**Sow Oats Suitable To Your District**

Ontario farmers advised to contact Agricultural Representative in county for best advice on 1940 plantings.

Continuing its drive for increased war-time grain production in 1940, the Ont. Dept. of Agriculture is advising all farmers to contact the Agricultural Representative in their own county as to the variety of oat that will give them the greatest number of bushels per acre in their own particular area.

Much has been heard, and will be heard, of the Vanguard and the Erban oat. In some districts and under certain soil conditions the Vanguard is superior, while in other sections the Erban tops Vanguard. This is where the Agricultural Representative can be of untold value to the farmer. As a result of grain variety experiments on 367 farms in Ontario in 1939, the Agricultural Representative is in a position to give excellent advice on varieties that will do well in given districts. It will pay any farmer to consult him.

The Vanguard is a late oat, resistant to stem rust and has done well in the majority of Eastern Ont. counties. The Erban is a medium early oat and is resistant to crown or leaf rust.

The Department of Agriculture also points out that farmers who have produced heavy crops from other varieties and who see no reason to change, should make sure they get the best possible seed of that variety. Included in this list would be O.A.C. No. 72, Victory, Alaska, Cartier and O.A.C. No. 3.

An English tourist was on his first visit to Niagara Falls, and a guide was trying to impress him with their magnitude.

Guide—"Grand!"

The visitor was silent.

Guide—"Millions of gallons in a minute!"

Tourist—"How many in a day?"

Guide—"Oh, billions and billions."

Tourist (looking at the falls carefully, and then in a very calm voice): "Runs all night, too, I suppose?"
