VAUGHAN ROADS IN GOOD SHAPE

Vaughan Township roads are in excellent condition and members of the Municipal Council at Monday's meeting expressed satisfaction with the amount and quality of the work done this year. "I think getting the gravel on early in the season is an excellent idea," said Reeve Scott and all members agreed that it was a good plan. Keep the maintainer going now and we will have good roads all year, they said. "We must remember," said councillor James Robson, "that the decreased traffic is helping our roads. There's a lot less traffic than in other years."

GAS, TIRE SHORTAGES PUT SHOES ON SPOT

People Walking More, Must Learn to Care for Footwear

People are walking a great deal more, now that the tire and gasoline shortage is what it is. Shoes, therefore, are playing a much greater part in everyday life. Regular polishing and the use of shoe trees are of first line importance in extending the life of footwear and in maintaining a proper appearance.

Extra care should be taken in the buying of shoes these days. They should be the correct size and width to ensure plenty of foot room for walking. What is more, care in buying will mean added life to shoes.

The first rule in making shoes last longer is regular polishing. A good polish protects shoes by acting as a kind of weather conditioner, and makes them more pliable. This doesn't mean that rubbers and galoshes shouldn't be worn in wet weather. Shoes which are wet are easily put out of shape. When shoes get wet and muddy they should be washed off with a damp cloth and wiped dry. Shoe trees should be inserted immediately and then shoes should be allowed to dry slowly, but completely, away from direct heat. As soon as they are dry they should be given a good polish.

RURAL AND SUMMER RESORT RESIDENTS URGED TO CO-OPERATE IN GREAT SALVAGE EFFORT — NEARLY 10,000 POST OFFICE EMPLOYEES PARTICIPATING

Nearly 10,000 rural post office employees have been enlisted in a campaign beginning August 24 and continuing through September 8 to collect all scrap rubber in Ontario and Quebec rural and summer resort areas, it was announced today by Hon. W. P. Mulock, Postmaster General, and Charles LaFerle, National Salvage Director.

Rural mail contractors, stage service contractors and rural postmasters whose services are being voluntarily given for the drive are representative of more than 5,000 post offices and over 3,000 mail routes. They will perform the vital task of seeing that the scrap rubber donated by the public is collected. The nearest salvage committees will in turn see that it reaches the government-owned Fairmount Company, which handles the product.

This campaign will apply only in the two provinces, but may be extended to the rest of the country later on. Residents of cities and towns are excluded from the campaign because this would bear too heavily on post office facilities and because urban residents have local salvage committees to carry out the work of rubber collection.

"Once again," said Mr. LaFerle, "the post office has provided an example of the highest type of co-operation. I am confident that with the help of this outstanding transportation link the campaign will be a marked success and will tap an excellent source of much-needed rubber."

During the campaign rural delivery patrons are being asked to pile their scrap rubber at the foot of their mail boxes, to be transported by the rural mail contractors to their post offices. Patrons of rural post offices are requested to bring their scrap rubber to the post office when calling for mail.

The drive is being timed to coincide with the end of the summer resort season, when summer residents can readily part with such things as the old tires on their boat docks. At the same time it will be a convenient period for a scrap rubber cleanup in Quebec and Ontario farms and rural homes.

Before the campaign opens residents in the rural areas of the two provinces will receive from the post offices post cards describing the details of the collection system and pointing out the various items about their homes that should be contributed to the war effort.

Rubber tires from summer resort wharves and docks, other discarded automobile and tractor tires and tubes, rubber boots, old swimming tubes, hot water bottles — rubber articles of any and all descriptions are required to be reclaimed and transformed into necessary equipment for the armed services.

Mr. LaFerle pointed out that the postal employees are undertaking this task without any extra pay and in addition to their usual duties. For this reason, he said, it will be helpful if the public lends assistance wherever possible in seeing that the rubber gets to the post offices or the depots which in many cases will be set up near the post office building.

LIBERAL ADS GET RESULTS

If you have something to sell, tell 6000 readers about it through a classified "ad" in The Liberal. The cost is small and you will get results.

Men, Women Over 40 Feel Weak, Worn, Old?

Want Normal Pep, Vim, Vitality?

MORE WOOL IS NEEDED for Canada's War Effort

CO-OPERATE IN ONTARIO'S EFFORT TO PRODUCE MORE WOOL. HELP INCREASE THE SIZE AND NUMBER OF ONTARIO SHEEP FLOCKS

PRODUCING more wool to clothe Canada's fighting forces and her civil population is a vital task which deserves the earnest consideration of every Ontario farmer. A brief study of the wool production of North America and of world conditions occasioned by the war reveals an alarming situation that calls for straight thinking and forthright speaking.

North American Wool Production 1941		North American Wool Consumption 1941	
Canada	19,200,000 lbs.	Canada	109,000,000 lbs.
United States	455,000,000 lbs.	United States	977,000,000 lbs.
Total	474,200,000 lbs.	Total	1,086,000,000 lbs.
DEFICIT - - - - -		611,800,000 lbs.	

You can see that with shipping space at a premium and with every merchantman a target for enemy submarines, the situation is indeed critical. More wool must be produced at home and it's up to Ontario farmers to help produce it.

The Ontario Department of Agriculture is working to effect an increase of 25% in this province. To do this, all present flocks must be kept, and in addition, 110,000 ewe lambs from the 1942 crop must be kept on the farm. If every present flock owner kept three ewes from this crop, most of the increase would be obtained. But since many sheep owners cannot accommodate any more animals, the Department is asking Ontario farmers to establish 1,000 new flocks which will absorb all surplus ewe lambs. Your Agricultural Representative will be able to put you in touch with men who have lambs for sale or men who wish to purchase them.

In establishing 1,000 new flocks, it is intended that expansion take place by counties in proportion to the present sheep population. You will see what expansion must be accomplished in your county in the lists below.

CATEGORY "A" 3 More Flocks per Township Required	Renfrew Simcoe Victoria Wellington York	CATEGORY "C" 1 More Flock per Township Required	Lennox & Addington Lincoln Muskoka Nipissing Norfolk Northumberland Oxford Perry Sound Prescott Prince Edward Russell Stormont Sudbury Temiskaming Thunder Bay Welland
CATEGORY "B" 2 More Flocks per Township Required	Algoma Brant Dundas Elgin Essex Glengarry Grenville Haliburton Kent Leeds		

THE RAM POLICY

Any farmer starting a new flock of 15 ewe lambs or more may secure a ram for two years on loan from the Dominion Government.

CONSULT YOUR AGRICULTURAL REPRESENTATIVE

For complete information about securing ewes, ewe lambs, or rams, or about any part you can play in helping Canada produce more wool, consult your county Agricultural Representative or W. P. Watson, Live Stock Branch, Dept. of Agriculture, Toronto.
