Day 139 Evenings 82W

Possibly apocryphal, but good, is the remark said to have been made in India recently by Schacht, Reichsbank ex-chief. "What is it like being a German," they asked him, "after Austria, after Czechoslovakia, after Memel?" "It doesn't make much difference," he said. "It's like a man who's in jail for life and hears they've added a new wing to the building."

Boss (storming): "You're fired!" Typist: "Fired I like that. I thought they sold slaves!"

## Storms Do Damage

The heavy rain during the past few weeks has caused quite a bit of damage in both Thornhill and Richmond Hill districts. On Friday night the six o'clock radial car was struck by lightning in front of the post office in the village. It caught fire but Motorman Edgar Badger of Toronto was prompt with a fire extinguisher and immediately put it out. There were no passengers in the radial at the time and the motorman was not hurt.

On Sunday the heavy downpour again washed out the driveways leading to the golf courses north of Thornhill. Red lanterns were put alongside the road to warn motorists of undermined ditches. Cars were stopped both in Thornhill and Richmond Hill because of the poor visibility.

No crops were reported damaged by the heavy rain this week and on the contrary it proved a boon to farmers and fruit growers. The steady downpour soaked the ground and, as a result, earlier crops of potatoes and other garden vegetables are expected. Three or four cellars in the village were reported to have been flooded. Creeks were swollen by the rain and in some cases crossed the roads at a depth of six to twelve inches.

### HAY FEVER

Hay fever is caused by the irritation to the mucous membrane of the nose and throat from the pollen or dust of plants and grasses by persons sensitive to such irritation. The offending plants are trees, grasses and weeds, and the particular offender in a given case may be recognized by skin tests.

Pollen or dust, to be effective in causing hay fever in sensitive persons must contain an excitant to this condition: it must be capable of being carried by winds and for considerable distances; the source must be abundant and the plants widely distributed.

In the early spring, trees carry the causative pollens. Then come the grasses, say about June, and then the weeds in Autumn.

On the American Continent the wind-pollinated trees are those carrying catkins, such as the poplar, oak, birch, walnut, beach, hazel and alder. Others are the maple, ash, hackberry, sycamore and mulberry. The willow pollen is the only one of these not carried by winds. Trees producing perfect flowers, such as the elm and mesquite, are also wind-pollinated. On the Western prairies, the poplar is the chief offender among trees and timothy is the worst of the grasses.

Dr. Heber C. Jamieson, of Edmonton, writing in the Canadian Medical Association Journal, defines the three hay-fever areas of the province of Alberta. One of these stretches from the Red Deer River to the northern boundary. A second comprises the southern section of this region with its upper limit the Peace River country, while the third extends from the Red Deer south to the international boundary.

Of trees, the poplar is the important one so far as hay fever in Alberta is concerned. From mid-April on is the season for its ravages. Timothy pollinates from the middle of June.

Weeds are the chief causes of autumn hay fever. These comprise the rag-weed family and the thistle family. The effects of these are found from July onwards. Golden rod, popularly supposed to excite hay fever, has been practically exonerated.

The sufferer from hay fever sees the first signs in what appears to be a violent cold in the head which may be associated with asthma. There are attacks of sneezing, eyes itch, headache and lassitude. Old persons are practically exempt.

Prevention of the condition is the important point. To discover the cause, skin tests are done on the sufferer using suspected dusts and pollens. The cause having been found a vaccine is prepared from the offending substances. This method of prevention is effectual in the majority of cases.

—By J. W. S. McCullough, M.D., D.P.H. of the Health League of Canada.

## Letters From The People

### BALMORAL PIPE BAND

To the Editor, Dear Sir:— We the undersigned members of the Balmoral Pipe Band wish to correct a statement which appeared in last week's issue of The Liberal under the signature of L. W. Zuefelt and which reads as follows: A Pipe Band has been organized for the Village of Richmond Hill by three former members of the defunct Balmoral Pipe Band, to be known as the Richmond Hill Pipe Band.

In the first place the Balmoral Pipe Band is not defunct (if Mr. Zuefelt knows the meaning of the word) but is very much alive and the thousands that heard us and the applause we received on the route of March in Barrie on July 12th spoke for itself. At another point he states that the newly organized Pipe Band has no connection whatever with the defunct Balmoral Pipe Band, for that we are glad as our Band now consists of first-class pipers and not dummies. It is rather surprising what harm can be done any organization by one or two disgruntled members. In conclusion I may say that we are in a good financial position, have no debts, have considerable equipment and have \$61 out on loan at the present time.

Thanking you, Mr. Editor, for your valuable space and wishing the newly organized Richmond Hill Pipe Band of 3 pipers every success.

Signed, W. G. Grant, Pipe Major Pipers, James Reid, Donald Mackenzie, James Closs, James Lenachone, Wm. Brown, Murdoch McLennan; Drummers, Archie Carmichael, Peter Walker, Joe Clark.

Peter Walker, Sec.-Treas.

### CARRVILLE

Mr. and Mrs. Turner and daughter Dawn and Mrs. Barton and daughter Barbara of Islington visited Mr. and Mrs. W. Wynn Thursday evening.

Mrs. Mayhew and son Keith spent Sunday with Mr. and Mrs. Glenn in Toronto.

Mr. and Mrs. W. H. Reaman of Toronto spent Tuesday evening with Mr. W. and Miss M. Reaman.

The Rev. Fulton and Mrs. Vanderberg and family of Oakwood are visiting Mr. and Mrs. J. Vanderberg.

Miss Gwen Smith of Toronto is visiting Mr. and Mrs. Stan Woods.

Mr. and Mrs. Herriott of St. Catharines spent Saturday with Mr. and Mrs. J. Vanderberg.

Mrs. J. Clement spent the weekend with Miss Grace Thompson at Richmond Hill.

We are sorry to report that Mrs. Wark is in the General Hospital. She fell and broke her leg. We hope she may soon be home again.

Little Margaret Woods is spending some holidays with her aunt Mrs. Smith in Toronto.

### \$250,000 LOSS DUE TO WEEDS

Department of Agriculture Expert Demonstrates Spraying Device

Weeds cost Canada between \$250,000 and \$300,000 yearly in loss of production diminution of land values, cutting, spraying, etc., Dr. W. J. Stephen of the crops, weeds and seeds branch of the Ontario Department of Agriculture declared at Wilfordale Tuesday at a weed-spraying demonstration which was attended by weed inspectors and municipal officials from all parts of York County.

In Ontario alone the cost annually is \$30,000, said Dr. Stephen. Thousands of acres were taken out of production each year by ever-spreading weeds, he said.

Dr. Stephen was demonstrating a weed-killer developed by himself in the course of his work. Following his address, in the township hall, the meeting adjourned to see it applied to roadside weeds on Brooke avenue, through a special sprayer lent by Trafalgar township for the occasion.

The sprayer, equipped with a long, liftable boom, with nozzles every few inches along it, sprayed every inch of the shoulder of the road and ditch. All weeds there would be dead in three days, it was stated, and repeated sprayings would eradicate them entirely.

The demonstration was organized by department officials and North York council. Among the speakers were John D. McLeod, assistant director of the crops, weeds and seeds branch, W. M. Cockburn, York County agricultural representative.

Summer Guest: Do you operate a bus between your hotel and the railroad station? Hotel Manager: No, sir. Summer Guest: That's strange. All my friends said you would get me coming and going.
