Fat Feeds are Needed to Keep up Milk Flow

Soybeans and old process oilmeals main sources for dairy cows in milk, says Ont. Feed Board.

Recent experiments have shown that the milk yield of cows may be reduced when insufficient quantities of fat are fed, says the Ont. Feed Board of the Ont. Dept. of Agriculture. Cows should receive in the ration at least 70 per cent of the total fat secreted during the lactation period. Oil bearing seeds (soybeans, flaxseed) and the old process oilmeals constitute the main sources of high fat feeds.

Solvent, or new process oilmeals, cereal grains and roughages are low in fat. Concentrate mixtures should have a fat content not lower than 3.5 per cent and may quite safely contain as high as 6 per cent fat although this higher figure is difficult to attain with meal mixtures made from feeds ordinarily used.

MINERALS

Cows receive most of the minerals required through the ordinary feeds. Regular rations, however, may not provide sufficient quantities of calcium phosphorus and iodine. Alfalfa and clover hays have a comparatively high calcium content but are low in phosphorus. Home grown grains are low in both of these minerals but are proportionately higher in phosphorus.

Protein-rich concentrates are usually rich in phosphorus. Cows not receiving sufficient minerals often drop in milk production, show an appetite for abnormal products such as bones, sticks, leather and in advanced cases show soreness and stiffness in the joints.

Calcium and phosphorus are supplied by feeding cows liberally on well-balanced rations. It may be necessary to supplement the amount of these minerals in the ration by feeding bone products such as steamed bone meal, feeding bone meal, bone flour and bone-char.

Iodine deficiencies are indicated when calves are born with thick necks (goitre). The trouble can be prevented by feeding iodine, usually as iodized salt. Salt should be fed regularly.

Early Spring Sowing For Pasture Mixtures

Cut nurse crop early for green feed or pasture it off carefully, says Advisory Fertilizer Board for Ont.

Where it is found to be good regional practice, sow pasture mixtures in early spring on winter wheat or with light nurse crop, one bus. per acre of barley or early oats. The usual practice is to harvest the nurse crop for grain.

However, in cases where the objective is to secure an exceptionally good catch, the best management is to cut the nurse crop early for green feed or pasture it off carefully. This eliminates the competition from the growing nurse crop and allows the light to reach the young seedlings which results in establishing a thick bottom of sturdy plants, says the Advisory Fertilizer Board for Ontario.

An alternative and successful method is to seed on a clean summer fallow without a nurse crop in the spring when moisture conditions are favorable. Do not seed legumes after July 1st because of danger of winter killing.

Seeding without a nurse-crop should be on a well-prepared clean seed bed in early spring. A fine, firm seed-bed is important for small seeds. Experiments have shown that the use of the cultipacker in conjunction with the drill has increased the stand as much as 30 per cent.

The higher the productive capacity of the soil, the greater amount of fertilizer may be applied with profit.

Old, worn-out pastures should be plowed up and reseeded where possible with the proper seed mixture suited to the soil and grazing program. (See O.A.C. circular No. 28).

PINE GROVE

A splendid variety program was presented when the Pine Grove Red Cross unit staged a concert in the school last Friday evening. Mrs. Stanley Watson, Mrs. Edgar Phillips and Mrs. G. H. Maxey composed the committee responsible for the affair and chairman for the evening was Mr. Robert Watson. Included on the programme were songs by Miss Hilda Sharp and Mr. Frank Woods, cowboy rope tricks by Mr. Campbell, vocal selections by a group of Pine Grove school girls under their teacher Miss Gwen Remus, a piano solo by James Keyes, guitar and vocal selections by Harry Kieckebelt, a piano solo by Miss Jean Phillips, readings by Miss Shirley Wilcox and guitar solos by Allan Watson. A sing song was led by M. M. Patterson and dialogues were presented by scholars of Pine Grove school. Mrs. Ken Stevenson, president of the unit, spoke during the evening and reports were presented by Mrs. Edgar Phillips and Mrs. Morrison.

Pine Grove euchre club members, twenty-five strong, forsook their euchre Saturday night and enjoyed a group visit to a nearby theatre. Their evening was concluded with refreshments at a neighbouring restaurant.

On Wednesday night of last week Pine Grove residents staged a surprise birthday party in honour of Mrs. Albert Ireland. In the presentation Mrs. Ireland was the recipient of a handsome satin finished comforter. Euchre was played during the evening party and prize winners were as follows: Ladies, 1st, Mrs. T. Mott; 2nd, Miss Mary Maxey; consolation, Mrs. Herb Rice, Gents, 1st, Herb Gilbank; 2nd, G. H. Maxey; consolation, Herb Robinson.

EDGELEY

Results of the season's last euchre under Hall Trustee auspices, held on Wednesday, April 10th, are as follows: Ladies, 1st, Miss Ruth Keffer; Maple, with a score of 87; 2nd, Mrs. A. Johnston, Woodbridge, 85; 3rd, Mrs. Clair, Oakwood Ave., Toronto, 83; consolation, Mrs. R. Keffer, Maple, 63. Gents, 1st, Bob Massey, Maple, with a total of 110; 2nd, Bruce Hoyle, Hope, 97; 3rd, Jack Johnston, Woodbridge, 89; consolation, Oscar Wiley, Claireville, 50. In the freeze-out Mrs. Clair and Mrs. West, both of Toronto, were the winners, second place going to Mrs. A. Johnston and Ben Brazior.

The homes of various winners indicate that all roads have led to Edgeley during the winter's series of hall euchres. On the occasion of this last euchre, spring being just around the corner, the committee expressed thanks to all those who have patronized the activities and helped to raise funds for needed hall repairs. To wind up a successful year the committee is now planning a gala night to be held in the near future.
