Staff Sergeant Frank Egan of Barriefield Camp gave an interesting talk to pupils of King Public School on Monday afternoon. He pointed out the need of an education as an aid in learning the art of soldiering. Study courses require diligent application and academic standing proves very helpful. Obedience, cleanliness and truthfulness are required of a good soldier. Sergeant Egan has progressed in his profession.

Township schools used the annual Arbor Day on Friday, May 1st as a general "clean-up" day. Salvage collections are made regularly and children have done well in this effort. Schomberg has two ton of paper, besides scrap metal ready for sale; proceeds for Red Cross. Schools are all using the salvage proceeds for war work. We are surely learning the truth of the old adage, "Waste not, want not", and a fine principle it is.

Mrs. C. Watson of King celebrated her birthday on May 2nd. Congratulations and many more with health and strength abundant.

St. Mary's Magdalene W.A. of Schomberg sponsored a Red Cross quilting bee at the Anglican church last week. Some 50 ladies of the town did 6 quilts; afternoon tea netted \$8.50 for the Red Cross treasury.

Temperanceville Women's Institute raised \$27 from Apron Patches and a euchre, proceeds for soldiers' boxes. The apron made a 2 months' journey.

Laskay United Church Anniversary will be observed on Sunday, May 31st.

The annual Sectional meeting of Section IV, W.M.S., will be held at Westminster Presbyterian Church, in Willowdale, on Wednesday, May 20. Tempting Egg Dishes

Here are short cuts to emergency meals — an easy solution for the problem of what to serve when unexpected guests drop in.

- BAKED OMELET WITH CHEESE**
 4 eggs
 1/2 cup grated cheese
 2 cups soft bread crumbs
 3 cups milk
 1 tsp. salt
 Minced parsley

Beat the eggs, add milk, then the cheese, crumbs, and salt. Pour into a buttered baking dish, set the dish in a pan containing an inch of hot water, and bake in a moderate oven until firm. Sprinkle the parsley over the top and serve from the baking dish.

- CREAMED EGGS WITH CHEESE SAUCE**
 6 hard-cooked eggs
 6 slices of toast
 Slice 1 hard-cooked egg on each piece of toast on a hot place. Make 2 cups hot cheese sauce by adding 1/2 cup grated cheese to 2 cups medium white sauce and stir over hot water until the cheese is blended. Pour over the eggs and toast.

- HOT CORN CUSTARD**
 3 well beaten eggs
 1 can corn
 1 cup sweet milk
 1 cup cream
 1 tsp. sugar
 Salt and pepper
 1 tsp. butter

Beat the eggs well. Mix the corn, milk, cream, sugar, salt and pepper and add them to the beaten eggs. Melt the butter and add it to the mixture. Bake to a golden brown in moderate oven in a baking dish set in a pan of water.

- SCRAMBLED EGGS**
 Beat eggs until well mixed. For each egg used add 1 tablespoon of water, 1/8 teaspoon salt, 1/2 teaspoon Worcestershire. Melt 1/2 tablespoon butter for each egg; pour in eggs and cook over low heat.

McTavish purchased a pair of boots which were guaranteed for a year.

After eleven months, he returned, and complained that they were not standing up to the guarantee.

"Are you sure they fit you all right?" asked the manager.

"They fit me a' right," was the answer, "but my brother on night shift says they're a bit too tight for him."

188,356 articles of comforts and clothing were distributed at Eastern Canadian Ports to men of the Canadian and British Navy and Merchant Marine last year by the Canadian Red Cross.

Tells How To Avoid Low Quality Eggs

Prof. J. E. Francis, O.A.C. says gathering eggs several times a day in warm weather most important

With the approach of warm weather, more laying flocks are released from their winter quarters and allowed to range. The increased consumption of grass and other material picked up makes for low-quality eggs. The yolk colour may be high and the albumen thin and watery, states Prof. J. E. Francis, Ontario Agricultural College, Guelph.

At least part of this drop in quality may be prevented by allowing the birds to range for one or two hours in the evenings when first let out, and later making a practice of keeping them houses during the forenoons.

A temperature of 69 degrees Fahrenheit is high enough to start the germ in a fertile egg to develop. The physico chemical changes which break down thick egg albumen are very rapid at summer temperatures.

Eggs held in rooms where the air is dry, lose moisture rapidly. The air cell increases in size, and this along with a visible yolk, gives the candling appearance of an old egg.

To produce top quality eggs, during warm weather it is advisable to limit the amount of grass and scavenger feed that the birds consume.

Gather eggs several times each day, cooling them quickly and holding them at a temperature between 55 and 65 degrees, in a room where the humidity is between 75 and 85 per cent. This is an important factor and cannot be overstressed.
