

A Few Reasons Why You Should Use "MAPLE LEAF" FEEDS

FORMULAS — are the result of experimental work conducted at Canadian Agricultural Colleges and Experimental Farms.

SALES POLICY — All feeds are sold on the open formula. The exact number of pounds of each ingredient used to make up the feed is given on every bag.

QUALITY — The highest quality ingredients obtainable are used in Monarch and Cafeteria feeds.

BAGS — All chick starters are packed in high grade cotton bags. The bags are printed in wash-out inks. With every bag of chick mash the housewife gets more than a yard and a quarter of high grade cotton. **CAFETERIA CHICK STARTER** is the result of the well known Cafeteria Experiments that were conducted by the Poultry Department at the Ontario Agricultural College. It is a very palatable ration due largely to its coarse texture. The oat groats, barley, and wheat are rolled instead of being finely ground. **MONARCH CHICK STARTER** is granular in texture and is higher in protein than Cafeteria Chick Starter. It gives excellent results and where poultrymen have been accustomed to feeding this type of ration you will make no mistake in buying Monarch Chick Starter.

RESULTS: Monarch and Cafeteria Chick Starters are used by thousands of Canada's best poultrymen. We receive hundreds of letters of recommendation every year. For further recommendations and information on feeding, read "Feed Facts for 1940".
