheese in Ontario was again lower in February. February production of butter was down 230,000 pounds and production for the first two months of 1938 was down 683,000 pounds as compared with a year ago, while the production of cheese for the same two periods showed a decrease of 240,000 pounds and 559,000 pounds, respectively.

Egg, Poultry Cooperation
There are now 26 farmers' cooperative egg and poultry associations in Eastern Ontario. Since the first one was established on December 1, 1934, at Kemptonville, these have paid up to the end of December 1937, a total of \$473,600.46 to the producers for their eggs and poultry. In September, 1935, the second association began business at Finch. In 1936 new associations were formed, and during the year marketed 20,437 cases of eggs, 9,662 lbs. of live poultry and 93,920 lbs. of dressed poultry. Last year the 26 associations sold 42,563 cases of eggs, 45,355 lbs. of live poultry and 178,823 lbs. of dressed poultry.

Prior to the formation of the associations practically all the farmers in the Ottawa Valley sold their eggs either to stores or itinerant buyers often not on grade and without troubling about the current price on the Montreal market.

At each centre of the association now, the eggs are delivered by the farmers who are paid on the basis of the grade and the average of the week's quotation on the Montreal market, less the deduction for express. Each farmer receives a grading report for the eggs he delivers. He knows that he will get the current price for it is posted every morning at each station.

But the actual market price, less the overhead charges, is not the only advantage to the farmer. The grading report gives him an indication of the advantages of breeding, feeding and sanitation in keeping poultry. These cooperative associations supplied more than half of the carload of fresh eggs recently exported to England.

The Cheese Market
At the Cheese Producers' annual convention at Peterborough the delegates were intensely interested in the address of J. F. Singleton, in charge of the Marketing Services, as he reviewed the cheese industry of the past year and emphasized the importance of quality, if Canada is to retain her position in the British market. In comparing 1936 and 1937, cheese increased in price 7 per cent, whereas butter increased 13.6 per cent. This was for a period from May to November of each year. At London, wholesale jobbers' price of cheese increased 7.2 per cent and butter 10.6. The value of butter with relation to the value of cheese is higher in Canada than in the United Kingdom. With the increase in price since the beginning of the year, which is out of line with the price of cheese, there will naturally be a tendency for patrons to yield to the solicitation of creamerymen for their product, to the detriment of the cheese factory production. But some day the butter market will break and break fast, said Mr. Singleton, and producers should consider carefully which market will give the highest returns for the milk during the season. Canadian cheese has a reputation in the Old Country, not only for having a higher quality than any other imported cheese, but it is the highest quality of any source, domestic or imported, which is available in quantity and this position should not be jeopardized by short supply. A large quantity of processed cheese is produced in the United Kingdom, and for this trade mature Canadian cheddar is favored. Mr. Singleton advised the Canadian cheese-makers and patrons to concentrate on raising the general average score of our cheese.

DIED
BAGG, Dorothy Mary — Suddenly at the Western Hospital, on Sunday, March 20, Dorothy Mary Bagg, beloved and only daughter of Mr. and Mrs. George Bagg and sister of James and Allan, in her twentieth year.
The funeral service was held at her late residence, Edgeley, Ont., on Tuesday, March 22, at 2.30 p.m. Interment followed in Hillcrest Cemetery, Woodbridge.

DUKES, Thomas—At the residence of his sister, Mrs. James Puckering, Unionville, on Monday, March 21st, 1938, Thomas Dukes.
Funeral from the above address on Thursday, March 24th at 2 o'clock. Interment in St. Phillip's Cemetery, Unionville.

RURAL FIRE PROTECTION
An English inventor has produced a "fireplace" which carries extinguishers, a motor pump, sectional ladder and gas "bombs" capable of suffocating flames. This may ultimately provide a solution to the problem of rural fire protection.—Woodstock Sentinel-Review.

FINANCIALLY ABLE TO DRIVE
It seems to be a reasonable principle that no one should be allowed to take a car on the streets or highways unless he is in a financial position, through insurance or otherwise, to meet reasonable claims on account of any damage his machine may do, either through his own carelessness or indifference or through mechanical deficiency of his car. — Windsor Star.

THE DISAPPEARING SALMON
People on the Pacific coast are at last getting an answer to that old question, "Where do the salmon go?" It seems that they go into a floating Japanese salmon cannery. — Toronto Star.

An old Scotsman was smoking in the waiting room of a railway station. A porter said to him: "Don't you see that notice on the wall, 'No Smoking Allowed?'"
"Ay, I do that," said the Scot. "But I canna keep up with all your rules. There's another yin on yon wall that says: 'Wear Spirella Corsets!'"

The gentleman walked out of his New York club and called to the man in uniform who was standing in front. "Taxi," he directed.

The man in uniform looked surprised, "I'm sorry, sir," he stated, "but I'm not the doorman here. I'm a naval officer."

The gentleman cried: "All right, then, get me a boat. I've got to get home."
Following lines of least resistance is what makes rivers and men crooked.
A spendthrift is one who spends his money. A miser is one who saves it for somebody else to spend.
