## North York Member Reviews War Situation As He Urges Members Support Repeal of Section Which Provides Limitation In Respect Overseas Service

Enemy Attacks Must Be Met Before They Reach Canadian Territory - Warns Against False Optimism-Hansard Report of the Speech Delivered in the House of Commons June 24 By Hon. W. P. Mulock, Postmaster General and Member for North York

Mr. Speaker, we the members of the House of Commons are the representatives of the people of Canada at the hour of her gravest danger, at a time when her very existence is threatened and when defeat means death or slavery to our people. Under conditions such as these one thing and one alone should be considered; that is, how can Canada and the Canadian people make the most effective effort to help the freedom- loving nations of the world, and to save themselves from the perils which day by day are coming closer to our shores? This is no time for false optimism. The months before us will be filled with grave danger; they will test the resources of the united nations and the character of their peoples to the utmost limits. Let us not take it for granted that we are sure to win this war. If we and the united nations have the will to win; if we and our people and the peoples of the united nations are prepared to make sacrifices, increasing sacrifices, under more difficult and trying conditions, then we shall win. But if we are not pregared to make those sacrifices, we will not win.

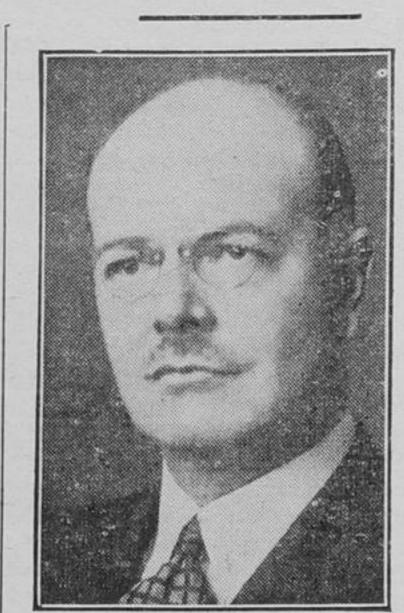

Let us consider the conditions and the outlook facing Canada to-day. On the Atlantic, German submarines are sinking ships along the American coast; not off the coast of the United States alone and in the Caribbean, but off our coasts, off Nova Scotia New Brunswick, Prince Edward Island and Quebec, right in the St. Lawrence. On the island of Newfoundland our troops stand side by side with their brothers in arms from the great republic to the south. defending the approaches to Canada and the North American continent from the forces of the axis powers. Farther to the east and north the United States has assumed the protection of Greenland and Iceland. In the case of Iceland they relieved troops from Great Britain and from Canada, which fortunately arrived in Iceland before the invasion forces from nazi Germany were able to do

Farther to the east and south we have Great Britain with a large army together with our own Canadian army of volunteers overseas who stand on guard protecting Britain itself and preparing for the day when a second front can be established on the continent of Europe. It is well for us to remember the important part played by our first division overseas when, after Dunkirk, in so far as organized land forces were concerned, they would to a great extent have been called upon to bear the brunt of any attempt of invasion of Britain. We all remember the terrible air attacks of the German luftwaffe, and the destruction, suffering and death they brought to the British people. But even that terrorism could not break the morale of the British; their courage saw tion to resist aggression.

a victorious German army and the mand. Within the last few weeks united nations.

Hong Kong and the Philippines, Malaya and Singapore, the Dutch East Indies and part of Borneo, the Andaman islands and Burma. They have made heavy attacks on Hawaii increased the tempo and ferocity of their attacks on China, I believe with the idea of opening land communications with Burma, thus releasing European continent. a large quantity of their merchant shipping for other purposes. It appears to me that the Japanese problem at this time is one of transpornation of 70,000,000 people; she has a tremendous army; millions of men, experienced troops, well equipped; men who have been brought up from childhood to glorify war, who believe that the greatest honour they can receive is to be killed in action on the field of battle for their Mikado and for the Japanese empire, and that such a death gives them a passport to the heaven that they envisage. She has an army of soldiers who believe in conquest, into whose minds hatred and jealousy of the white nations have been inculcated for many years. Even when they were our all'es in the last war they had no love for either the Canadian or the United States troops. I believe that Japan has been working according to a plan carefully prepared over a period of many, many years. It was at the end of the last war that they obtained their foothold in Manchuria. They made large investments of capital in the for the most opportune occasion for vestments, for the conquest of Man-

have taken Guam and Wake islands, strike next; she holds the initiative. Not bad!

With an improvement in her transportation problem the attack might be on India, through Burma. It might be another attack on Australia, or on Midway and Hawaii, to gain control of the mid-Pacific and so lessen the advantages of the Panama canal to the united nations. It might take sters associated with him, including the form of an attack on the Russian area from Vladivostock to Khabarovsk, not only to force the Russians to move troops from the German front but also to obtain for Japan control over an area in which airports might be located for use had inculcated into their minds the against her vulnerable cities.

forces are able to go on the offensive, the axis powers will to a great extent have the choice as to the to understand they have been told when those battles will be fought. which should dominate the world, and initiative we must expect a variety of attacks to be made in an attempt to divert us from our main objective, the establishment of a second front and the destruction of the Ger- the minds of those young people man war machine. It is possible that there have been instances where that the present axis strategy is to children have betrayed their own attack in a number of widely separated areas, with the object of creatwe may be sure, would be to prefrom assembling in Great Britain the forces, munitions and transport necessary successfully to invade the existence as a nation.

It may be that the present occupation of the islands in the Aleutian group is for this purpose. On the other hand we can be very sure that tation, not man-power. Japan is a if the Japanese achieve successes, ly. It is almost a foregone conclusion that in the development of the strategical scheme Canada, with its vast air training plan, has not been overlooked by the axis powers. The German high command undoubtedly mitments of any kind, so that they does not view with equanimity the in their judgment may do that which arrival in the skies over Germany they consider best to defend this of increasing numbers of Canadian country. airmen. Mr. MACKENZIE (Vancouver Centre): New Brunswick.

Mr. MUI OCK: There are people who say that Hitler is wholly to blame. Of course Hitler has a lot to answer for. But getting rid of Hitler, and the rest of the gangthose in charge of the nazi party, would not correct the s'tuation. Let us not forget that millions of children growing up in Germany have been trained in nazi principles since they were four years old. They have rabid nazi propaganda that the nazi way of life is the only one worth Until such time as the allied living - that is worth fighting for and worth dying for. From the time that they have been old enough location of battles and the time that they belong to a super race With the axis powers holding the that if they would follow their nazi leaders they would become the masters of the world, with a greatly improved standard of living. Such ideas have been so firmly planted in fathers and mothers to the gestapo.

Can we expect any mercy, any ing confusion and panic among the fair treatment, from brutes such as united nations. Their great purpose, these? While it is true that we fight for freedom alongside Britain, and Australia. They have greatly vent, if possible, the united nations and alongside the United States and Russia, it is equally true that we fight for ourselves, and our very

That rubber stamp means

we can say Canada's cotton textile industry is 11 times ahead of its war production records of 1914-18.

The industry is delivering about 215,000,-000 yards a year of aircraft fabric, ammunition pouches, anti-gas cloth. camouflage netting, gun covers, parachute webbing, powder bags, uniform cloth, web equipment and other essential materials.

Dominion Textile is proud to have a part in this. We also wish to report that our plant employees are earning 28% more per hour than in 1939, and we pay 5.4 times more in taxes than the total paid in dividends to our several thousand shareholders.
