First Crop of Oats
Purchased Pioneer
Downsview Homest'd

George Andrew Jackson, one of the county's oldest residents, recalls that his grandfather bought the property now occupied by the Con-nought Laboratory on Steele's Ave. and paid for it with his first crop of oats. Mr. Jackson, who celebrated his 80th birthday last week, remembers it was at the time of Russian war when wheat was \$2.50 a bushel and oats \$1.50 a bushel.

Commenting that congregations seldom fill churches now, Mr. Jackson related that Downsview United church was filled to capacity for both the morning and evening services in the "old days". He is one of the oldest members, and he and his father held office of church treasurer for a total of more than 50 years.

The great community spirit of 50 years ago, with every farmer sharing in his neighbor's work and all co-operating in church and community life, is prominent in his memory. He retains vivid memories of barn raisings, threshings and killing bees.

Mr. Jackson became leader of Downsview brass band three years after its organization in 1881. Later, he became leader of Weston brass band, holding that position from 1887 to 1897. Speaking of the large families of his boyhood days, he pointed out that six sons of a family of 14 children were in his band at one time. The family was that of Robert Bull, his grand-uncle.

The octogenarian is one of North York's most successful farmers and has spent his life on the farm settled by his pioneer grandfather 116 years ago. Mr. Jackson's only son, William, is the fourth generation of the Jackson family to reside on the farm.

EVERY MAN A PART

When one finds he is out of sympathy with his town, and can only say a good word for it coupled with an apology, he ought to get out. Many people fall into a sort of unconscious habit of growling. But it's a miserable habit. Such people make of themselves a dead weight, while, of course, they imagine themselves particularly independent. The individual has about all he can do to get along under his own loads, and he wants help and encouragement from those going his way, and who are identified with him in interest. So with the town. It has its interest to care for, and it needs all the pluck, all the energy, all the co-operation and helpfulness its citizens can provide and bring to bear. Every man is a part of his town.—Stirling News-Argus.

They were entertaining the vicar to lunch, and the guest remarked to the small boy of the house: "Don't you ever say prayers before your meals, my child?"

"Oh, no," said the child. "Dad says our cook's pretty reliable."

J. CARL SAIGEON, Auctioneer,

Use Certified Or
Registered Seed

"What seed shall I buy to be certain of good seed?" is a question frequently asked. To get a good start with good seed, it is necessary to buy only a few bushels of Registered or Certified seed. These grades of seed are derived from crops inspected in the field and for which seed certificates are issued finally by the Plant Products Division, Dominion Department of Agriculture, Ottawa. These are legal grades under the Seeds Act of Canada. A variety is accepted for registration only after it has been carefully compared with other varieties and found to be deserving of a place in some part of the Dominion. Registration of certification of seed implies that the crop from which it has been derived must have been inspected in the field and found to have the required degree of purity of variety and kind. It must also be free from weeds and seed borne diseases within certain limits. Further, before the seed can be sold as registered or certified, it must be subjected to a purity and germination test, and, if up to a certain specified standard, it is tagged and sealed in accordance with the regulations prescribed under the Seeds Act.

Sufficient Seeds
For Home Garden

There is no need for the home gardener to worry about getting sufficient vegetable and flower seeds to meet his needs this year. There are enough in the hands of the seedsmen to meet all normal requirements, the Seeds Administrator stated today. He urges, however, every gardener to try to avoid waste of any seeds as the supplies for some seeds notably, beans, beets, cabbage, cauliflower, cucumbers, lettuce, onions, tomatoes, swedes and mangels may not be too plentiful for 1943. Meanwhile the Seeds Supply Committee, which functions under the Agricultural Supplies Board, has planned to augment support for the increase of vegetable and field root seed production, under a Dominion-Provincial program.

Increase Soya
Bean Production

Plans to increase soya bean production in York county and similar areas bordering Lake Ontario were announced this week by W. R. Reek, deputy minister of agriculture. In order to meet shortages of vegetable oil, a hardier type of seed has been developed at government experimental stations for allocation to districts of suburban climatic conditions, he said.

Soya bean acreage in Ontario would be "stepped up materially" this year and the government's plan calls for extraction of the oil from the beans, leaving the high protein balance as a cheap feed of high nutritional value for livestock, Mr. Reek indicated. Last year, he said, there were between 10,000 and 11,000 acres of soya beans cultivated in the province, mostly in Lake Erie counties, but little attempt has been made to extract the oil and the harvest had been used mostly as fodder.

Hollywood actors will give a good account of themselves in this war. They have so many shooting stars in the movies.
