STILL STUDYING WATER SUPPLY PROBLEM

Development of the additional Richmond Hill water supply is at a standstill pending further investigation. The estimated cost of pump, motor and starter to pump water from the new well directly into the main is \$5,250. If the water has to be filtered before it enters the main it will mean a substantial outlay in addition. The alternative to building a filter at the new well would be to construct a main to the present pumping station which would probably cost about \$10,000.

TRIBUTE TO MARY

Mary is the "voice with a smile". Mary is the efficient person generally known as a telephone operator. As an operator she knows much about telephone equipment—how it should be used and handled.

But Mary is best known for her personality—for her coolness in emergencies—for the grand things she has done time and again, ignoring her own danger, intent on one thing only—to keep the standard of telephone service high.

We pay respectful tribute to Mary and all the girls who work with her. Her devotion to her job sets a standard of public service. Tactful, patient and courteous, Mary is the medium through which this Company and its public are always in touch. She plays a vital part in Canada's war effort.
