BIG WRESTLING SHOW in ARENA at NIGHT

OUTLINES BEST METHODS SEEDING HAY, PASTURES

Must raise productive crops of high feeding value to produce livestock at low cost, states Dr. O. McConkey of O.A.C.

In the next few weeks nearly 2,000,000 acres of grassland crops will be seeded in Ontario states Dr. O. McConkey, Field Husbandry Dept. O.A.C., Guelph. These crops furnish the cheapest feed for livestock in winter and summer. There is a heavy investment for seed, and it is important, especially under present war conditions, that every precaution be taken in seeding and cultivation to raise productive crops of high feeding value of hay and pasture in order to produce livestock products at low cost.

Have a soil test made and apply manure and the required fertilizer before seeding, as poor catches are often traced to soils low in fertility and organic matter, advises Dr. McConkey.

The minerals, lime, potash, and especially phosphorus are very important in securing a good catch. Build up the soil organic matter which holds moisture around the young seedlings over critical periods.

Sow on a clean, fine, firm, moist seed bed.

The depth of seeding is important. The small seeds, Timothy, Alsike, Red Clover, require to be seeded shallow, not more than one inch in depth while the larger seeds, Alfalfa, Orchard grass and Brome, can be seeded through the drill mixed with the grain.

In dry seasons and on dry soil types or in the heavy clay regions, deep seeding is often the most successful. A good method in these cases is to seed the large seeds, Alfalfa, Orchard or Brome, through the drill with the grain and broadcast the Timothy, Red Clover, and Alsike in the ordinary way from the grass seeder attachment.

Firm the seed bed before the drill and after, if necessary, with a roller or better still a cultipacker. Experiments have shown that the operation of firming the soil is very important, increasing the stand more than 30 per cent.

Nurse crops should be sown lightly because heavy overhead crops compete with and shade out the young seedlings.

The light nurse crop of 1 to 1½ bus. of oats may be harvested for grain or cut early for hay or green feed, which gives the seedlings a good chance early in the season.

Use good seed of high germination and free from weed seeds.

Use well balanced legume-grass mixtures adapted to the soil type and region.

For improved mixtures, see O.A.C. Circular number 28 "Pasture Improvement" and O.A.C. Bulletin number 406 "Hay Improvement". They may be obtained from your Agricultural Representative or by writing the O.A.C. Guelph.

STOCK REGISTER

Purebred Percheron Stallion
ROBB DALE CARBERT (15692)
The property of William Glass, Lot 11, Con. 5, Vaughan, phone 79r3 Maple. This horse is black and weighs about 1950 lbs. This horse will stand in his own stable for service for the season. Terms to insure foal \$1.00, service \$11.00, payable on or before 1st March 1940. Persons disposing of their mares before foaling time or not returning them regularly to horse will be charged whether in foal or not. All accidents at owner's risk.

PUREBRED PERCHERON
STALLION, LESTE CARNOT
(15253) 3218

The property of Lorne Johnston, lot 24, Con. 5, North York, phone 46r4 Maple. This is a beautiful black Percheron stallion. He has good feet and ankles and nice flat bone and has a wonderful top. He stands 16½ hands high and weighs around 1900 lbs. This horse will be home every night but through the day will go to any one stable, that will phone before 8 o'clock in the morning. Terms—To insure a foal \$10.00 payable on or before 1st of February next. Persons disposing of their mares before foaling time or not returning them regularly to horse will be charged insurance whether in foal or not. All accidents at owner's risk. To truck this horse to anyone's stable will charge \$1.00 within 10 miles. Over that will be 10c. per mile.

Use Weeder, Harrow To Destroy Weeds

Moisture conserved and many annual weeds killed in seedling stage, states John D. MacLeod, Ont. Dept. of Agriculture.

The destruction of annual weeds in the seedling stage by the use of the weeder or harrow has much to commend it, says John D. MacLeod, Crops, Seeds and Weeds Branch, Ont. Dept. of Agriculture. A weeder is preferred but the lever harrow or diamond toothed harrow may be used with care.

When spring grain crops and fall wheat which have not been seeded down are up 2 to 4 inches the weeder may be used, preferably with the rows, in the afternoon when plants are not so brittle. This stirring of the surface soil breaks the crust, forms a mulch, thereby conserving moisture and destroys many annual weeds in the seedling stage. This method should never be employed immediately following a rain.

The weed population in hoed crops such as corn and potatoes may be reduced to a minimum by the use of the weeder or harrow soon after planting and continued until the crop is 3 to 4 inches high. The weeder may even be used on sugar beets, mangels and turnips just after they are up in the drills and will prove very helpful in controlling weeds without injuring the crop.

This method is a practical one which has been adopted by many farmers throughout the Province with excellent results.

KING CITY

On Saturday, May 18th at the United Church parsonage, King, Rev. Douglas Davis united in marriage Wilretta Louise Simpson, daughter of Mr. and Mrs. Robert Simpson of Aurora to David Elwin Paton of Laskay, son of Mr. and Mrs. Elias Paton of King township. The couple will reside at Laskay.

A son was born May 15th to Rev. E. W. G. Worrall and Mrs. Worrall at York County Hospital.

Howard Neill of Eversley will be confined to bed for a week following a severe shock from Sunday's electrical storm. Howard was fixing an eavetrough at the barn and that is all he can recall. What happened, where and when he wasn't able to say. He managed to get to the house not realizing his condition nor his alarming appearance from pallor, scorched face and arm. A doctor was called and he is reported to be doing well. Slight damage was seen about the barn, caused from lightning.

The Thompson-Beynon-Sheppard locality, on the second, was the centre of cyclone havoc on Sunday. Clayton Beynon saw the roof and siding of his barn carried off by the cyclone forty rods away. The metal roofing caused near damage to the house. Nelson Thompson lost roofing from buildings and Geo. Thompson also suffered damage to property. One of the Sheppard barns contributed its bit. King City had plenty of wind and rain but farther west the storm eased considerably.

Misses Shirley Hill, aged 9, and Helen Snider, aged 9, of Nobleton, pupils of Mrs. Ab. Hill, won first class honours at York Musical Festival last week, in a piano duet, under 10 years. They were highly commended by the judges. Valerie Hunter of Schomberg took part in the Gold Medal performance on the last evening of the Festival. She won 5 classes of honours in voice, piano and elocution. Already she has 19 medals to her credit in three years, beginning when 5 years old. Evelyn Hunter, aged 4, also took 2 honour marks at Aurora.

Schomberg Fall Fair is set for September 26 and 27. The Boys' Calf Club will again compete.

Members of King Women's Institute heard an educational address concerning a P.S. Course of Study by Inspector C. A. Lapp, last week. A brief review of the course pointed to the constructive and broadening influence within its scope. The schools of yesterday emphasized passivity in the child and activity in the teacher. Today the reverse exists. Schools are child centres, stressing purposeful activity of the child. "It is less a preparation for the future but part of the actual child life, here and now." Advocacy of enterprise, of activities shared, in a social situation teaches him to live with others and for others.

The 1940-41 institute programmes have been edited for King W.I. and very interesting they seem to be. Program editors have put through the plans and members will do well to carry them out closely.

WARNING NOTICE RE CORN BORER

All corn growers, whether on the farm or elsewhere, are hereby notified that all corn stubble or other corn remnants, no matter where they may be, must either be ploughed under completely or else gathered and burned BEFORE MAY 20, and that failure to do so leaves the offender liable to prosecution, or to having to pay the cost of sending men in to do the work.

Signed R. J. MacTAGGART, R.R. 1 Kleinburg, Chief Inspector for the County of York.

ASSISTANTS:

F. MARRITT, Keswick
GORDON S. SELLERS, R.R. 2 Agincourt

WILFRED FOUNTAIN, Sharon
STEWART McQUAY, Gormley
FRANK O. REEVES, R.R. 2 Weston (Woodbridge)

Notice to Creditors AND OTHERS

All persons having claims against the estate of Matilda Jane Cain, late of the Village of Schomberg, Spinster, who died on or about the 18th day of March 1940, are required to send notice of their claims together with due proof thereof to the undersigned on or before the 18th day of June 1940, after which date the estate will be divided among those entitled thereto having regard only to such claims of which she shall then have notice.

Dated at Richmond Hill, this 16th day of May, 1940.

Mrs. Minnie Lloyd,
Administratrix,
Richmond Hill, Ontario
C/o J. R. Herrington.
